With our motto "Sincerity and Quality", we will try our best to provide the big-league SC-401 exam questions for our valued customers like you. Our company emphasizes the interaction with customers on our SC-401 Study Guide. We not only attach great importance to the quality of Administering Information Security in Microsoft 365 exam, but also take the construction of a better after-sale service on our SC-401 learning materials into account.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 2	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 3	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.
Topic 4	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

Our Microsoft SC-401 exam questions are created and curated by industry specialists.Experts at VCEPrep strive to provide applicants with valid and updated Microsoft SC-401 exam questions to prepare from, as well as increased learning experiences. We are confident in the quality of the Microsoft SC-401 preparational material we provide and back it up with a money-back guarantee.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q79-Q84):

NEW QUESTION # 79
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You recently discovered that the developers at your company emailed Azure Storage Account keys in plain text to third parties.
You need to ensure that when Azure Storage Account keys are emailed, the emails are encrypted.
Solution: You create a data loss prevention (DLP) policy that has only the Exchange email location selected.
Does this meet the goal?

- A. No
- B. Yes

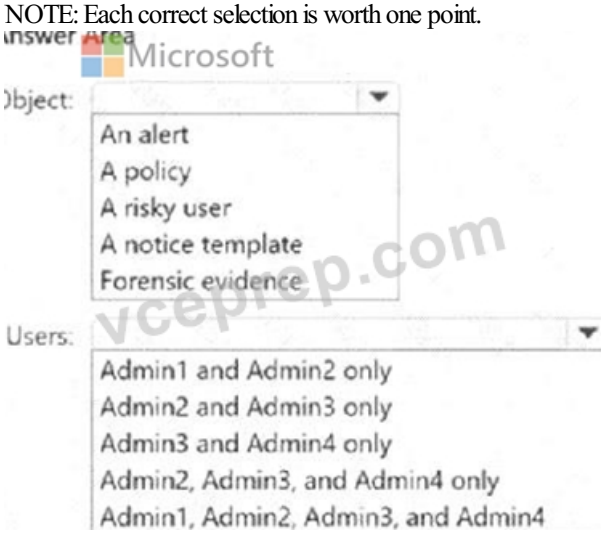
Answer: B

Explanation:
To ensure Azure Storage Account keys are encrypted when sent via email, you need a Data Loss Prevention (DLP) policy that detects Azure Storage Account keys using a sensitive information type and automatically encrypts emails containing these keys.
A DLP policy with Exchange email as the only location meets this requirement because it identifies sensitive data in email messages and it applies protection actions, such as encryption, blocking, or alerts.

NEW QUESTION # 80
HOTSPOT
You have a Microsoft 365 E5 subscription that contains the users shown in the following table.

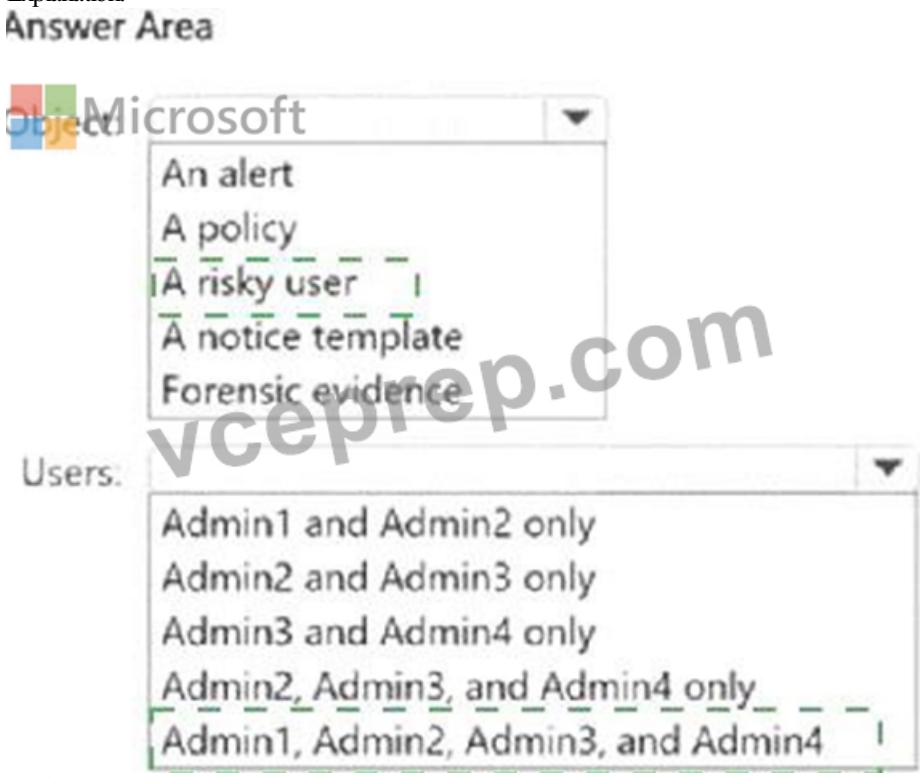
Name	Role group
Admin1	Insider Risk Management Admins
Admin2	Insider Risk Management Analysts
Admin3	Risk Management Investigators
Admin4	Insider Risk Management Auditors

