

Test VMware 3V0-32.23 Tutorials - 3V0-32.23 Latest Exam Duration

HOW TO PREPARE FOR VMWARE 3V0-32.23 EXAM?

BTW, DOWNLOAD part of DumpsFree 3V0-32.23 dumps from Cloud Storage: <https://drive.google.com/open?id=1WOL6jF8ldBW7wGqGh9ICTq6r4ObZ7Fsx>

By our three versions of 3V0-32.23 study engine: the PDF, Software and APP online, we have many repeat orders in a long run. The PDF version helps you read content easier at your process of studying with clear arrangement, and the PC Test Engine version of 3V0-32.23 Practice Questions allows you to take stimulation exam to check your process of exam preparing, which support windows system only. Moreover, there is the APP version of 3V0-32.23 study engine, you can learn anywhere at any time.

VMware 3V0-32.23 Certification Exam is designed for IT professionals who are seeking to gain the skills and knowledge necessary to effectively design and implement cloud management and automation solutions using VMware technologies. Cloud Management and Automation Advanced Design certification is ideal for individuals who work in roles such as cloud architects, virtualization architects, and infrastructure architects.

3V0-32.23 Latest Exam Duration & 3V0-32.23 Exam Practice

Our 3V0-32.23 exam materials constantly attract students to transfer their passion into progresses for the worldwide feedbacks from our loyal clients prove that we are number one in this field to help them achieve their dream in the 3V0-32.23 Exam. Though you can participate in the use of important factors, only the guarantee of high quality, to provide students with a better teaching method, thus our 3V0-32.23 study dumps bring more outstanding teaching effect.

VMware Cloud Management and Automation Advanced Design Sample Questions (Q168-Q173):

NEW QUESTION # 168

A customer wants to deploy Workspace ONE Access for vRealize Suite users.

The customer wants to achieve the following requirements:

- Availability SLA 95% uptime per month, calculated Monday-Friday, 24 hours per day.
- The deployment footprint must be minimal.

Which design decision should the architect choose?

- A. Deploy a Workspace ONE Access node and protect it with Fault Tolerance.
- **B. Deploy a Workspace ONE Access node and protect it with vSphere HA.**
- C. Deploy a Workspace ONE Access cluster and protect it with Fault Tolerance.
- D. Deploy a Workspace ONE Access cluster and protect it with vSphere HA.

Answer: B

NEW QUESTION # 169

An architect is tasked with providing an automated solution for deploying and managing vSphere virtual machines (VMs). The users who deploy the vSphere machines must be able to review the VM's overall health.

Considering the need for least privileges, what is the best solution to satisfy this request?

- A. Deploy vRealize Automation and provide the users Read-only access to vRealize Operations for monitoring the machine's health.
- B. Deploy vRealize Automation with a Resource Action that allows for pulling health information using the Operations Orchestrator Plug-in.
- **C. Deploy vRealize Automation and configure it to display vRealize Operations health badges directly in the vRealize Automation UI.**
- D. Deploy vRealize Orchestrator for deployment and management of the vSphere VMs and provide the users Read-only access to vRealize Operations for monitoring the machine's health.

Answer: C

NEW QUESTION # 170

What key benefit does VMware vSAN bring to a Cloud Management logical design?

- A. Container orchestration.
- **B. Distributed storage.**
- C. Network security.
- D. Server provisioning.

Answer: B

NEW QUESTION # 171

A company has a main office, three regional offices, and six branches offices.

The network links are configured as shown in the exhibit. View the Exhibit:

During information gathering, an architect records:

The regional offices are located in secure bunkers. The CTO feels this would be a good location for all the vRealize Automation components to meet their BC/DR objectives. However, the CTO is looking for the best design while maintaining their very high security requirements.

The branch offices are located in very remote locations with unpredictable network performance.

Reliance on the main and regional offices needs to be minimal while still allowing provisioning of machines in the branch offices. The branch offices consist of three host vSphere clusters.

There is synchronous vSphere Metro Storage Cluster (vMSC) between the regional offices as well as replicated backups between the regional offices with replication running nightly. The CEO wants to have the lowest possible RPO and RTO of the vRealize portal including the ability to manage already provisioned machines while NOT increasing the amount of data being replicated between the regional offices as much as possible.

Referring to the exhibit, which two design specifications can the architect recommend to meet requirements? (Choose two.)

- A. distributed vRealize Automation management solution across the regional offices
- B. distributed vRealize Automation management solution in each of the regional offices
- C. vSphere agents in each of the branch offices
- D. vSphere agents in the regional offices that manage the regional and branch offices
- E. distributed vRealize Automation management solution in the main office

Answer: A,D

NEW QUESTION # 172

A cloud architect is tasked with designing a Guest virtual machine (VM) request form for an organization's new vRealize Automation (vRA) implementation. Its current PowerCLI VM request tool uses a PowerShell script that retrieves user IDs from Active Directory, which is the same identity source for vRealize Automation. The intent of the script is to retrieve and display John Smith when the actual value in Active Directory is JSmith01.

What is the most secure way to utilize the same script for user's display name in the vRA request form?

- A. Design a schedule vRealize Orchestrator (vRO) workflow to execute the PowerShell Script and store values in vRO, then utilize the vRA external drop-down to retrieve these values from vRO.
- B. Create a drop-down custom property with external values that returns a display name using the existing PowerShell script.
- C. Design a schedule vRealize Orchestrator workflow to execute the PowerShell Script and update the vRealize Automation drop-down custom property with static values.
- D. Design a display custom property in the vRA 'Administration/Active Directory Policy' that maps to the correct organizational unit.

Answer: B

NEW QUESTION # 173

.....

For candidates who will attend an exam, some practice for it is necessary. 3V0-32.23 Exam Dumps of us will give you the practice you need. 3V0-32.23 exam dumps of us contain the knowledge point of the exam. Skilled professionals will verify the questions and answers, which will guarantee the correctness. Besides, we also offer you free update for one year after purchasing, and the update version will send to your email address automatically.
