

Test UiPath-SAIv1 Simulator, UiPath-SAIv1 Latest Dumps Book

What's more, part of that ActualCollection UiPath-SAIv1 dumps now are free: https://drive.google.com/open?id=1fA64NfcZP_WKpruNIP8GLUdZI_3AUn9L

Take advantage of the ActualCollection's UiPath training materials to prepare for the exam, let me feel that the exam have never so easy to pass. This is someone who passed the examination said to us. With ActualCollection UiPath UiPath-SAIv1 Exam Certification training, you can sort out your messy thoughts, and no longer twitchy for the exam. ActualCollection have some questions and answers provided free of charge as a trial. If I just said, you may be not believe that. But as long as you use the trial version, you will believe what I say. You will know the effect of this exam materials.

You can first download ActualCollection's free exercises and answers about UiPath certification UiPath-SAIv1 exam as a try, then you will feel that ActualCollection give you a reassurance for passing the exam. If you choose ActualCollection to provide you with the pertinence training, you can easily pass the UiPath Certification UiPath-SAIv1 Exam.

2025 Test UiPath-SAIv1 Simulator | Latest UiPath Specialized AI Associate Exam (2023.10) 100% Free Latest Dumps Book

Our specialists check whether the contents of UiPath-SAIv1 real exam are updated every day. If there are newer versions, they will be sent to users in time to ensure that users can enjoy the latest resources in the first time. In such a way, our UiPath-SAIv1 guide materials can have such a fast update rate that is taking into account the needs of users. Users using our UiPath-SAIv1 Study Materials must be the first group of people who come into contact with new resources. When you receive an update reminder from UiPath-SAIv1 practice questions, you can update the version in time and you will never miss a key message.

UiPath Specialized AI Associate Exam (2023.10) Sample Questions (Q29-Q34):

NEW QUESTION # 29

A Document Understanding Process is in production. According to best practices, what are the locations recommended for exporting the result files?

- A. Locally, Temp Folder, Network Attached Storage, and Orchestrator Bucket.

- B. Orchestrator Bucket and Queue Item.
- **C. Network Attached Storage and Orchestrator Bucket.**
- D. On a VM, Orchestrator Bucket, and Network Attached Storage.

Answer: C

Explanation:

In a Document Understanding Process, particularly when it is in production, it is crucial to manage output data securely and efficiently. Utilizing Network Attached Storage (NAS) and Orchestrator Buckets are recommended practices for exporting result files for several reasons:

Network Attached Storage (NAS): NAS is a dedicated file storage that allows multiple users and client devices to retrieve data from centralized disk capacity. Using NAS in a production environment for storing result files is beneficial due to its accessibility, capacity, and security features. It facilitates easy access and sharing of files within a network while maintaining data security.

Orchestrator Bucket: Orchestrator Buckets in UiPath are used for storing files that can be easily accessed by the robots. This is particularly useful in a production environment because it provides a centralized, cloud-based storage solution that is scalable, secure, and accessible from anywhere. This aligns with the best practices of maintaining high availability and security for business-critical data.

The other options (B, C, and D) include locations that might not be as secure or efficient for a production environment. For example, storing files locally or in a temp folder can pose security risks and is not scalable for large or distributed systems. Similarly, storing directly on a VM might not be the most efficient or secure method, especially when dealing with sensitive data.

NEW QUESTION # 30

What is the difference between the Document Understanding Process and the Document Understanding Framework?

- A. The Document Understanding Process contains the activities that can be used in a Library, while the Document Understanding Framework is the template that can be found in Studio.
- **B. The Document Understanding Process contains the activities that can be used in a Process, while the Document Understanding Framework is the template that can be found in Studio.**
- C. The Document Understanding Framework contains the activities that can be used in a Library, while the Document Understanding Process is the template that can be found in Studio.
- D. The Document Understanding Framework contains the activities that can be used in a Process, while the Document Understanding Process is the template that can be found in Studio.

