Exam NS0-005 Quizzes & Practice NS0-005 Test

Everybody knows that Network Appliance is an influential company with high-end products and best-quality service. It will be a long and tough way to pass NS0-005 exam test, especially for people who have no time to prepare the NS0-005 Questions and answers. So choosing right NS0-005 dumps torrent is very necessary and important for people who want to pass test at first attempt.

Network Appliance NetApp Technology Solutions Professional Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40

A customer wants to use FabricPool technology with NetApp StorageGRID. All objects must be erasure coded What is the minimum number of sites required to deploy the StorageGRID solution while providing site redundancy?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

FabricPool is an ONTAP feature that tiers inactive data to an object store such as StorageGRID. StorageGRID uses erasure coding to protect data by slicing an object into data fragments and parity fragments, and spreading them across Storage Nodes. To use erasure coding, the storage pool must include three or more sites, or exactly one site. Two sites are not supported. Therefore, the minimum number of sites required to deploy the StorageGRID solution with FabricPool and erasure coding is three.

References = Configuring StorageGRID for FabricPool, What erasure-coding schemes are

NEW QUESTION # 41

A customer needs to accelerate data access of a hot volume to multiple remote sites.

Which NetApp ONTAP feature simplifies file distribution, reduces WAN latency, and lowers WAN bandwidth cost?

- A. FlexClone technology
- B. SnapMirror Business Continuity
- C. MetroCluster software
- D. FlexCache technology

Answer: D

Explanation:

FlexCache technology is a feature of NetApp ONTAP that enables you to create a cache volume on a remote cluster and populate it with data from a source volume on a different cluster. The cache volume can serve read requests from local clients, reducing the WAN latency and bandwidth consumption. The cache volume can also be configured to write back to the source volume, ensuring data consistency and availability. FlexCache technology simplifies file distribution by allowing you to create multiple cache volumes across different sites and regions, and manage them from a single interface.

References = FlexCache volumes overview - NetApp, FlexCache volumes: Simplify file distribution and reduce WAN latency - NetApp, FlexCache volumes: Use cases and benefits - NetApp.

NEW QUESTION # 42

A customer wants to use cloud storage as part of their data strategy. Their existing storage is a mixture of NFS and SMB workloads. The customer wants a managed service to help provision these resources.

Which solution should the customer choose?

- A. AFF
- B. NetApp Cloud Volumes ONTAP
- C. Azure NetApp Files
- D. StorageGRID

Answer: C

Explanation:

Azure NetApp Files is a fully managed cloud storage service that provides SMB and NFS file services for your cloud applications on Microsoft Azure. It is designed for customers who want to use cloud storage as part of their data strategy and have a mixture of NFS and SMB workloads. Azure NetApp Files simplifies and automates the deployment, management, and scaling of your file systems, while delivering high performance, availability, security, and data protection. You can also leverage NetApp's data management capabilities, such as snapshots, clones, replication, and backup, to enhance your data lifecycle management.

NEW QUESTION # 43

A storage administrator logs into their NetApp BlueXP observability environment and wants to install an infrastructure data collector to begin collecting data.

Which item should be configured first?

- A. Agent
- B. NetApp ONTAP SVM Data Collector
- C. Data Collector
- D. Acquisition Unit

Answer: D

Explanation:

An acquisition unit is a software component that collects data from various sources and sends it to the BlueXP observability service. It is the first item that should be configured before installing any data collectors or agents. Data collectors are plugins that run on the acquisition unit and collect data from specific sources, such as NetApp ONTAP SVMs. Agents are optional components that can be installed on hosts to collect additional data, such as process and network metrics.

References = BlueXP and Cloud Insights: The Importance of Observability - NetApp, Cloud Insights is a part of BlueXP - NetApp, Data collection infrastructure overview - IBM

NEW QUESTION # 44

A customer is considering NetApp BlueXP backup and recovery. They want the ability to restore entire logical sets of data and to drill down and restore from a more granular level of their file system.

Which two restore capabilities does BlueXP backup and recovery provide to meet these restore demands? (Choose two.)

- A. SVM
- B. volume
- C. aggregate
- D. file
- E. object

Answer: B,D

Explanation:

BlueXP backup and recovery enables you to perform volume, file, and folder-level restore operations from the cloud or on-premises object store. You can restore entire volumes or specific files or folders from any backup file. You can also use the catalog search feature to find and restore files based on a query.
