The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q124-Q129):

NEW QUESTION # 124

Which of the following best describes this diagram?

- A. Business Capability/Value Stream Mapping
- B. Business Relationships diagram
- C. Business Capabilities Layer diagram
- D. Business Capability Map

Answer: D

Explanation:

The diagram presented is best described as a Business Capability Map. Here's a detailed explanation:

* Business Capability Map:

* Definition: A Business Capability Map represents the various capabilities an organization requires to deliver its products and services and achieve its strategic objectives. It typically categorizes capabilities into different levels or tiers, such as strategic, core, and supporting capabilities.

* Diagram Analysis:

* Layers and Groupings: The diagram shows capabilities grouped into three categories: Strategic, Core, and Supporting. Each group lists specific business capabilities necessary for the organization's functioning.

* Color Coding: The use of different colors (green, red, yellow, purple) may indicate various aspects such as priority, status, or different business units. However, the primary purpose is to visually represent and categorize capabilities.

* TOGAF References:

* Phase B: Business Architecture: In this phase, creating a Business Capability Map is a crucial activity. It helps in understanding the business functions and aligning them with strategic goals.

* Capability-Based Planning: TOGAF promotes capability-based planning, which involves identifying, mapping, and analyzing business capabilities to ensure they support the overall strategy and objectives.

* Purpose and Benefits:

* Strategic Alignment: The Business Capability Map helps in aligning business capabilities with the strategic objectives of the organization. It provides a clear view of what the organization needs to do to achieve its goals.

* Gap Analysis: It is useful for conducting gap analysis by comparing current capabilities with the desired state, helping to identify areas for improvement.

* Resource Allocation: By understanding the different capabilities, organizations can allocate resources more effectively to areas that need development or enhancement.

In summary, the diagram is best described as a Business Capability Map because it visually represents and categorizes the various capabilities needed by the organization into strategic, core, and supporting layers, aligning them with the business strategy and objectives.

NEW QUESTION # 125

Which approach to model, measure, and analyze business value is primarily concerned with identifying the participants involved in creating and delivering value?

- A. Value streams
- **B. Value networks**
- C. Value chains
- D. Lean value streams

Answer: B

Explanation:

Value networks are an approach to model, measure, and analyze business value that is primarily concerned with identifying the participants involved in creating and delivering value³. Value networks focus on the relationships and interactions among the participants, such as customers, suppliers, partners, employees, and other stakeholders³. Value networks can help to understand how value flows through the network and how it can be improved or optimized.

NEW QUESTION # 126

Which of the following is a benefit of organization mapping?

- A. An organization map can be reused for training and employee development.
- B. An organization map improves the ability to consume, process, and deliver information.
- **C. An organization map improves strategic planning.**
- D. An organization map highlights inefficiencies and reduces operational costs.

Answer: C

Explanation:

One of the benefits of organization mapping is that it improves strategic planning². Organization mapping is a technique that can be used to document and visualize the organizational structure and relationships of an enterprise or a part of it². Organization mapping can help to align the organizational design with the business strategy, goals, and objectives². Organization mapping can also help to identify the roles, responsibilities, authorities, accountabilities, and dependencies of different organizational entities². By providing a clear and consistent view of the organizational landscape, organization mapping can enable better informed and more effective decisions for strategic planning.

NEW QUESTION # 127

Which of the following supports the need to govern Enterprise Architecture?

- A. The TOGAF standard cannot be used without executive governance.
- B. The stakeholder preferences may go beyond the architecture project scope and needs control.
- **C. Best practice governance enables the organization to control value realization.**
- D. The Architecture Project mandates the governance of the target architecture.

Answer: C

Explanation:

The need to govern Enterprise Architecture is supported by the fact that best practice governance enables the organization to control value realization. Here's a detailed explanation:

Enterprise Architecture Governance:

Definition: Governance in the context of Enterprise Architecture (EA) involves establishing processes, roles, and responsibilities to ensure that the architecture is developed and maintained in alignment with the business strategy and objectives.

Importance of Governance:

Control and Accountability: Effective governance ensures that architecture activities are controlled and aligned with business priorities. It establishes accountability for architectural decisions and outcomes.

Value Realization: Governance mechanisms ensure that the architecture delivers value to the organization by aligning with strategic goals, optimizing resource usage, and ensuring that architecture initiatives are completed successfully.

TOGAF Reference:

Architecture Governance Framework: TOGAF provides a framework for architecture governance, including guidelines for establishing governance structures, processes, and tools to manage architecture activities effectively.

ADM Phases: Governance is integrated into all phases of the ADM to ensure that architecture development is controlled and aligned with business needs. This includes monitoring progress, managing risks, and ensuring compliance with architecture principles and standards.

Best Practices:

Continuous Improvement: Best practice governance involves continuous monitoring and improvement of the architecture processes to ensure they remain effective and deliver the desired outcomes.

Stakeholder Engagement: Effective governance ensures ongoing engagement with stakeholders, ensuring their needs and concerns are addressed, and maintaining alignment with business objectives.

In summary, the need to govern Enterprise Architecture is supported by the fact that best practice governance enables the organization to control value realization, ensuring that architecture initiatives are aligned with strategic goals and deliver tangible benefits.

NEW QUESTION # 128

Consider the following ADM phases objectives.

	Objective
1	Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
2	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
3	Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABBs
4	Ensure conformance with the Target Architecture by implementation projects

Which phase does each objective match?

- A. 1E-2F-3E-4G
- **B. 1F-2G-3F-4F**
- C. 1G-2E-3F-4E
- D. 1F-2F-3E-4G

Answer: B
