The Best CS0-003 New Study Questions and First-Grade CS0-003 Real Dump & Trusted CompTIA Cybersecurity Analyst (CySA+) Certification Exam Test Valid

With the development of scientific and technological progress computer in our life play an increasingly important role. The job positions relating to internet are hot. Our CS0-003 test dumps files help people who have dreams of entering this field and make a great achievement. IT technology skills are universal, once you get a CompTIA certification (CS0-003 Test Dumps files), you can have an outstanding advantage while applying for a job no matter where you are.

CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample

Questions (Q38-Q43):

NEW QUESTION # 38
Which of the following best describes the goal of a tabletop exercise?

- A. To understand existing threat actors and how to replicate their techniques
- B. To perform attack exercises to check response effectiveness
- C. To check the effectiveness of the business continuity plan
- D. To test possible incident scenarios and how to react properly

Answer: D

Explanation:
A tabletop exercise is a type of simulation exercise that involves testing possible incident scenarios and how to react properly, without actually performing any actions or using any resources. A tabletop exercise is usually conducted by a facilitator who presents a realistic scenario to a group of participants, such as a cyberattack, a natural disaster, or a data breach. The participants then discuss and evaluate their roles, responsibilities, plans, procedures, and policies for responding to the incident, as well as the potential impacts and outcomes. A tabletop exercise can help identify strengths and weaknesses in the incident response plan, improve communication and coordination among the stakeholders, raise awareness and preparedness for potential incidents, and provide feedback and recommendations for improvement.

NEW QUESTION # 39
After identifying a threat, a company has decided to implement a patch management program to remediate vulnerabilities. Which of the following risk management principles is the company exercising?

- A. Transfer
- B. Accept
- C. Avoid
- D. Mitigate

Answer: D

Explanation:
Mitigate is the best term to describe the risk management principle that the company is exercising, as it means to reduce the likelihood or impact of a risk. By implementing a patch management program to remediate vulnerabilities, the company is mitigating the threat of cyberattacks that could exploit those vulnerabilities and compromise the security or functionality of the systems. The other terms are not as accurate as mitigate, as they describe different risk management principles. Transfer means to shift the responsibility or burden of a risk to another party, such as an insurer or a contractor. Accept means to acknowledge the existence of a risk and decide not to take any action to reduce it, usually because the risk is low or the cost of mitigation is too high. Avoid means to eliminate the possibility of a risk by changing the plans or activities that could cause it, such as cancelling a project or discontinuing a service.

NEW QUESTION # 40
A security analyst observed the following activities in chronological order:
1. Protocol violation alerts on external firewall
2. Unauthorized internal scanning activity
3. Changes in outbound network performance
Which of the following best describes the goal of the threat actor?

- A. Data exfiltration
- B. Rogue devices
- C. Irregular peer-to-peer communication
- D. Unusual traffic spikes

Answer: A

NEW QUESTION # 41

An organization was compromised, and the usernames and passwords of all em-ployees were leaked online. Which of the following best describes the remedia-tion that could reduce the impact of this situation?

- A. Multifactor authentication
- B. Password changes
- C. Password encryption
- D. System hardening

Answer: A

Explanation:
Multifactor authentication (MFA) is a security method that requires users to provide two or more pieces of evidence to verify their identity, such as a password, a PIN, a fingerprint, or a one-time code. MFA can reduce the impact of a credential leak because even if the attackers have the usernames and passwords of the employees, they would still need another factor to access the organization's systems and resources. Password changes, system hardening, and password encryption are also good security practices, but they do not address the immediate threat of compromised credentials.

NEW QUESTION # 42
An older CVE with a vulnerability score of 7.1 was elevated to a score of 9.8 due to a widely available exploit being used to deliver ransomware. Which of the following factors would an analyst most likely communicate as the reason for this escalation?

- A. CVSS
- B. Asset value
- C. Weaponization
- D. Scope

Answer: C

Explanation:
Weaponization is a factor that describes how an adversary develops or acquires an exploit or payload that can take advantage of a vulnerability and deliver a malicious effect. Weaponization can increase the severity or impact of a vulnerability, as it makes it easier or more likely for an attacker to exploit it successfully and cause damage or harm. Weaponization can also indicate the level of sophistication or motivation of an attacker, as well as the availability or popularity of an exploit or payload in the cyber threat landscape. In this case, an older CVE with a vulnerability score of 7.1 was elevated to a score of 9.8 due to a widely available exploit being used to deliver ransomware. This indicates that weaponization was the reason for this escalation.

NEW QUESTION # 43
.....

Do you long to get the CS0-003 certification to improve your life? Are you worried about how to choose the learning product that is suitable for you? If your answer is yes, we are willing to tell you that you are a lucky dog, because you meet us, it is very easy for us to help you solve your problem. Our CS0-003 exam torrent is compiled by professional experts that keep pace with contemporary talent development and makes every learner fit in the needs of the society. If you choose our study materials, you will pass exam successful in a short time. There is no doubt that our CS0-003 Exam Question can be your first choice for your relevant knowledge accumulation and ability enhancement.
