Candidates who pass Sharing-and-Visibility-Architect Certification prove their worth in the Salesforce field. The Salesforce Certified Sharing and Visibility Architect certification is proof of their competence and skill. This skill is highly useful in big Salesforce companies that facilitate a candidate's career. To get certified, it is very important that you pass the Salesforce Certified Sharing and Visibility Architect certification exam to prove your skills to the tech company. For this task, you require high-quality and accurate prep material to help you out. And many people don't get reliable material and ultimately fail. Failure leads to a loss of time and money.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q60-Q65):

NEW QUESTION # 60

Universal Containers (UC) has a custom Apex class that enforces a business process and updates opportunity field-level security

permissions of read only certain user's profiles are being updated by their class.
How should the architect fix this problem?

- A. Add With Sharing keyword to the class.
- **B. Use the With SECURITYT_ENFORCED keyword in the SOQL statement.**
- C. Put the code in an class that uses the With Sharing keyword.
- D. Use the IsUpdateable() Apex method to test each field prior to allowing updates.

Answer: B

NEW QUESTION # 61

Universal Containers has recently implemented an integration that is populating 50 custom fields on the account object. They would like these fields to be available to Managers for reporting but do not want them to clutter the page layouts. What should the Architect recommend as a solution?

- A. Add the fields to the Managers' Account Page Layout; mark the page layout section as Collapsed.
- B. Grant the Managers access to the fields using a Role-Based Sharing Rule; leave them hidden on the page layout.
- C. Add the fields to a Custom Report; grant the Managers' Role access to the report folder.
- **D. Grant Managers access to the fields using Field-Level Security; do not add them to a page layout.**

Answer: D

Explanation:

Explanation

The best solution for this scenario is to grant managers access to the fields using field-level security, and do not add them to a page layout. This way, the managers can see the fields in reports, but not on the account record detail page. The other options are either not feasible or not effective.

NEW QUESTION # 62

Universal Containers (UC) works with a dealer network to sell their products. There are approximately 5,000 dealers that do business with UC and UC has purchased a Partner Community to interact with each of their dealers on Opportunities. Each dealer is structured so that there are a group of managers who will oversee a larger team of agents. UC would like to set the Organization-Wide Defaults to Private for the Opportunity object, both internally and externally. Within each dealer, there are a few agents called Lead Agents who should be able to see the Opportunities for all of the other Agents at the dealer. What is the optimal solution for an Architect to recommend?

- A. Add a Sharing Set that shares Opportunities to the Lead Agent based on the Lead Agents Account.
- **B. Grant Super User access to the Lead Agents as part of the Community user setup.**
- C. Create a Sharing Rule to share opportunities to the owner's manager's role and below.
- D. Build an Apex Managed Sharing rule that will assign specific Opportunities to Lead Agents.

Answer: B

NEW QUESTION # 63

Which two reasons should the Architect consider regarding the use of Apex Sharing Reasons?
Choose 2 answers

- **A. Ensuring the Share record is not deleted upon ownership change.**
- B. Ensuring there is additional criteria available for Criteria-Based Sharing.
- C. Ensuring the Share record is deleted upon ownership change.
- **D. Ensuring the developer can more easily troubleshoot programmatic sharing.**

Answer: A,D

Explanation:

Explanation

The two reasons that the architect should consider regarding the use of Apex sharing reasons are A and B.

Option A allows the developer to more easily troubleshoot programmatic sharing, as they can identify which sharing records are

created by which Apex code. Option B prevents the share record from being deleted upon ownership change, as Apex sharing reasons are not subject to recalculation by Salesforce. The other options are either incorrect or irrelevant.

NEW QUESTION # 64

Universal Containers (UC) wants to reduce the amount of redundant leads entered into the system. UC also wants to ensure that leads are only edited/reassigned by the lead owner.

Which organization-wide default (OWD) approach should be recommended to help UC implement these requirements?

- A. Implement 2 Public Read-Only OWD on Lead.
- B. Implement a Public Read Only/Transfer OWD on Lead.
- C. Implement a Private OWD on Lead.

Answer: C

Explanation:

To ensure that only lead owners can edit or reassign their leads, the OWD for Lead should be set to Private. In a Private model:

* Only the owner (and users above the owner in the Role Hierarchy) can access and edit the record by default.

* Redundant lead entries can be minimized by enforcing validation rules or duplicate management logic.

* Option A: A Public Read Only/Transfer OWD does not restrict edit access to the lead owner, as anyone with appropriate permissions could edit or transfer the leads.

* Option B: Public Read-Only OWD does not align with the requirement to ensure only lead owners can edit or reassign leads.

* Option C (Correct): Private OWD ensures that only the lead owner has edit access, adhering to UC's requirements.