You plan to create a Microsoft Purview insider risk management case named Case1.
Which insider risk management object should you select first, and which users will be added as contributors for Case1 by default?
To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

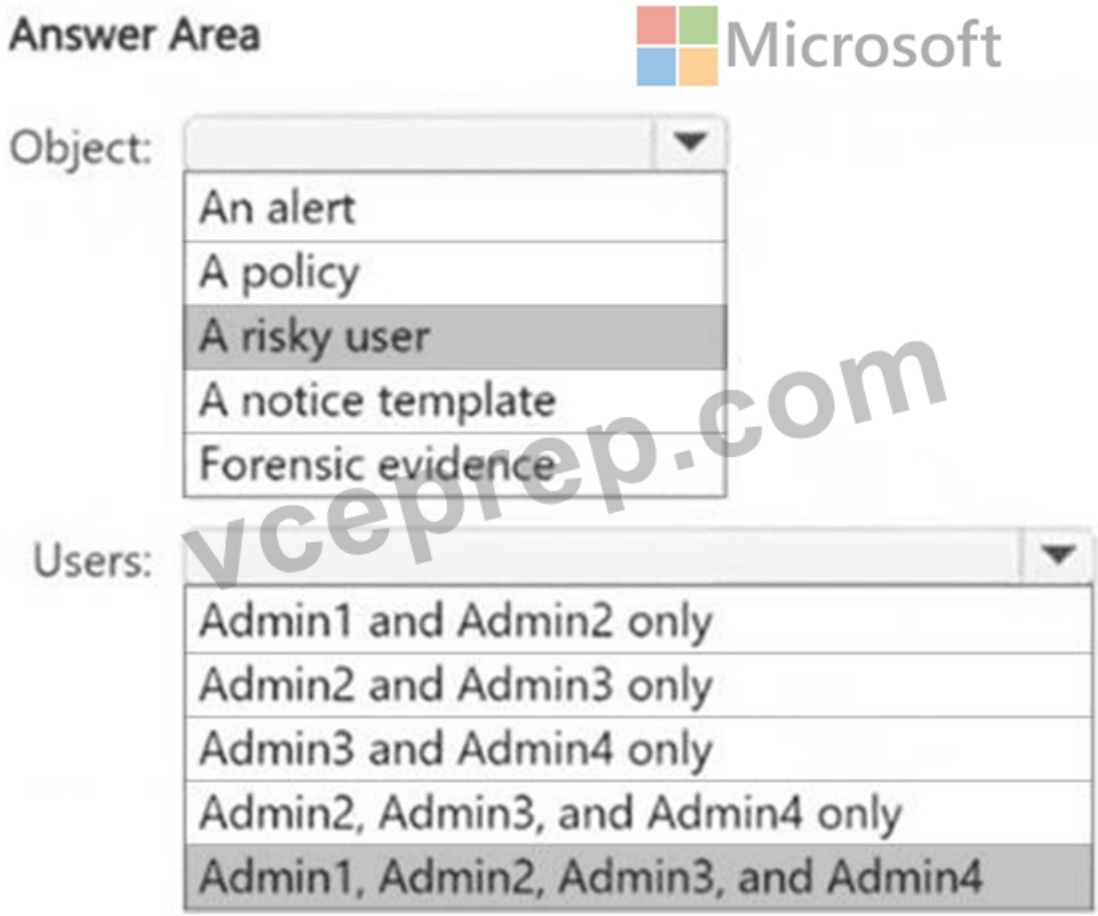


Answer:

Explanation:



Explanation:



Box 1: When creating a Microsoft Purview Insider Risk Management case, you must first select a risky user to investigate. The case will be built around this specific user's activities, linking alerts and risk signals to the investigation.

Box 2: The Insider Risk Management role groups determine who can access and contribute to cases:

Admin1 (Insider Risk Management Admins) # Full admin access.

Admin2 (Insider Risk Management Analysts) # Analysts who review cases.
Admin3 (Risk Management Investigators) # Investigators who work on cases.
Admin4 (Insider Risk Management Auditors) # Auditors who oversee cases.
All these roles have default access to insider risk cases in Microsoft Purview, so all four admins are added as contributors.

NEW QUESTION # 81
You have a Microsoft 36S subscription that contains the users shown in the following table.

Name	Email address	Distribution group
User1	user1@contoso.com	Finance
User2	user2@contoso.com	Sales

You create the data loss prevention (DLP) policies shown in the following table.

Name	Order	Apply policy to	Conditions	Actions	Exceptions	User notifications	Additional options
Policy1	0	Exchange email for the Finance distribution group	Content shared with people outside my organization. Content contains five or more credit card numbers.	Encrypt the message by using the Encrypt email messages option.	user4@fabrikam.com	Send an incident report to the administrator.	If there's a match for this rule, stop processing additional DLP policies and rules.
Policy2	1	All locations of Exchange email	Content shared with people outside my organization. Content contains five or more credit card numbers.	Restrict access or encrypt the content in Microsoft 365 locations. Block only people outside your organization.	None	Send an incident report to the administrator.	None

