Each product has a trial version and our products are without exception, literally means that our UiPath-ADPv1 guide torrent can provide you with a free demo when you browse our website of UiPath-ADPv1 prep guide, and we believe it is a good way for our customers to have a better understanding about our products in advance. We are committed to offer you with data protect act and guarantee you will not suffer from virus intrusion and information leakage after purchasing our UiPath-ADPv1 Guide Torrent. The last but not least we have professional groups providing guidance in terms of download and installment remotely.

UiPath UiPath-ADPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• UiPath Activities: In this section, the discussion is related to various UiPath activities for UI interaction, data manipulation, control flow, and more.
Topic 2	• Debugging and Testing: This section is about utilizing logging and debugging tools and adopting unit testing and test automation strategies.

Topic 3	• Design and Development: This section covers designing workflows using sequences, flowcharts, and state machines, building reusable components with libraries, exception handling and debugging techniques, etc.
Topic 4	• UiPath Studio Fundamentals: In this section, the focus is given to the understanding of Robotic Process Automation (RPA) concepts; it covers UiPath Studio and its components, Working with the UiPath user interface, project creation, management, and version control.

Valid UiPath-ADPv1 Exam Bootcamp – The Best Exam Collection Providers for UiPath-ADPv1: UiPath (ADPv1) Automation Developer Professional

These people who used our products have thought highly of our UiPath-ADPv1 study materials. If you decide to buy our products and take it seriously consideration, we can make sure that it will be very easy for you to simply pass your exam and get the UiPath-ADPv1 certification in a short time. We are also willing to help you achieve your dream. Now give me a chance to show you our UiPath-ADPv1 Study Materials. You will have no regret spending your valuable time on our introduction. Besides, our UiPath-ADPv1 study quiz is priced reasonably, so we do not overcharge you at all.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q72-Q77):

NEW QUESTION # 72

What are the possible statuses after running any REFramework test case?

- A. PASS or FAIL.
- B. MANUAL or AUTOMATIC.
- C. SUCCESS or EXCEPTION.
- D. EXPECTED or ACTUAL.

Answer: A

Explanation:

After running any REFramework test case, the possible statuses are "PASS" or "FAIL". These indicate whether the test case succeeded or encountered an issue, respectively.

NEW QUESTION # 73

An error occurs during the Initialization state within the 'FrameworkMnitAllSettings.xml' file for a process using REFramework which is executed on Orchestrator. The project contains default values for the settings specified in 'Config.xlsx'.

What is the current state of the job in Orchestrator?

- A. Successful
- B. Stopped
- C. Faulted
- D. Suspended

Answer: C

Explanation:

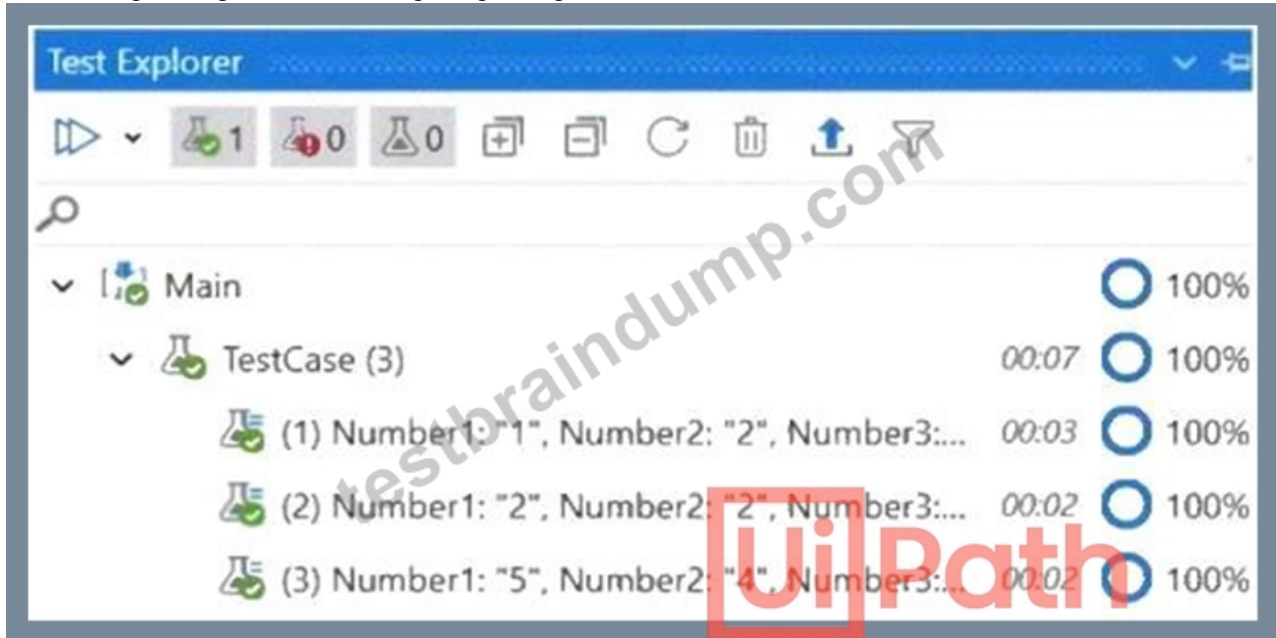

The current state of the job in Orchestrator is Faulted, because an error occurred during the Initialization state of the process using REFramework. The REFramework is a template for creating robust and scalable automation projects that uses the State Machine workflow type¹. The Initialization state is the first state in the REFramework, which is responsible for initializing the application, reading the configuration file, and setting the log level². If an error occurs during the Initialization state, the process will go to the End Process state, which will perform the final actions and close the application². The End Process state will also mark the job as Faulted in Orchestrator, if the value of the ShouldMarkJobAsFaulted argument is True². The default value of this argument in the REFramework is True, unless it is changed in the Config.xlsx file or in the Orchestrator assets³.

Option A is incorrect, because the job is not Successful, as an error occurred during the Initialization state.

Option C is incorrect, because the job is not Suspended, as the process did not pause or wait for any user input.
Option D is incorrect, because the job is not Stopped, as the process did not encounter any user intervention or manual termination.

NEW QUESTION # 74

What do the percentages from the Test Explorer panel represent?

- A. Correctness of the code percent.
- B. Percent of test data run.
- C. Passing percent.
- D. Coverage percent.

Answer: C

Explanation:

The percentages from the Test Explorer panel represent the passing percent of the test cases that are executed.

The Test Explorer panel shows the status of each test case, the total number of test cases, the number of passed test cases, the number of failed test cases, and the passing percent. The passing percent is calculated by dividing the number of passed test cases by the total number of test cases and multiplying by 100. For example, if there are 10 test cases and 8 of them pass, the passing percent is 80%. References: Test Explorer

NEW QUESTION # 75

A developer needs to create a repetitive process in the REFramework. Following the best practices, which action(s) should be performed to defend against potential robot crashes such as "out of memory"?

- A. Build a script that compares current CPU usage values to a threshold and clears data as needed.
- B. After every transaction, clear the transaction data, close the applications, and re-open the applications.
- C. Add a "Clear Collection" activity at the beginning of the Process.xaml workflow.
- D. All "Invoke Workflow File" activities from the Main.xaml file should be marked with the Isolated option.

Answer: D

NEW QUESTION # 76

In order for a developer to utilize the default REFramework without relying on Orchestrator queues, what is the essential prerequisite to ensure that the project does not interact with Orchestrator?

- A. Remove the Get Transaction Data state from the Main state machine. Remove the OrchestratorQueueName setting from

Config.xlsx & change the variable type.

- B. Exclude the Get Transaction Item activity from the project. Eliminate the three SetTransactionStatus activities from the SetTransactionStatus workflow & change the variable type.
- C. Eliminate the Get Transaction Data state from the Main state machine. Exclude the Get Transaction Item activity from the project & change the variable type.
- D. Omit the OrchestratorQueueName setting from the Config.xlsx file. Exclude the three SetTransactionStatus activities from the SetTransactionStatus workflow & change the variable type.

Answer: B

NEW QUESTION # 77

.....

Some candidates may purchase our UiPath-ADPv1 software test simulator for their companies. They will ask us how many personal computers our soft version can be install. In fact we have no limit for computer quantity. So if you purchase our UiPath-ADPv1 software test simulator, it supports multi-users at the same time. It can be installed on computers without any limits. If you are a training school, it is suitable for your teachers to present and explain casually. Good UiPath-ADPv1 software test simulator have high passing rate and TestBraindump are looking forward to your long-term cooperation.
