QUESTION 81

The compliance team is requesting a Veeam engineer complete the following tasks on the backup environment:

1. All image-level backups are to be tested and validated
2. Recovery verification with a well-known malware scan
3. Send an email to the Veeam engineer with test results

What is the recovery verification function to meet this requirement?

- A. On-Demand Sandbox
- B. SureBackup
- C. Quick Migration
- D. SureReplica

Answer: B

Explanation:

SureBackup is the Veeam technology that allows you to verify the recoverability of backups. It can automatically verify the integrity of the backup, test it for malware (with the aid of third-party antivirus software), and send email notifications upon the completion of the job. This is accomplished by running the backups in an isolated environment called a Virtual Lab, without making any changes to the actual production environment. By using SureBackup, Veeam engineers can ensure that image-level backups are recoverable, can be verified against malware, and can report the results via email, thus meeting the compliance team's requests.

QUESTION 82

An engineer sets up a backup job with direct backup to the AWS S3. The retention of the job is set to 31 days and the immutable period is set to 31 days. However, one full backup data is not removed automatically after 60 days. Which option could be the reason for this?

- A. The backup job is disabled accidentally.
- B. The backup data is encrypted.
- C. It is an active full backup, not synthetic full.
- D. A retention exception is enabled for the restore point.

Answer: C

Explanation:

In active full backups, the entire dataset is backed up each time the backup job runs, whereas in synthetic full backups, only the changes since the last full backup are backed up. If the engineer configured the backup job to run active full backups instead of synthetic full backups, it's possible that the data from the full backup taken 60 days ago is still being retained as part of the regular backup process. Therefore, it hasn't been removed automatically after 60 days as expected.

QUESTION 83

An engineer is configuring Veeam Backup and Replication for an organization to protect a VMware environment using

When you choose to attempt the mock exam on the Veeam VMCE_v12 practice software by FreeDumps, you have the leverage to custom the questions and attempt it at any time. Keeping a check on your Veeam Certified Engineer v12 exam preparation will make you aware of your strong and weak points. You can also identify your speed on the practice software by FreeDumps and thus manage time more efficiently in the actual Veeam exam.

According to personal propensity and various understanding level of exam candidates, we have three versions of VMCE_v12 practice materials for your reference. Here are the respective features and detailed disparities of our VMCE_v12 practice materials. Pdf version- it is legible to read and remember, and support customers' printing request, so you can have a print and practice in papers. Software version-It support simulation test system, and times of setup has no restriction. Remember this version support Windows system users only. App online version-Be suitable to all kinds of equipment or digital devices. Be supportive to offline exercise on the condition that you practice it without mobile data.

VMCE_v12 Latest Exam & VMCE_v12 Exam Duration

If you are finding a study material to prepare your exam, our material will end your search. Our VMCE_v12 exam torrent has a high quality that you can't expect. I think our VMCE_v12 prep torrent will help you save much time, and you will have more free time to

do what you like to do. I can guarantee that you will have no regrets about using our VMCE_v12 Test Braindumps When the time for action arrives, stop thinking and go in, try our VMCE_v12 exam torrent, you will find our products will be a very good choice for you to pass your exam and get you certificate in a short time.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 2	<ul style="list-style-type: none">Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 3	<ul style="list-style-type: none">Incident Response Planning: This section of the exam covers integrating Veeam Backup and Replication into the incident response strategy.
Topic 4	<ul style="list-style-type: none">Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 5	<ul style="list-style-type: none">Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Topic 6	<ul style="list-style-type: none">Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Topic 7	<ul style="list-style-type: none">Data protection strategies: This section of the exam covers an overview of data protection strategies.
Topic 8	<ul style="list-style-type: none">Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Topic 9	<ul style="list-style-type: none">Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 10	<ul style="list-style-type: none">Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Topic 11	<ul style="list-style-type: none">Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Topic 12	<ul style="list-style-type: none">Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.
Topic 13	<ul style="list-style-type: none">Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 14	<ul style="list-style-type: none">Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.
Topic 15	<ul style="list-style-type: none">Initial security considerations: This section defines ways and tools to secure the Veeam backup server.

Veeam Certified Engineer v12 Sample Questions (Q153-Q158):

NEW QUESTION # 153

A company is running nightly backups to satisfy their 24-hour RPO. There are two critical applications that cannot be offline more than 4 hours with no more than an hour of data loss.

How can this be accomplished?

- A. Backup copy jobs with hourly VM replication
- B. Enable Continuous Backup Replication
- C. A local SOBR with AWS Object storage
- D. Linux hardened repository with immutability

