

The Open Group OGA-031 ArchiMate 3 Part 1 Exam Dumps - Easy To Prepare Exam [2025]

What's more, part of that VCE4Plus OGA-031 dumps now are free: <https://drive.google.com/open?id=1Mdhwj7jyEXqBNINv-qVZVv4r6B9J617>

Your success is guaranteed if you choose our OGA-031 training guide to prepare for your coming exam! The questions and answers format of our OGA-031 exam braindumps is rich with the most accurate information and knowledge which are collected by our professional experts who have been in this career for over ten years. What is more, our OGA-031 Study Guide also provides you the latest simulating exam to enhance your exam skills. So with our OGA-031 learning questions, your success is guaranteed!

The ArchiMate 3 modeling language is a widely adopted standard for Enterprise Architecture modeling. It provides a clear and concise way to describe the structure and behavior of an enterprise, and is used by organizations around the world to design, analyze, and communicate their enterprise architecture. The Open Group OGA-031 (ArchiMate 3 Part 1) Certification Exam is designed to test the candidate's ability to use ArchiMate 3 to describe and analyze enterprise architecture.

The Open Group OGA-031 (ArchiMate 3 Part 1) Exam is a certification exam designed for professionals who work in the field of enterprise architecture. Enterprise architecture is the practice of designing and managing the structure and operations of an organization's information technology systems, networks, and applications. ArchiMate is a modeling language used to describe and visualize enterprise architectures.

Latest OGA-031 Exam Questions form the Most Valid Preparation Brain Dumps - VCE4Plus

As you can find on the website, there are three versions of OGA-031 study materials that are also very useful for reading: the PDF, Software and APP online. For example, you can use the APP version of OGA-031 real exam in a web-free environment. Of course, the premise is that you have used it once before in a networked environment. This will save you a lot of traffic. This advantage of OGA-031 Study Materials allows you to effectively use all your fragmentation time.

The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q79-Q84):

NEW QUESTION # 79

Consider the following diagram:

What correctly describes this diagram?

- A. Technology process A aggregates four technology services. The Administrate Replication service is broken down into three other services.
- B. Four technology functions realize technology function A. The first function Administrate Replication triggers the other three functions in parallel.
- C. Technology function A is composed of four technology processes. The technology process Administrate Replication reads information from the three other processes.
- D. Technology function A is composed of four technology functions. Information flows from Administrate Replication to the other functions.

Answer: D

Explanation:

Based on the ArchiMate 3 documents or objectives, a technology function represents a collection of technology behavior that can be performed by a node. The diagram uses a composition relationship to indicate that technology function A consists of four other technology functions. The notation for a composition relationship is a solid line with a filled diamond at the end that points to the whole element. The diagram also uses an information flow relationship to indicate that information is exchanged from Administrate Replication to the other functions. The notation for an information flow relationship is a dashed line with an open arrowhead at the end that points to the direction of the flow.

NEW QUESTION # 80

Consider the following diagram:

What correctly describes the elements E, F and I?

- A. The two communication networks E and I together realize a path F.
- B. Communication network E passes data from server B through the path F to communication network I
- C. Technology collaboration F aggregates the two communication networks E and I.
- D. Users on servers B and D trigger data from communication network E to I through path F.

Answer: B

Explanation:

Based on the ArchiMate 3 documents or objectives, a communication network represents a set of structures that connects devices or system software for transmission, routing, and reception of data. A path models the relation between two or more technology internal active structure elements, through which these can exchange information. The diagram uses a flow relationship to indicate that data flows from server B to communication network E, then through path F to communication network I. The notation for a flow relationship is a dashed line with an open arrowhead at the end that points to the direction of the flow.

References: ArchiMate 3.2 Specification, Chapter 11 Technology Layer, Section 11.2 Active Structure Elements 1; ArchiMate 3.2 Specification, Chapter 5 Relationships, Section 5.4 Dynamic Relationships 1; ArchiMate communication network 2.

NEW QUESTION # 81

Consider the following symbol, which represents information about a transformation project.

What concept does this symbol represent?

- A. A principle
- B. A goal
- C. A requirement
- D. A constraint

Answer: A

Explanation:

According to the ArchiMate 3.2 Specification¹, a principle defines a general property that applies to any system in a certain context. A principle is a normative property of all systems in a given context that expresses a fundamental value or property¹. Therefore, the correct answer is A. A principle.

NEW QUESTION # 82

Consider the diagram showing a Claim Assessment and a Claim Settlement together with a relationship between them labeled "decision." What type of relationship is "decision"?

- A. Influence
- B. Access
- C. Trigger
- D. Flow

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The Trigger relationship in ArchiMate models causality between behaviors. It represents a cause-effect relationship where one behavior initiates or enables another behavior to occur.

Understanding the Diagram:

- * The Claim Assessment activity leads to trigger the Claim Settlement activity.

- * The relationship is labeled "decision," implying that the completion of Claim Assessment determines whether a Claim Settlement process should be initiated.

- * In ArchiMate 3.2, a Trigger relationship is represented with a dashed arrow (#) as seen in the diagram.

Analysis of Answer Choices:

#A. Flow ## Incorrect

- * Flow relationships represent the transfer of information, data, or resources rather than a causal effect.

- * ArchiMate 3.2 Specification, Section 6.4.4, states that a Flow relationship is about communication or material flow, which is not the case here.

#B. Influence ## Incorrect

- * Influence relationships indicate that one element affects another in a non-deterministic way (e.g., policies, motivations, or strategies).

- * ArchiMate 3.2 Specification, Section 6.4.5, states that Influence does not necessarily imply direct causation.

- * Since "decision" suggests a clear causal dependency, Trigger is the better choice.

#C. Trigger ## Correct Answer

- * Trigger relationships explicitly show that one behavior initiates or causes another behavior.

- * ArchiMate 3.2 Specification, Section 6.4.3, states that a Trigger relationship models a causal dependency between two behaviors.

- * A Claim Assessment leading to a Claim Settlement fits this pattern perfectly.

#D. Access ## Incorrect

- * Access relationships describe how a behavioral element reads, writes, or manipulates an object (e.g., data access).

- * ArchiMate 3.2 Specification, Section 6.4.7, states that Access is used for information retrieval or modification, which is not relevant here.

#C. Trigger References:

- * ArchiMate 3.2 Specification: Sections 6.4.3 (Trigger), 6.4.4 (Flow), 6.4.5 (Influence), and 6.4.7 (Access).

- * Archi User Guide: Behavioral relationships and dependency modeling.

NEW QUESTION # 83

What aspect in the ArchiMate Core Framework represents elements such as business roles, and system software?

- A. Active structure
- B. Passive structure
- C. Behavior
- D. Motivation

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation: The Active Structure aspect of the ArchiMate Core Framework represents elements that perform behavior, such as business roles (e.g., employees, partners) and system software (e.g., databases, middleware). Active structure elements are responsible for actions in an enterprise. The ArchiMate 3.2 Specification states that business roles and system software are part of the Active Structure aspect.

NEW QUESTION # 84

.....

We try our best to provide the most efficient and intuitive learning methods to the learners and help them learn efficiently. Our OGA-031 exam reference provides the instances to the clients so as to they can understand them intuitively. Based on the consideration that there are the instances to our OGA-031 test guide to concretely demonstrate the knowledge points. Through the stimulation of the Real OGA-031 Exam the clients can have an understanding of the mastery degrees of our OGA-031 exam practice question in practice. Thus our clients can understand the abstract concepts in an intuitive way.
