Valid Test OGBA-101 Format - OGBA-101 Vce Free

Managing time during the The Open Group OGBA-101 exam is a challenging task. Most candidates cannot manage their time during the The Open Group OGBA-101 exam, leave the questions, and fail. Time management skills can help students gain excellent marks in the OGBA-101 Exam. The Open Group OGBA-101 practice exam on the software help you identify which kind of OGBA-101 questions are more time-consuming, and they would be able to assess their efficiency in answering questions.

The Open Group OGBA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	Enterprise Architecture and the TOGAF Standard: In this topic of the OGBA-101 exam, TOGAF business architects learn about the contents of the TOGAF framework, the TOGAF Architecture Development Method (ADM), and the TOGAF Library.
Topic 2	TOGAF ADM: This topic of the OGBA-101 exam gives TOGAF business architects an introduction to the TOGAF ADM, its objectives, and usage.

Topic 3	• Introduction to TOGAF Business Architecture Foundation: This topic gives aspiring TOGAF business architects basic knowledge about the Business Architecture Foundation.
Topic 4	• Key Terminologies: The focal point of this TOGAF Business Architecture Foundation exam topic is about key terminologies of the Business Architecture.
Topic 5	• Development of a Business Architecture: This topic explains how a Business Architecture is developed with the TOGAF ADM.

The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q129-Q134):

NEW QUESTION # 129

In what TOGAF ADM phase is the information map linked to other business blueprints?

- A. Phase E
- **B. Phase B**
- C. Phase A
- D. Preliminary Phase

Answer: B

Explanation:

In the TOGAF ADM (Architecture Development Method), Phase B is the Business Architecture phase.

During this phase, the information map, which represents the relationships and flow of information within the business, is linked to other business blueprints. This linkage is crucial to ensure that the business architecture is aligned with the data and information needs of the organization, providing a foundation for the development of subsequent architecture domains (Data, Application, and Technology Architectures).

NEW QUESTION # 130

What Is presented as striking a balance between positive and negative outcomes resulting from the realization of either opportunities or threats"?

- A. Transition Management
- B. Architecture Security
- **C. Risk Management**
- D. Agile development

Answer: C

Explanation:

Risk Management is the discipline that addresses the identification, assessment, and prioritization of risks followed by coordinated application of resources to minimize, control, and monitor the impact of unfortunate events or to maximize the realization of opportunities. It is about striking a balance between the positive outcomes of opportunities and the negative outcomes of risks, ensuring that the enterprise can achieve its objectives while keeping potential threats under control.

NEW QUESTION # 131

Consider the following representation of a business model:

Which of the following business models is this an example of?

- A. The Business Model Innovation factory
- **B. The Four Box Framework**
- C. The Business Model Cube

Answer: B

Explanation:

The provided representation of a business model appears to be a variant of the Business Model Canvas, which is a strategic management template for developing new or documenting existing business models. It is a visual chart with elements describing a firm's value proposition, infrastructure, customers, and finances. The model assists firms in aligning their activities by illustrating potential trade-offs. Since none of the options precisely match the Business Model Canvas and the Four Box Framework is conceptually closest to the Business Model Canvas, option B is the best available answer, albeit not a perfect match.

NEW QUESTION # 132

Consider the image showing basic architectural concepts:

What is an objective of the ADM Preliminary Phase?

- A. To obtain approval for the Statement of Architecture Work.
- **B. To select and implement tools to support the Architecture Capability.**
- C. To develop a vision of the business value to be delivered by the proposed enterprise architecture.
- D. To create the initial version of the Architecture Roadmap.

Answer: B

NEW QUESTION # 133

Which statement best describes iteration and the ADM?

- A. The level of detail is defined once and applies to all iterations.
- **B. The ADM is iterative, over the whole process, between phases, and within phases.**
- C. The ADM is iterative between phases B to D, and between Phases E and F.
- D. The ADM is sequential. Iteration is applied within phases.

Answer: B

Explanation:

TOGAF's ADM (Architecture Development Method) is designed to be iterative at multiple levels: over the whole process, between phases, and within phases. This iterative approach allows for continuous refinement and improvement of the architecture, ensuring it remains aligned with changing business needs and technological advancements. Iteration helps in managing complexity and facilitates incremental development, enabling architects to revisit and adjust their work as new information and insights emerge.

NEW QUESTION # 134

.....

Our OGBA-101 learning questions are always the latest and valid to our loyal customers. We believe this is a basic premise for a company to continue its long-term development. The user passes the OGBA-101 exam and our market opens. This is a win-win situation. Or, you can use your friend to find a user who has used our OGBA-101 Guide quiz. In fact, our OGBA-101 study materials are very popular among the candidates. And more and more candidates are introduced by their friends or classmates.
