LEED-Green-Associate Test Simulator Online, LEED-Green-Associate Valid Test Sims

Our LEED Green Associate Exam test torrent was designed by a lot of experts in different area. You will never worry about the quality and pass rate of our study materials, it has been helped thousands of candidates pass their exam successful and helped them find a good job. If you choose our LEED-Green-Associate study torrent, we can promise that you will not miss any focus about your exam. There are three different versions to meet customers' needs you can choose the version that is suitable for you to study. If you buy our LEED Green Associate Exam test torrent, you will have the opportunity to make good use of your scattered time to learn whether you are at home, in the company, at school, or at a metro station.

USGBC LEED-Green-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.

Topic 2	<ul style="list-style-type: none"> • Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.
Topic 3	<ul style="list-style-type: none"> • Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.
Topic 4	<ul style="list-style-type: none"> • Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.

USGBC LEED Green Associate Exam Sample Questions (Q206-Q211):

NEW QUESTION # 206

Which of the following is a type of quality transit in LEED?

- A. Bicycle
- B. Motorcycle
- C. Single passenger car
- D. Taxi

Answer: A

Explanation:

Explanation

Quality transit in LEED refers to public transportation modes that reduce greenhouse gas emissions and provide access to diverse destinations. Bicycles are considered a type of quality transit in LEED, as they meet the criteria of being low-emitting, fuel-efficient, and having a high ridership capacity. Taxis, motorcycles, and single passenger cars are not considered quality transit in LEED, as they have higher emissions, lower fuel efficiency, and lower ridership capacity than bicycles.

NEW QUESTION # 207

The maximum number of credits that can be achieved under Energy and Atmosphere category for Building Design and Construction: New Construction and Major Renovation is

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

According to the LEED credit library, the Energy and Atmosphere category for Building Design and Construction: New Construction and Major Renovation has 6 prerequisites and 11 credits, with a total of 33 possible points. The prerequisites are:

Fundamental Commissioning and Verification (required)

Minimum Energy Performance (required)

Building-Level Energy Metering (required)

Fundamental Refrigerant Management (required)

Construction Activity Pollution Prevention (required)

Advanced Energy Metering (required)

The credits are:

Enhanced Commissioning (2-6 points)

Optimize Energy Performance (1-18 points)

Advanced Energy Metering (1 point)

Demand Response (1-2 points)

Renewable Energy Production (1-3 points)

Enhanced Refrigerant Management (1 point)

Green Power and Carbon Offsets (1-2 points)

NEW QUESTION # 208

Which of the following practices ensures that building systems are designed efficiently, installed appropriately and operate as intended?

- A. Building retrocommissioning
- **B. Building commissioning**
- C. Positive feedback loop
- D. Negative feedback loop

Answer: B

Explanation:

Building commissioning is a quality assurance process that begins during the design phase and continues through construction, occupancy, and operation of the building. It ensures that the building's systems are designed efficiently, installed correctly, and operate as intended. The commissioning process involves a series of inspections, tests, and adjustments of building systems, followed by a review of the system design and operation with the building's operations team. Green Building Council resources

NEW QUESTION # 209

Which of the following is a benefit of a building owner choosing to install a solar photovoltaic?

- A. Lower liabilities
- B. Decreased upfront building cost
- C. Heat Island Reduction
- **D. Reduced greenhouse gas emissions**

Answer: D

Explanation:

Installing a solar photovoltaic system can significantly reduce greenhouse gas emissions from a building. Solar panels generate electricity from sunlight, a renewable resource, instead of burning fossil fuels that release carbon dioxide and other greenhouse gases. While solar panels do require an upfront investment, they can also result in lower energy bills over time. Reference: LEED Green Associate Candidate Handbook, U.S. Green Building Council resources

NEW QUESTION # 210

A salvaged wood door from another site qualifies under what Materials and Resources sustainable criteria?

- **A. Materials reuse**
- B. Certified wood
- C. Waste diversion
- D. Bio-based materials

Answer: A

Explanation:

A salvaged wood door from another site qualifies under the Materials and Resources sustainable criteria of materials reuse. Materials reuse is the practice of using existing materials or products for new purposes without altering their form or composition. Materials reuse reduces the demand for virgin materials, saves energy and resources, and prevents waste generation. The other options are not applicable to a salvaged wood door from another site. Certified wood is wood that has been harvested from forests that are managed in an environmentally responsible, socially beneficial, and economically viable manner according to the standards of an accredited certification system such as the Forest Stewardship Council (FSC). Bio-based materials are materials that are derived from plants or animals, such as bamboo, cork, wool, or cotton. Waste diversion is the practice of diverting waste from landfills or incinerators by recycling, reusing, salvaging, or donating materials. Reference: LEED Green Associate Candidate Handbook, page 28; USGBC, [Materials and Resources], page 4.

NEW QUESTION # 211

.....

As we all know, it is a must for all of the candidates to pass the exam if they want to get the related LEED-Green-Associate certification which serves as the best evidence for them to show their knowledge and skills. If you want to simplify the preparation process, here comes a piece of good news for you.
