It will make them scrutinize how our formats work and what we offer them, for example, the form and pattern of The Open Group OGA-031 Exam Dumps, and their relevant and updated answers. It is convenient for our consumers to check PassSureExam The Open Group OGA-031 exam questions free of charge before purchasing the ArchiMate 3 Part 1 Exam practice exam.

## The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q42-Q47):

### NEW QUESTION # 42

Complete the sentence. The different layers of Enterprise Architectures that can be modeled with the ArchiMate language include Business, Application, and

- A. Technology
- B. Information
- C. Data
- D. Strategy

**Answer: A**

Explanation:

According to the ArchiMate 3.2 Specification<sup>1</sup>, the ArchiMate core language defines a structure of generic elements and their

relationships, which can be specialized in different layers. Three layers are defined within the ArchiMate core language as follows:  
The Business Layer depicts business services offered to customers, which are realized in the organization by business processes performed by business actors and roles.

The Application Layer depicts application services that support the business, and the applications that realize them.

The Technology Layer comprises both information and operational technology. You can model, for example, processing, storage, and communication technology in support of the application world and Business Layers, and model operational or physical technology with facilities, physical equipment, materials, and distribution networks.

#### NEW QUESTION # 43

What are external active structure elements also called?

- A. Resources
- **B. Interfaces**
- C. Services
- D. Capabilities

**Answer: B**

Explanation:

According to the ArchiMate 3.2 Specification<sup>1</sup>, external active structure elements are also called interfaces. An interface represents a point of access where one or more services are offered by an active structure element to its environment<sup>1</sup>. Therefore, the correct answer is B. Interfaces.

#### NEW QUESTION # 44

A Risk Assessment service provided by a Risk Measurement application enables actuaries to assess and mitigate financial risks as part of the Enterprise Risk Management process

Which combination of relationships, when added to this diagram, would best represent this situation?

- A. 1. Realization and 2. Realization
- **B. 1. Realization and 2. Serving**
- C. 1. Serving and 2. Realization
- D. 1. Realization and 2. Assignment

**Answer: B**

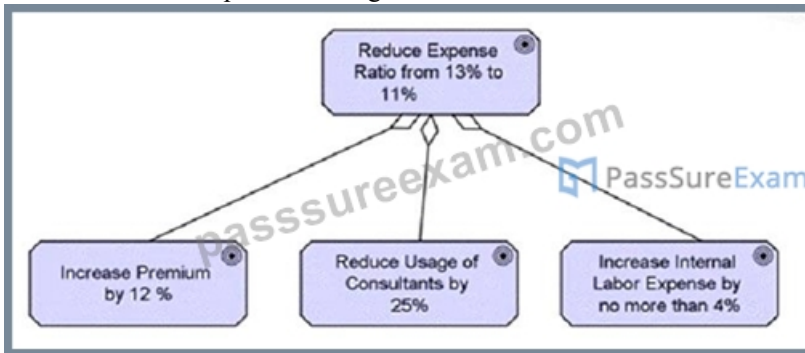

Explanation:

Based on the ArchiMate 3 documents or objectives, a realization relationship indicates that an entity plays a critical role in the creation, achievement, sustenance, or operation of a more abstract entity. A serving relationship models that an element provides its functionality to another element. The diagram should use a realization relationship from the Risk Assessment service to the Enterprise Risk Management process to indicate that the service realizes the process. The diagram should also use a serving relationship from the Risk Measurement application to the Risk Assessment service to indicate that the application serves the service.

References: ArchiMate 3.2 Specification, Chapter 5 Relationships, Section 5.1 Structural Relationships 1; ArchiMate 3.2 Specification, Chapter 5 Relationships, Section 5.2 Dependency Relationships 1; ArchiMate Notation: Part 8 - Relationships - ArchiMate Resources for FREE 2.

#### NEW QUESTION # 45

What is the best description of the diagram?

- A. The goal 'Reduce Expense Ratio from 13% to 11%' will be achieved if at least one of the other three goals is achieved
- B. The goal 'Reduce Expense Ratio from 13% to 11%' must be achieved before any of the other three goals is achieved-
- C. The goal 'Reduce Expense Ratio from 13% to 11%' is decomposed into three other goals.
- D. The goal 'Reduce Expense Ratio from 13% to 11%' is similar to the three other goals.

**Answer: C**

Explanation:

The diagram uses the ArchiMate notation for a goal element and an aggregation relationship. A goal element represents an end state that a stakeholder intends to achieve. An aggregation relationship indicates that a whole is composed of parts. In this case, the goal 'Reduce Expense Ratio from 13% to 11%' is composed of three sub-goals that contribute to its achievement.

References: ArchiMate 3.2 Specification, Chapter 10: Motivation Elements, Section 10.1 Goal; Chapter 5: Relationships, Section 5.2 Aggregation.

#### NEW QUESTION # 46

What are external active structure elements also called?

- A. Resources
- B. Interfaces
- C. Services
- D. Capabilities

**Answer: B**

Explanation:

According to the ArchiMate 3.2 Specification<sup>1</sup>, external active structure elements are also called interfaces. An interface represents a point of access where one or more services are offered by an active structure element to its environment<sup>1</sup>. Therefore, the correct answer is B. Interfaces.

#### NEW QUESTION # 47

.....

Who don't want to be more successful and lead a better life? But it's not easy to become better. Our OGA-031 exam questions can give you some help. After using our OGA-031 study materials, you can pass the exam faster and you can also prove your strength.
