The Open Group TOGAF Enterprise Architecture Part 1 Exam OGEA-101 Prüfungsfragen mit Lösungen (Q40-Q45):

40. Frage

Complete the sentence. The four purposes that typically frame the planning horizon, depth and breadth of an Architecture Project, and the contents of the EA Repository are Strategy, Portfolio,

- A. Project, and Solution Delivery.
- B. Discreet, and Cohesive.
- C. Subordinate, and Superior Architecture.
- **D. Segment, and End-to-end Target Architecture.**

Antwort: D

Begründung:

The planning horizon, depth, and breadth of an Architecture Project, along with the contents of the EA Repository, are typically framed by Strategy, Portfolio, Segment, and End-to-end Target Architecture. The 'Segment' refers to a part of the organization, typically addressed in a Segment Architecture, while 'End-to-end Target Architecture' encompasses the complete view of the planned architecture across the entire organization.

41. Frage

Consider the following statements.

1. All processes, decision-making, and mechanisms used will be established so as to minimize or avoid potential conflicts of interest.
2. More effective strategic decision-making will be made by C-Level executives and business leaders.

3. All actions implemented and their decision support will be available for inspection by authorized organization and provider parties.
 4. Digital Transformation and operations will be more effective and efficient.
- Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 1 & 3
- B. 2 & 3
- C. 2 & 4
- D. 1 & 4

Antwort: A

Begründung:

Statements 1 and 3 highlight the value and necessity for Architecture Governance to be adopted within organizations. Architecture Governance is the practice and orientation by which Enterprise Architectures and other architectures are managed and controlled at an enterprise-wide level². It ensures that architectural decisions are aligned with the organization's strategy, objectives, and standards. Architecture Governance also involves establishing and maintaining processes, decision-making, and mechanisms to avoid or minimize potential conflicts of interest, such as between different stakeholders, business units, or projects³⁴. Moreover, Architecture Governance requires transparency and accountability for all actions implemented and their decision support, so that they can be inspected and evaluated by authorized parties, such as auditors, regulators, or customers⁵. 42. Frage

Refer to the Exhibit.

Consider the image showing basic architectural concepts.
What are items A and B?

- A. A-Candidate Architecture, B-Trade-off
- B. A-Architecture Viewpoint, B-Architecture View
- C. A-Requirement, B-Candidate Architecture
- D. A-Architecture Board, B-Architecture Capability

Antwort: B

Begründung:

The image shows a diagram that illustrates the basic concepts of architecture description as defined by the ISO/IEC/IEEE 42010:2011 standard¹, which is also adopted by the TOGAF standard².

According to the ISO/IEC/IEEE 42010:2011 standard, an architecture description is a work product used to express an architecture, and it consists of one or more architecture views¹.

An architecture view is a representation of a system from the perspective of a related set of concerns, and it conforms to an architecture viewpoint¹.

An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns¹.

Therefore, the correct answer is option A, which identifies the items labeled as "A" and "B" in the image as an architecture viewpoint and an architecture view, respectively. Reference:

2: TOGAF Standard, Version 9.2 - Part IV: Architecture Content Framework - 31. Architectural Artifacts²

43. Frage

Which of the following best describes the need for the ADM process to be governed?

- A. To enable a fast response to market changes
- **B. To verify that the method is being applied correctly**
- C. To permit the architecture domains to be integrated
- D. To enable development of reference architectures

Antwort: B

Begründung:

According to the TOGAF standard, the need for the ADM process to be governed is to ensure that the architecture development and implementation activities are conducted in a consistent, coherent, and compliant manner¹. Governance provides the means to verify that the method is being applied correctly and effectively, and that the architecture deliverables and artifacts meet the quality and standards criteria¹. Governance also enables the management of risks, issues, changes, and dependencies that may arise during the ADM process¹.

Some of the benefits of governing the ADM process are²:

*Improved alignment of the architecture with the business strategy and objectives

*Enhanced stakeholder engagement and communication

*Increased reuse and integration of architecture assets and resources

*Reduced complexity and duplication of architecture efforts

*Increased agility and adaptability of the architecture to changing needs and requirements

*Improved compliance and auditability of the architecture outcomes and outputs

44. Frage

Consider the following statements:

1. Each contracted party is required to act responsibly to the organization and its stakeholders.
2. All decisions taken, processes used, and their implementation will not be allowed to create unfair advantage to any one particular party.
3. Digital Transformation and operations will be more effective and efficient.
4. Strategic decision-making by C-Level executives and business leaders will be more effective.

Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 1 & 4
- B. 3 & 4
- **C. 1 & 2**
- D. 2 & 3

Antwort: C

Begründung:

Architecture governance is the practice of ensuring compliance with the enterprise architecture and its principles, standards, and goals. Architecture governance provides the means to establish, monitor, and control the architecture development and implementation processes, and to resolve any issues or conflicts that may arise. Architecture governance also ensures that all stakeholders are represented and involved in the decision-making process, and that their interests and concerns are balanced and