Answer: B

Explanation:

According to the UiPath documentation portal¹, the Document Understanding Process is a fully functional UiPath Studio project template based on a document processing flowchart. It provides logging, exception handling, retry mechanisms, and all the methods that should be used in a Document Understanding workflow, out of the box. The Document Understanding Process is preconfigured with a series of basic document types in a taxonomy, a classifier configured to distinguish between these classes, and extractors to showcase how to use the Data Extraction capabilities of the framework. It is meant to be used as a best practice example that can be adapted to your needs while displaying how to configure each of its components¹. The Document Understanding Framework, on the other hand, is a set of activities that can be used to build custom document processing workflows. The framework facilitates the processing of incoming files, from file digitization to extracted data validation, all in an open, extensible, and versatile environment. The framework enables you to combine different approaches to extract information from multiple document types. The framework consists of several components, such as Taxonomy, Digitization, Classification, Data Extraction, Data Validation, and Data Consumption². Therefore, option B is the correct answer, as it describes the difference between the Document Understanding Process and the Document Understanding Framework.

NEW QUESTION # 31

What is the recommended number of documents per vendor to train the initial dataset?

- **A. 0**
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

According to the UiPath documentation, the recommended number of documents per vendor to train the initial dataset is 10. This means that for each vendor that provides a specific type of document, such as invoices or receipts, you should have at least 10 samples of their documents in your training dataset. This helps to ensure that the dataset is balanced and representative of the real-world data, and that the machine learning model can learn from the variations and features of each vendor's documents. Having too few documents per vendor can lead to poor model performance and accuracy, while having too many documents from a single vendor can cause overfitting and bias¹.

NEW QUESTION # 32

Having the following list of documents:

Invoice1.pdf, Invoice2.raw, Invoice3.gif, Invoice4.jpg, Invoice5.docx

Please choose all the files that can be used in the DocumentPath property of the Classify Document Scope activity.

- A. Invoice1.pdf, Invoice2.raw, Invoice3.gif, Invoice4.jpg
- B. Invoice1.pdf, Invoice4.jpg, Invoice5.docx
- C. Invoice1.pdf, Invoice3.gif, Invoice4.jpg
- D. Invoice1.pdf, Invoice3.gif, Invoice5.docx

Answer: C

Explanation:

The Classify Document Scope activity in UiPath is used to classify documents supported by the Document Understanding framework. It primarily works with file formats like PDF, JPG, PNG, and other image-based formats but does not process raw or non-standard file types like .raw.

NEW QUESTION # 33

What is the role of the Taxonomy Manager?

- A. To select which extractors are trained for each document type and field.
- B. To select the type of ML that can be used in the project.
- C. To present a document processing specific user interface for validating and correcting automatic classification outputs.
- D. To create and edit a Taxonomy file specific to the current automation project.

Answer: D

Explanation:

The Taxonomy Manager is a tool that enables you to create and edit a Taxonomy file, which is an XML file that defines the document types and fields that are relevant for your automation project¹. The Taxonomy file is used by the Classify Document Scope and Data Extraction Scope activities to perform document classification and data extraction, respectively². The Taxonomy Manager allows you to add, remove, rename, or reorder document types and fields, as well as specify the data type, format, and validation rules for each field³. The Taxonomy Manager also provides a preview of the Taxonomy file and a validation feature to check for errors or inconsistencies.

NEW QUESTION # 34

.....

You can learn from your UiPath Specialized AI Associate Exam (2023.10) (UiPath-SAIAv1) practice test mistakes and overcome them before the actual UiPath Specialized AI Associate Exam (2023.10) (UiPath-SAIAv1) exam. The software keeps track of the previous UiPath Specialized AI Associate Exam (2023.10) (UiPath-SAIAv1) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the UiPath UiPath-SAIAv1 Practice Test immediately, which is an excellent way to understand which area needs more attention.