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
If User1 sends an email message that contains five credit card numbers to user4@fabrikam.com, the message will be encrypted.	○	○
If User1 sends an email message that contains five credit card numbers to orders@adatum.com, the message will be encrypted and delivered.	○	○
If User2 sends an email message that contains five credit card numbers to orders@adatum.com, the message will be encrypted and delivered.	○	○

Answer:

Explanation:

Answer Area

Statements	Yes	No
If User1 sends an email message that contains five credit card numbers to user4@fabrikam.com, the message will be encrypted.	○	○
If User1 sends an email message that contains five credit card numbers to orders@adatum.com, the message will be encrypted and delivered.	○	○
If User2 sends an email message that contains five credit card numbers to orders@adatum.com, the message will be encrypted and delivered.	○	○

Explanation:

Answer Area

Statements	Yes	No
If User1 sends an email message that contains five credit card numbers to user4@fabrikam.com, the message will be encrypted.	○	●
If User1 sends an email message that contains five credit card numbers to orders@adatum.com, the message will be encrypted and delivered.	●	○
If User2 sends an email message that contains five credit card numbers to orders@adatum.com, the message will be encrypted and delivered.	●	○

NEW QUESTION # 82
You have a Microsoft 36S ES subscription.
You plan to use the Microsoft Purview portal to map human resources (HR) data for use with insider risk management policies.
You need to add a data connector to import the HR data.
What should you do first and in which format should you import the data? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 83

You have a Microsoft 365 tenant

You need to create a new sensitive into type for items that contain the following:

* An employee ID number that consists of the hire date of the employee followed by a three digit number