Answer: A

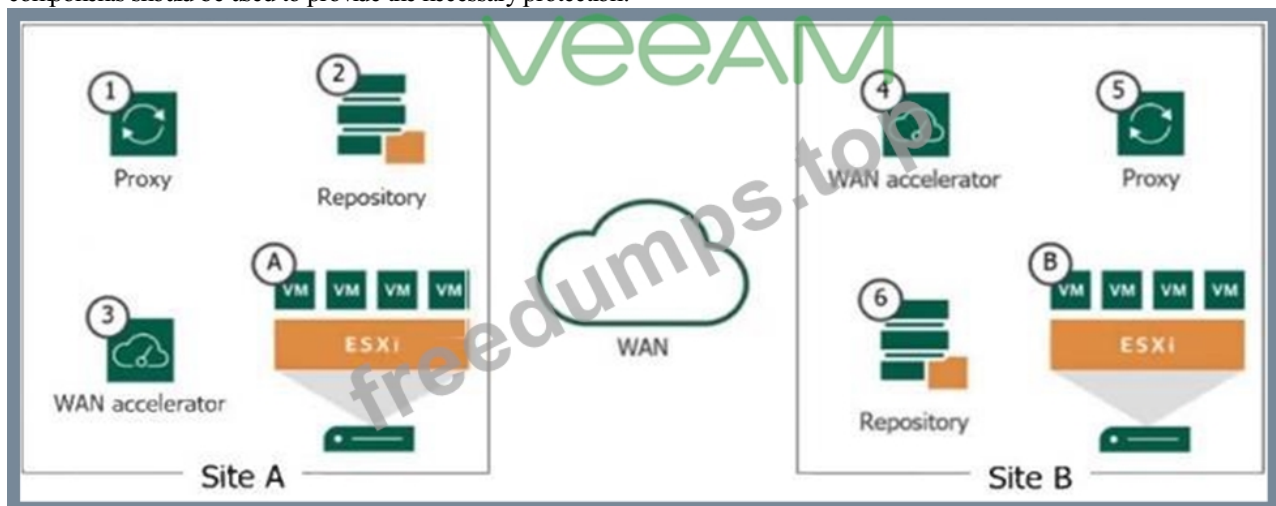

Explanation:

To meet the stringent Recovery Time Objective (RTO) of 4 hours and Recovery Point Objective (RPO) of 1 hour for the two critical applications, the most suitable approach is to use a combination of backup copy jobs and hourly VM replication, which corresponds to answer C.

Backup copy jobs can ensure that backups are available offsite for disaster recovery purposes, while VM replication provides the ability to quickly failover to a replica VM in case of a primary VM failure, thereby minimizing downtime. Veeam's replication capabilities are designed to create exact copies of VMs at regular intervals, which can then be rapidly activated in case of a failure. This strategy ensures that the applications can be brought back online within the 4-hour RTO, with data loss not exceeding the 1-hour RPO, thus meeting the company's stringent data protection requirements for these critical applications.

NEW QUESTION # 154

Backup jobs are configured to local repositories. Backups must be sent from Site B to the repository on Site A. The connection between the two sites does not allow a direct backup to complete within the backup window. Which type of job and Veeam components should be used to provide the necessary protection?

- A. A backup copy job and components 6?5?4?3?1?2
- B. A backup job and components 5 ? 4 ? 3 ? 2
- C. A backup copy job and components 6 ? 4 ? 3 ? 2
- D. A backup copy job and components 6 ? 4 ? 2

Answer: C

Explanation:

In a scenario where backups need to be sent from Site B to a repository at Site A and the direct backup cannot complete within the backup window due to connection limitations, a Backup Copy Job is the most suitable type of job. The Backup Copy Job can transfer data efficiently and with reduced impact on the production environment. The components involved would be:

6 (Repository at Site B): Where the initial backups are stored. 4 (WAN Accelerator at Site A): To optimize the data transfer over the WAN. 3 (WAN Accelerator at Site B): To prepare the backup data for transfer. 2 (Repository at Site A): The target repository for the backup copies. This configuration leverages the WAN Accelerators to reduce the amount of data that needs to travel over the WAN, thus allowing the backup copy job to complete within the available window.

NEW QUESTION # 155

A company needs to ensure that, during a disaster, a group of VMs starts in a certain order with time delays between starting each VM. How can this be accomplished?

- A. Create a failover plan.

- B. Perform a planned failover.
- C. Create a failover template file for the group of VMs.
- D. Create a replica chain in the Veeam Backup & Replication console.

Answer: A

Explanation:

To ensure that a group of VMs starts in a specific order with time delays during a disaster scenario, the solution is B: Create a failover plan. A failover plan in Veeam Backup & Replication is a feature designed to manage the startup sequence of VMs within a DR site. The failover plan can be customized to specify the order in which VMs should start and to include necessary delays between the startups of each VM. This is especially useful for multi-tier applications where the order of startup is essential for the application stack to become fully operational. By using a failover plan, companies can control the recovery process, ensuring that VMs are brought online in an orderly and coordinated fashion that respects their interdependencies.

NEW QUESTION # 156

Veeam ONE has been installed and configured. The infrastructure contains five Veeam Backup & Replication servers. The administrator needs to check the remaining capacity on each of the backup repository servers. Where can they see this information?

- A. Under Infrastructure View, look up the Veeam Backup & Replication servers to see the guest disk space.
- B. Under Infrastructure View, look up the backup repository servers to see the guest disk space.
- C. Under Business View, look up the backup repository servers to see the remaining capacity.
- **D. Under Data Protection View, look up the backup repository servers to see the remaining capacity**

Answer: D

Explanation:

In Veeam ONE, the remaining capacity of each backup repository server can be viewed under the Data Protection View. This section provides detailed information about the storage utilization and remaining capacity of backup repositories, allowing administrators to effectively monitor and manage storage resources.

NEW QUESTION # 157

Which of the following statements regarding bottleneck statistics is true?

- A. The bottleneck statistics are only displayed when you have a problem in your backup infrastructure.
- B. Bottleneck statistics can show the following states: Source/Proxy/Network/Source WAN Accelerator/Target WAN Accelerator/Target/None
- **C. The percentages displayed will always add up to 100% in total.**
- D. Bottleneck statistics can show the following states: Source/Proxy/Network/Source WAN Accelerator/Target WAN Accelerator/Target

Answer: C

NEW QUESTION # 158

.....

There are three different versions of our VMCE_v12 practice materials: the PDF, the Software and the APP online. And our VMCE_v12 learning materials can save a lot of time for its high efficiency. You can study online version of VMCE_v12 real test on the subway or on the bus; you can review it when you are lining up for a meal; you can study it before you go sleeping. At the same time, our APP version of VMCE_v12 Study Materials support offline learning, which avoids the situation that there is no way to learn without a network. So why you are still hesitating? Just come and buy it!
