Salesforce Salesforce-Slack-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	Security: This domain targets Salesforce Security specialists in identifying Slack product security features that meet organizational needs. Candidates will describe how Slack addresses security governance, risk management, and compliance while recommending features that protect sensitive data.
Topic 2	App Administration: This section evaluates the skills of Slack Administrators in managing applications within Slack. Candidates will summarize the value of interoperability for both decision-makers and end-users while learning to use Workflow Builder for automating tasks.
Topic 3	Enabling Slack Success: This section focuses on the skills of Admins to develop a vision for Slack within their organization. Candidates will use analytics dashboards to track usage and make recommendations based on data insights, such as channel archival or promoting best practices.
Topic 4	Fundamentals: This section of the exam measures the skills of Salesforce Administrators and covers the key privileges and responsibilities associated with each Slack user role. Candidates will identify unique features of Slack's paid plans and understand the common responsibilities shared by Admins and Owners. Additionally, this section emphasizes the importance of workspace and organization-level settings and dashboards, focusing on how they contribute to effective Slack management.
Topic 5	Channel and User Group Administration: This section measures the skills of Salesforce Administrators in setting up and managing Slack channels. Candidates will learn when to use channels versus direct messages or group DMs, as well as when to opt for public or private channels.
Topic 6	User Lifecycle Management: This area focuses on managing user accounts throughout their lifecycle in Slack. Candidates will implement authentication options based on organizational requirements and recommend processes for new account creation.

Salesforce Certified Slack Administrator Sample Questions (Q49-Q54):

NEW QUESTION # 49

Your organization is busy with quarterly account and financial planning. Many conversations are happening in Slack across all departments in various channels.

In which situation is it best for an existing public channel to be converted to a private channel?

- A. A team member has created a channel for an end-of-quarter event at their office location. The information is not necessary for people who are located in other offices.
- **B. The finance team and select executives have been discussing quarterly planning in a public channel. The conversation has evolved to require discussion around quarterly earnings results that are not yet available for employees nor the public.**
- C. A new channel has been created for quarterly planning for a new account. Some participants are not accustomed to discussions being public and would prefer the project channel to be private so that others can't read the conversations.
- D. A project team is discussing a lot of unexpected challenges that have occurred this quarter. This has resulted in some difficult comments and conversations in the project channel.

Answer: B

Explanation:

Slack recommends converting public channels to private when:

"Sensitive or confidential information (e.g., financial results, M&A activity) begins to be discussed and needs to be restricted to a limited group." Quarterly earnings (D) are sensitive, non-public information, justifying the need for a private channel.

Options A and B refer to comfort and tone but not confidentiality. Option C relates to relevance, not security.

NEW QUESTION # 50

Which Slack plans(s) support the Legal Holds feature?

- A. Enterprise Grid only
- **B. Business+ and Enterprise Grid**
- C. Pro, Business+ and Enterprise Grid
- D. Free, Pro, Business+ and Enterprise Grid

Answer: B

NEW QUESTION # 51

You're the Workspace Primary Owner of a Slack Free plan. You want to allow all employees in your company to join your workspace when they're ready. You also want to prevent anyone outside your company from accessing your workspace without admin approval.

What should you do?

(Select the best answer.)

- A. Direct your employers to access Slack through your identity provider (IdP).
flow from the workspace settings page.
- **B. Invite all employees to the workspace by entering their email addresses in the invite**

- C. Allow all workspace members to invite new members.
- D. Enable employees to sign up for the workspace using the company's email domain.

Answer: D

NEW QUESTION # 52

You're a Workspace Owner on a Slack Business+ plan.

Your organization plans to expand Slack usage to the entire company of 4,000 people, and your security team wants workspace access restricted to company email addresses.

What is the most secure option for onboarding all 4,000 users into Slack?

(Select the best answer.)

- A. Enable admins to invite their departments into the workspace so that new members are automatically added to the correct channels.
- B. Integrate with a SAML-based identity provider (IdP) and SCIM API connector so that you can pre-provision members to the workspace.
- C. Enable email signup so that those with an approved company email address can join by clicking your workspace's sign-up link or entering their email on the sign in page.
- D. Turn on Just-In-Time (JIT) provisioning and distribute an invite link that will allow those with the link to join the workspace.

Answer: B

Explanation:

Slack recommends for secure, large-scale onboarding:

"Using a SAML-based IdP with SCIM provisioning allows automatic user creation and deactivation based on your identity provider, ensuring security and control." Email signup (B) and JIT provisioning (C) are less secure. Admin invites (D) are manual and error-prone at this scale.

NEW QUESTION # 53

Which Slack plan(s) support the Legal Holds feature?

- A. Enterprise Grid only
- B. Business+ and Enterprise Grid
- C. Pro, Business+ and Enterprise Grid
- D. Free, Pro, Business+ and Enterprise Grid

Answer: A

Explanation:

According to Slack's official documentation regarding Legal Holds:

"The Legal Holds feature is only available on the Enterprise Grid plan. Legal holds allow Workspace Owners and Org Owners to preserve messages and files of specific users for compliance and legal purposes." Legal Holds are a critical feature for enterprises with compliance requirements, and they are not available on the Free, Pro, or Business+ plans.
