P.S. Free & New OGEA-103 dumps are available on Google Drive shared by Actual4Dumps: <https://drive.google.com/open?id=13zACAbHP71jASqDCntIcDtfT9ntugxfo>

Grasping different consumers' learning situation in a comprehensive way, the operation system of our OGEA-103 practice materials can adapt to different consumer groups. Facts speak louder than words. Through years' efforts, our OGEA-103 exam preparation has received mass favorable reviews because the 99% pass rate of our OGEA-103 Study Guide is the powerful proof of trust of the public. No other vendor can do this like us, we are the unique and best OGEA-103 learning prep provider!

The TOGAF Enterprise Architecture framework is a widely-recognized standard for enterprise architecture. It provides a common language and methodology for organizations to use in developing and managing their enterprise architecture. The framework is designed to be adaptable and can be customized to meet the specific needs of an organization. By achieving certification in the TOGAF framework, professionals can demonstrate their expertise in this widely-used standard.

The Open Group OGEA-103 certification exam is designed for professionals who want to demonstrate their expertise in enterprise architecture. OGEA-103 exam is a combination of Part 1 and Part 2 of the TOGAF Enterprise Architecture certification, which enables learners to demonstrate their knowledge and understanding of the framework. OGEA-103 Exam is designed for individuals who are working in IT, business, or enterprise architecture and are interested in gaining a deeper understanding of the TOGAF framework.

The Open Group OGEA-103 Exam is a highly sought-after certification for professionals who are looking to establish themselves in the field of Enterprise Architecture. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification is designed to test the knowledge and skills required to understand and apply the principles of Enterprise Architecture using the TOGAF framework. TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam certification exam is a combination of Part 1 and Part 2 of the TOGAF Enterprise Architecture certification.

Pass-Rate OGEA-103 Preparation & Passing OGEA-103 Exam is No More a Challenging Task

The price of Actual4Dumps The Open Group OGEA-103 updated exam dumps is affordable. You can try the free demo version of any The Open Group OGEA-103 exam dumps format before buying. For your satisfaction, Actual4Dumps gives you a free demo download facility. You can test the features and then place an order. So, these real and updated TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam (OGEA-103) dumps are essential to pass the OGEA-103 exam on the first try.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q99-Q104):

NEW QUESTION # 99

Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?

- A. To identify and understand business requirements
- B. To coordinate with the other management frameworks in use
- C. To describe how an architecture addresses stakeholder concerns
- D. To classify architecture and solution assets

Answer: D

Explanation:

The Enterprise Continuum consists of two complementary concepts: the Architecture Continuum and the Solutions Continuum¹. The Architecture Continuum provides a consistent way to describe and understand the generic and reusable architecture building blocks, such as models, patterns, and standards, that can be applied and tailored to specific situations². The Solutions Continuum provides a consistent way to describe and understand the specific and implemented solution building blocks, such as products, services, and components, that realize the architecture building blocks³. The Enterprise Continuum enables the reuse and integration of architecture and solution assets across different levels of abstraction, scope, and detail, ranging from foundation architectures to organization-specific architectures¹.

The Enterprise Continuum is used when developing an enterprise architecture to support the following activities¹:

*Selecting relevant architecture and solution assets from the Architecture Repository or other sources, based on the business drivers, goals, and requirements

*Adapting and customizing the architecture and solution assets to suit the specific needs and context of the enterprise

*Defining and developing the target architecture and the architecture roadmap, based on the gaps and opportunities identified between the baseline and the target states

*Defining and developing the implementation and migration plan, based on the architecture roadmap and the solution building blocks

*Governing and managing the architecture and solution assets throughout the architecture lifecycle, ensuring their quality, consistency, and compliance

NEW QUESTION # 100

Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.

1	General rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission
2	A set of quantitative statements that outline what an implementation project must do in order to comply with the architecture.
3	A document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle
4	The scope and approach that will be used to complete an architecture development cycle

Which deliverables match these descriptions?

- A. 1 Request for Architecture Work - 2 Statement of Architecture Work - 3 Architecture Principles - 4 Architecture Requirements Specification
- B. 1 Architecture Requirements Specification - 2 Request for Architecture Work - 3 Statement of Architecture Work - 4 Architecture Principles
- C. 1 Statement of Architecture Work - 2 Architecture Principles - 3 Architecture Requirements Specification - 4 Request for Architecture Work
- D. 1 Architecture Principles - 2 Architecture Requirements Specification - 3 Request for Architecture Work - 4 Statement of Architecture Work

Answer: A

Explanation:

Explanation

The Request for Architecture Work is a deliverable that is sent from the sponsor and triggers the start of an architecture development cycle. It defines the scope, budget, schedule, and deliverables for a specific architecture project. The Statement of Architecture Work is a deliverable that is produced by the architect and defines the approach and resources needed to complete an architecture project. It forms the basis of a contractual agreement between the sponsor and the architecture organization. The Architecture Principles are a deliverable that is produced by the architect and defines the general rules and guidelines for the architecture work. They reflect the business principles, business goals, and business drivers of the organization. The Architecture Requirements Specification is a deliverable that is produced by the architect and defines the requirements that govern the architecture work. It covers both functional and non-functional requirements as well as constraints and assumptions.

