

# The Importance of NBRC RPFT Exam Success for Future NBRC Growth with ExamCost

P.S. Free 2025 NBRC RPFT dumps are available on Google Drive shared by ExamCost: <https://drive.google.com/open?id=1v7ESG5Z3FQBmMApqA7wh8msK5AwBz1fl>

NBRC RPFT practice exam support team cooperates with users to tie up any issues with the correct equipment. If NBRC RPFT certification exam material changes, ExamCost also issues updates free of charge for 1 year following the purchase of our RPFT Exam Questions.

The RPFT exam is a rigorous certification exam that measures the skills and knowledge necessary to perform advanced pulmonary function testing and interpretation. RPFT certification is widely recognized as a mark of excellence in the respiratory therapy field, and it can help respiratory therapists advance their careers. If you are an advanced pulmonary function technologist looking to demonstrate your knowledge and skills in this area, consider taking the RPFT exam.

NBRC RPFT (Registry Examination for Advanced Pulmonary Function Technologists) Certification Exam is a professional certification program designed for individuals who are interested in pursuing a career in the field of pulmonary function technology. Registry Examination for Advanced Pulmonary Function Technologists certification exam is administered by the National Board for Respiratory Care (NBRC) and is recognized by employers across the United States as a standard of excellence in this field.

The RPFT Exam consists of 160 multiple-choice questions and is divided into two sections. The first section covers patient assessment, which includes topics such as patient history, physical examination, and diagnostic testing. The second section covers pulmonary function testing, which includes topics such as spirometry, lung volumes, diffusing capacity, and bronchial provocation testing.

- A. Oscillation
- B. Interrupter

- C. Quiet breathing with body plethysmography
- D. Panting with body plethysmography

Answer: D

Explanation:

Explanation

#### NEW QUESTION # 17

The following blood gas report is questioned by the attending physician:

|                               |            |
|-------------------------------|------------|
| pH                            | 7.43       |
| PaCO <sub>2</sub>             | 30 torr    |
| PaO <sub>2</sub>              | 92 torr    |
| HCO <sub>3</sub> <sup>-</sup> | 19 mEq/L   |
| BE                            | +3.5 mEq/L |

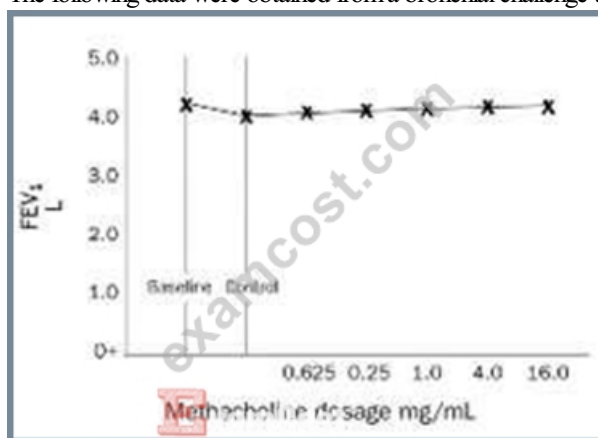

Which of the following values is INCONSISTENT?

- A. HCO<sub>3</sub>
- B. PaCO<sub>2</sub>
- C. pH
- D. BE

Answer: D

#### NEW QUESTION # 18

The following data were obtained from a bronchial challenge test:

APC20 of 2 mg/mL was obtained the next day in another laboratory. Which of the following is the most likely explanation for these data?

- A. The patient's effort was inconsistent.
- B. The spirometer accuracy drifted during the test.
- C. Incorrect doses of methacholine were administered.
- D. The two test results are within day-to-day variability.

Answer: B

#### NEW QUESTION # 19

The following arterial blood gas results are obtained during the final workload of a cardiopulmonary exercise test:

|                               |            |
|-------------------------------|------------|
| pH                            | 7.31       |
| PaCO <sub>2</sub>             | 33 torr    |
| PaO <sub>2</sub>              | 93 torr    |
| HCO <sub>3</sub> <sup>-</sup> | 16.1 mEq/L |
| SaO <sub>2</sub>              | 97%        |
| Hb                            | 15.6 g/dL  |

Which of the following best explains these results?

- A. There is air contamination since the PaCO<sub>2</sub> is so low.
- **B. Blood gas results are normal for someone at end-exercise.**
- C. The test indicates a right-to-left shunt.
- D. IV solution has contaminated the blood sample.

**Answer: B**

#### NEW QUESTION # 20

The following results are obtained from an adult male:

|                              |                        |
|------------------------------|------------------------|
| Uncorrected D <sub>LCO</sub> | 32 mL/min/mm Hg (STPD) |
| Hb                           | 14.6 gm/dL             |
| COHb                         | 1.2%                   |
| Alveolar volume              | 3500 mL                |

The corrected DL<sub>co</sub> value

- A. is lower.
- B. is higher.
- **C. is unchanged.**
- D. cannot be calculated.

**Answer: C**
