On the other hand, you can finish practicing all the contents in our 220-1202 practice materials within 20 to 30 hours. What's more, during the whole year after purchasing, you will get the latest version of our study materials for free. You can see it is clear that there are only benefits for you to buy our 220-1202 learning guide, just have a try right!

## CompTIA A+ Certification Exam: Core 2 Sample Questions (Q111-Q116):

### NEW QUESTION # 111

An employee is trying to connect their company laptop to airport Wi-Fi. A pop-up with the airport logo appeared and was closed quickly. The internet does not work. What should a help desk technician suggest?

- A. Look for a wall socket with RJ45 and try to connect
- B. Contact the airport IT department
- **C. Reconnect to the network and read the pop-up carefully**
- D. Tell the employee that company policy prohibits connection to public Wi-Fi

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Public Wi-Fi networks often use captive portals, which require accepting terms or authenticating via the pop-up page before full access is granted. Closing it prematurely stops full connection.

From Travis Everett - All-in-One Exam Guide:

"Captive portals intercept the first HTTP request and present a login or acknowledgment screen. Without completing it, access is denied."

### NEW QUESTION # 112

A user wants to dispose of a failed hard drive in a way that ensures the data is unrecoverable. Which of the following is the best at-home method?

- A. Degaussing
- B. Low-level formatting
- **C. Shredding**
- D. Standard formatting
- E. Drilling

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Shredding physically destroys the platters, making data recovery virtually impossible. It's more effective and accessible than degaussing or low-level formatting.

From Quentin Docter - CompTIA A+ Complete Study Guide:

"Physical destruction methods like shredding are the most secure options for ensuring data on failed drives cannot be recovered."

### NEW QUESTION # 113

Why would a network engineering team provide a help desk technician with IP addresses for a wired network segment?

- A. The network allow list is set to a specific address.
- **B. DHCP is not enabled for this subnet.**
- C. Only specific DNS servers are allowed outbound.
- D. NAC servers only allow security updates to be installed.

**Answer: B**

Explanation:

When DHCP isn't enabled, static IPs must be assigned manually, so the engineering team provides the IP details.

From Travis Everett - All-in-One Exam Guide:

"If DHCP is unavailable, technicians need the static IP configuration to connect devices to the network."

#### NEW QUESTION # 114

An organization sees unauthorized apps installed and licensing prompts. What should the security team do?

- A. Implement stronger controls to block suspicious websites.
- B. Deploy an internal PKI to filter encrypted web traffic.
- C. Enable stricter UAC settings on Windows.
- **D. Remove users from the local admin group.**

**Answer: D**

Explanation:

Removing users from the local admin group prevents them from installing unauthorized software.

From Quentin Docter - Complete Study Guide:

"Local admin privileges allow users to install unauthorized apps. Removing them from this group restricts installations and helps prevent malware."

#### NEW QUESTION # 115

Which of the following is found in an MSDS sheet for a battery backup?

- A. Voltage specifications
- B. Installation instructions
- **C. Emergency procedures**
- D. Configuration steps

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

An MSDS (Material Safety Data Sheet), now commonly referred to as SDS (Safety Data Sheet), is a document that provides detailed information on the properties of a particular substance. It includes safety guidelines and emergency procedures related to handling, exposure, fire hazards, and first aid—not installation or configuration instructions.

For a battery backup (UPS device), the MSDS would include emergency procedures such as what to do in case of a chemical spill, exposure to battery acid, or fire hazard due to overheating or chemical leakage. This ensures the safety of personnel and complies with hazardous materials handling regulations.

Reference:

CompTIA A+ 220-1102 Objective 4.1: Given a scenario, implement best practices associated with documentation and support systems information management.

Study Guide Section: MSDS/SDS usage and safety documentation

#### NEW QUESTION # 116

.....