NEW QUESTION # 101

Complete the sentence The purpose of the Preliminary Phase is to _____.

- A. describe the target architecture
- B. define the enterprise strategy
- C. identify the stakeholders and their requirements
- D. architect an Enterprise Architecture Capability

Answer: D

Explanation:

The purpose of the Preliminary Phase is to architect an Enterprise Architecture Capability that meets the needs and expectations of the enterprise's stakeholders and supports and enables subsequent phases of architecture development and transition. This phase involves defining the scope, principles, framework, and governance for the Enterprise Architecture Capability. Reference: The TOGAF Standard | The Open Group Website, Section 3.2 Preliminary Phase.

NEW QUESTION # 102

Consider the following ADM phases objectives.

	Objective
1	Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision
2	Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals
3	Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture
4	Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns

Which phase does each objective match?

- A. 1A-2B-3C-4D
- **B. 1C-2B-3A-4C**
- C. 1C-2D-3B-4A
- D. 1B-2D-3A-4C

Answer: B

Explanation:

* The objectives listed in the question correspond to the objectives of different phases of the TOGAF ADM (Architecture Development Method), which is a method for developing and managing an enterprise architecture¹.

* The ADM consists of nine phases, each with a specific purpose and output. The phases are¹:

* Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

* Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

* Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

* Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

* Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

* Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

* Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

* Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

* Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

* Based on the above definitions, we can match each objective with the corresponding phase as follows:

* Objective 1: Develop the Target Data Architecture that enables the Business Architecture and the Architecture Vision. This objective is achieved in Phase C: Information Systems Architectures, where the data architecture is defined as a subset of the information systems architecture².

* Objective 2: Develop the Target Business Architecture that describes how the enterprise needs to operate to achieve the business goals. This objective is achieved in Phase B: Business Architecture, where the business architecture is defined as a subset of the enterprise architecture³.

* Objective 3: Develop a high-level aspirational vision of the capabilities and business value to be delivered as a result of the proposed Enterprise Architecture. This objective is achieved in Phase A: Architecture Vision, where the architecture vision is defined as a high-level description of the target architecture and its benefits⁴.

* Objective 4: Develop the Target Application Architecture that enables the Business Architecture and the Architecture Vision, in a way that addresses the Statement of Architecture Work and stakeholder concerns. This objective is achieved in Phase C: Information Systems Architectures, where the application architecture is defined as a subset of the information systems architecture².

References:

- * 2: The TOGAF Standard, Version 9.2, Chapter 9: Phase C: Information Systems Architectures
- * 3: The TOGAF Standard, Version 9.2, Chapter 8: Phase B: Business Architecture
- * 4: The TOGAF Standard, Version 9.2, Chapter 7: Phase A: Architecture Vision

NEW QUESTION # 103

Which of the following statements about architecture partitioning is correct?

- A. Partitions reflect the organization's structure.
- **B. Partitions are used to simplify the management of the Enterprise Architecture.**
- C. Partitions are defined and assigned to agile Enterprise Architecture teams.
- D. Partitions are equivalent to architecture levels.

Answer: B

Explanation:

Based on the web search results, architecture partitioning is a technique that divides the Enterprise Architecture into smaller and manageable segments or groups, based on various classification criteria, such as subject matter, time, maturity, volatility, etc.¹² Architecture partitioning is used to simplify the development and management of the Enterprise Architecture, by reducing complexity, improving governance, enhancing reusability, and increasing alignment and agility¹². Therefore, the statement that partitions are used to simplify the management of the Enterprise Architecture is correct.

The other statements are incorrect because:

*Partitions are not equivalent to architecture levels. Architecture levels are different layers of abstraction that describe the Enterprise Architecture from different perspectives, such as strategic, segment, and capability³.

Partitions are subsets of architectures that are defined within or across the levels, based on specific criteria¹.

*Partitions do not necessarily reflect the organization's structure. The organization's structure is one possible criterion for partitioning the architecture, but it is not the only one. Other criteria, such as business function, product, service, geography, etc., can also be used to partition the architecture¹².

*Partitions are not defined and assigned to agile Enterprise Architecture teams. Agile Enterprise Architecture is an approach that applies agile principles and practices to the architecture work, such as iterative development, frequent feedback, adaptive planning and continuous delivery⁴. Partitions are not a specific feature of agile Enterprise Architecture, but a general technique that can be applied to any architecture method or framework, including TOGAF¹².

NEW QUESTION # 104

.....

To get better condition of life, we all need impeccable credentials of different exams to prove individual's capacity. However, weak OGEA-103 practice materials may descend and impair your ability and flunk you in the real exam unfortunately. And the worst condition is all that work you have paid may go down the drain for those OGEA-103 question torrent lack commitments and resolves to help customers. The practice materials of the exam with low quality may complicate matters of the real practice exam. So, you must know about our OGEA-103 question torrent.
