Answer Area

Statements	Yes	No
A relationship must be created between the CustomerID column in the Customer Details worksheet and the CustomerID column in the Orders table.	○	●
The Data Type of the columns in the relationship between the Customer Details worksheet and the Orders table must be set to **Text**.	●	○
The Region field used to filter the Top Customers report must come from the Orders table.	○	●

Explanation:
According to the sample data the CustomerID in Customer Details is a number (1 through 10 is shown in the example data) and the CustomerID in the Orders table has an example value of VINET, which looks like it corresponds to the value of CustomerCRMID instead of CustomerID from the Customer Details worksheet so the first answer should be No. The second answer should be Yes, the CustomerID from Orders has example value VINET, which is text.
