After a long period of research and development, our Acquia-Certified-Site-Builder-D8 test questions have been the leader study materials in the field. We have taken our customers' suggestions of the Acquia-Certified-Site-Builder-D8 Exam Prep seriously, and according to these useful suggestions, we have tried our best to perfect the Acquia-Certified-Site-Builder-D8 reference guide from our company just in order to meet the need of these customers well. So stop hesitation and buy our study materials.

## Acquia Certified Site Builder - Drupal 8 Sample Questions (Q43-Q48):

### NEW QUESTION # 43

Your company website has a form "Contact Us/" through which users can submit questions or feedback to the company. This form uses the site-wide contact form that comes with Drupal 8. The News department within your company has requested their own contact form so that site visitors can specify additional information about a potential story. How can you build the News department their own contact form with an additional field, using only Drupal core modules?

- A. Update the existing contact form with a checkbox ("Send message to News team"): a "Story Information" field, and conditional fields to route the message accordingly
- B. This request is best handled with a contributed module such as Webform
- C. Under Structure > Contact Forms, add a new contact form with the News department's email address as the recipient, and a new field: "Story information."
- D. Under Structure > Contact Forms, add the News department's email address to the recipients of the existing contact form, and a new field "Story information "

**Answer: C**

### NEW QUESTION # 44

Your site review team reports that the new Product pages look good, but takes a long time to load. What are two possible causes? Choose 2 answers

- A. Internal Dynamic Page Cache is installed, but the reviewers are testing while logged in
- B. The permission "View cached pages" is not set for Anonymous users.
- C. The Performance setting for Caching is set to "no caching."
- D. images are being loaded without using Image styles to load correctly sized versions

**Answer: B,D**

### NEW QUESTION # 45

You've been asked to add several new fields and a view for the news area of a site with a very busy comments section. The QA team wants to review your work in staging before rolling everything out to production all at once.

How can you meet these requirements without interfering with the production site's comment activity or having to create the new functionality independently in both environments?

- A. Create the fields and view in a fresh installation of Drupal core. Export the site configuration into your site's existing codebase, push the code to the staging environment, and import the site configuration there. Once QA is satisfied, repeat the process in production.
- B. Configuration created in the staging environment is automatically available to the production environment since they share a database
- C. Copy the production database into the staging environment. Create the fields and view there. Once QA is satisfied, copy the staging database into the production environment.
- D. Create the fields and view in a development copy of the site. Export the site configuration to code. Push that code to the staging environment and import the site configuration there. Once QA is satisfied, repeat the process in production.

**Answer: A**

### NEW QUESTION # 46

You are running a Drupal 8 site, and the Status report page shows two errors that there is a security update available for your version of Drupal, and that the trusted\_host\_patterns setting is not configured in settings.php. What are the next steps to solve these errors?

- A. Update Drupal core, using the "update settings" option
- B. Update Drupal core. This will fix both errors, since updating Drupal automatically updates settings.php
- C. Update Drupal core and configure the trusted\_host\_patterns setting in your settings.php file
- D. Update Drupal core and enable the Trusted Host Settings module.

**Answer: C**

## NEW QUESTION # 47

How can you set the default country and time zone for a Drupal site?

- A. Go to Appearance > Region and Language > Regional settings (admin/appearance/settings/regional) and fill Default country and Time zone
- B. Go to Configuration > Regional and language > Date and time formats (admin/config/regional/date-time) and fill Default country and Time zone.
- C. Go to Configuration > System > Basic site settings (admin/config/system/site-information) to change the Default country and Time zone
- D. Go to Configuration > Regional and language > Regional settings (admin/config/regional/settings) and fill Default country and Time zone

**Answer: C**

## NEW QUESTION # 48

.....
