When conducting a risk analysis, the BEST way to state the impact of an adverse event or circumstance is to express it as:

- A. Downtime estimate
- B. Cost-benefit ratio
- C. Frequency-of-occurrence graph
- D. Monetary value

Answer: D

Explanation:

The best way to express the impact of a risk in business terms is through monetary value. This allows decision-makers to understand the financial consequences of threats and justify investments in controls or mitigation strategies. Assigning a dollar value helps in prioritizing risks and performing cost-benefit analyses.

B (Cost-benefit ratio) is used in analysis, not direct impact expression.

C (Downtime estimate) is useful, but only a part of financial impact.
