Everyone has their roles in society, and they are busy with their jobs and family. So the time and energy are very precious for the preparation of UiPath-TAEPv1 actual test. While, now you are lucky. UiPath-TAEPv1 cert guide will give you some instructions and help you do study plan for your coming test. If you are a fresh men in this industry, do not worry, UiPath UiPath-TAEPv1 PDF training will help you. The questions and knowledge points are very simple and easy to get. You can download the UiPath-TAEPv1 test engine and install it on your phone. When you take the subway, you can open it and do test practice. To take full use of the spare time by UiPath-TAEPv1 test engine, you will enjoy a high efficiency study experience.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• CI • CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI • CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.
Topic 2	• UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.
Topic 3	• UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.

Topic 4	• UiPath Studio - Testing Panels and Templates: This section of the exam measures the skills of RPA Developers and focuses on how to work with testing panels in UiPath Studio. It includes how to create, import, and manage test cases, along with the use of Test Explorer for analyzing test outcomes. It also covers Descriptor and Activity Coverage panels used for examining object recognition and checking redundancy in test cases. The section further explains testing project templates, the Test Automation Framework, and how to customize execution and test case templates.
Topic 5	• UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 6	• UiPath Robot: This section of the exam measures the skills of RPA Developers and explains the role of testing robots and their connectivity with UiPath Orchestrator. It discusses the execution of test cases using both on-premises and cloud-based robots and highlights how different robot types support automation testing in a scalable environment.
Topic 7	• UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:

No one can beat us in terms of UiPath UiPath-TAEPv1 exam prices. Download the UiPath UiPath-TAEPv1 exam dumps after paying discounted prices and start this journey. You can study UiPath-TAEPv1 Exam Engine anytime and anyplace for the convenience our three versions of our UiPath-TAEPv1 study questions bring.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q84-Q89):

NEW QUESTION # 84

According to best practices how can reusability be increased between individual test projects?

- A. Code reusability should not be a consideration when creating test projects.
- **B. Try to use libraries and object repository, whenever possible.**
- C. Try to use the project code base entirely independent of others.
- D. Try to reuse workflows as much as possible between projects.

Answer: B

Explanation:

According to best practices, reusability between individual test projects can be increased by using libraries and the Object Repository. These allow shared components and UI descriptors to be centrally maintained and reused across multiple projects, enhancing consistency and efficiency.

NEW QUESTION # 85

According to the troubleshooting Test Manager tips, what is one of the ways to resolve the following issue?

Test cases could not be executed since no executable versions could be found. Only test cases published with the latest package version to Orchestrator can be executed.

- A. Re-link the faulty test case to the test set.
- B. Duplicate the faulty test case within Studio.
- C. Unlink the automation in Test Manager.
- **D. Re-publish the project to Orchestrator.**

Answer: D

Explanation:

The warning message indicates that the test cases were not available in the latest published package version. To resolve this, you need to re-publish the project to Orchestrator to ensure all test cases are included and executable.

NEW QUESTION # 86

What happens once a Test Set execution starts in Test Manager?

- A. An empty test result, called a Test Case log, is created, but no test execution container is formed.
- B. A test execution container is created without a name, and an empty test result entry, called a test case log, is added for each Test Case.
- **C. A test execution container with the same name as the Test Set is created, and for each Test Case, an empty test result entry, called a test case log, is added.**
- D. A Test Case log is created for each executed Test Case, and an empty test result entry is added to an unnamed test execution container.

Answer: C

Explanation:

Once a Test Set execution starts in UiPath Test Manager, a test execution container with the same name as the Test Set is created. Additionally, for each Test Case in the Test Set, an empty test result entry, called a test case log, is added. This structure helps track the execution results for each individual test case under the overall test set.

NEW QUESTION # 87

What type of data sources can be used for a data-driven test that will be developed using UiPath Test Suite on Premises version?

- **A. File (Excel and CSV)**
Auto Generate
Existing data already Stored in the Test Data folder of the project
Test Data Queue
- B. File (Excel and CSV)
Auto Generate
Data Service
Existing data already Stored in the Test Data folder of the project
- C. File (Excel and CSV)
Auto Generate
Data Service
Test Data Queue
- D. File (Excel and CSV)
Data Service
Existing data already Stored in the Test Data folder of the project
Test Data Queue

Answer: A

Explanation:

In UiPath Test Suite On-Premises, supported data sources for data-driven tests include:
File (Excel and CSV)

Auto Generate

Existing data stored in the Test Data folder of the project

Test Data Queue

These options allow flexible management and variation of test inputs for automated testing.

NEW QUESTION # 88

Which type of local templates can be used when creating a new test case?

- A. Execution template, Workflow template, Test case template.
- B. Execution template, Workflow template, Script template.
- C. Execution template, Project template, Custom template.
- D. Test template, Project template, Workflow template.

Answer: A

Explanation:

When creating a new test case in UiPath, you can use local templates such as:

Execution template - defines how the test case is executed

Workflow template - provides reusable workflow logic

Test case template - serves as the base structure for new test cases

These templates help standardize and streamline test creation.

NEW QUESTION # 89

.....

In this way, the UiPath UiPath-TAEPv1 certified professionals can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives. To avail of all these benefits you need to pass the UiPath Test Automation Engineer Professional v1.0 (UiPath-TAEPv1) exam which is a difficult exam that demands firm commitment and complete UiPath UiPath-TAEPv1 exam questions preparation.
