The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q72-Q77):

NEW QUESTION # 72

Which of the following is guidance for creating value streams?

- A. Include operational levels of detail.
- B. Start with customer-based value streams.
- C. Identify the top-level value streams from components of capabilities.
- D. Create an initial set of value streams that map one-to-one to existing capabilities.

Answer: B

Explanation:

When creating value streams, it is recommended to start with customer-based value streams. Here's a detailed explanation:

* Value Streams:

* Definition: Value streams represent the end-to-end activities that create value for customers or stakeholders. They provide a high-level view of how value is delivered within the organization.

* Starting with Customer-Based Value Streams:

* Customer Focus: Starting with customer-based value streams ensures that the architecture is aligned with the needs and expectations of the customers. This approach helps in identifying the most critical value-creating activities and aligning them with business goals.

* Value Delivery: Customer-based value streams provide a clear understanding of how value is delivered from the customer's perspective. This helps in designing processes and capabilities that enhance customer satisfaction and business performance.

* TOGAF References:

* Phase B: Business Architecture: In this phase, value streams are identified and modeled to ensure that the architecture supports the delivery of value to customers. Starting with customer-based value streams is a key activity in this phase.

* Capability-Based Planning: TOGAF emphasizes the importance of aligning business capabilities with value streams to ensure that the architecture supports value creation and delivery.

* Benefits:

* Customer-Centric Design: Starting with customer-based value streams ensures that the architecture is designed with a focus on customer needs and value delivery.

* Strategic Alignment: Aligning value streams with customer needs helps in ensuring that the architecture supports the strategic goals of the organization and enhances customer satisfaction.

In summary, when creating value streams, starting with customer-based value streams ensures a customer-centric design, aligning the architecture with the needs and expectations of the customers and supporting strategic goals.

NEW QUESTION # 73

Consider the following modeling example, relating business capabilities to organization units so as to highlight duplication and redundancy:

	Organizational Units			
Business Capabilities	Human Resources	Real Estate	Information Technology	Sales and Marketing
Project Management		G	Y	
Learning Management	G		G	R

(Note in this example the cells colored green, yellow, and red, are also marked G, Y, and R, respectively) Which of the following best describes this technique?

- A. Gap Analysis
- B. Perspective Analysis
- C. Capability Mapping
- D. Relationship Mapping

Answer: D

Explanation:

The technique shown in the example is called relationship mapping. It is a technique that can be used to show how a business architecture addresses stakeholder concerns across different parts of an organization². It can highlight gaps or overlaps in the coverage of stakeholder concerns by a business architecture. In this case, the technique is used to relate business capabilities to organization units so as to highlight duplication and redundancy.

This modeling technique is referred to as Relationship Mapping. It's used to relate business capabilities to organizational units to highlight areas of duplication and redundancy, as well as to indicate where capabilities are being performed well (green), where there are potential issues (yellow), and where there are significant problems or gaps (red). This visualization helps in understanding the alignment between organizational units and capabilities, and where improvements or changes may be needed.

5.2.1 Capability/Organization Mapping https://pubs.opengroup.org/togaf-standard/business-architecture/business-capabilities.html#_Toc95135898

NEW QUESTION # 74

Consider the following statements;

1. A whole corporation or a division of a corporation
 2. A government agency or a single government department
 3. Partnerships and alliances of businesses working together, such as a consortium or supply chain
- What are those examples of according to the TOGAF Standard?

- A. Enterprises
- B. Architectures Scopes
- C. Organizations
- D. Business Units

Answer: A

Explanation:

According to the TOGAF Standard, an enterprise is defined as any collection of organizations that has a common set of goals and/or

a single bottom line¹. The examples given in the question are all types of enterprises that can be the subject of enterprise architecture¹.

NEW QUESTION # 75

In what TOGAF ADM phase should the architect locate existing architecture descriptions to create an information map?

- A. Phase B
- B. Phase E
- C. Phase A
- D. Preliminary Phase

Answer: A

Explanation:

In TOGAF ADM, Phase B is the Business Architecture phase where the architect should locate existing architecture descriptions to create an information map. This phase involves developing a detailed understanding of the business environment, including business processes, roles, and information flows.

Existing architecture descriptions provide a baseline for identifying how information is currently managed and how it can be optimized to support business objectives.

NEW QUESTION # 76

Consider the following statements:

A whole corporation or a division of a corporation

A government agency or a single government department

Partnerships and alliances of businesses working together, such as a consortium or supply chain What are those examples of according to the TOGAF Standard?

- A. Enterprises
- B. Architectures Scopes
- C. Organizations
- D. Business Units

Answer: A

Explanation:

The examples given (a whole corporation, a division of a corporation, a government agency, a single government department, partnerships, and alliances) are considered "Enterprises" according to the TOGAF Standard. Here's a detailed explanation:

* Definition of an Enterprise:

* Enterprise: According to TOGAF, an enterprise is any collection of organizations that share a common set of goals. It can be a whole corporation, a division of a corporation, a government agency, or a consortium of businesses.

* Examples of Enterprises:

* Corporation or Division: An enterprise can be a whole corporation or just a division within a larger organization.

* Government Entities: It includes government agencies or individual departments within the government.

* Partnerships and Alliances: Enterprises can also be partnerships and alliances of businesses, such as consortia or supply chains.

* TOGAF References:

* Scope of Enterprise Architecture: TOGAF defines enterprise architecture as encompassing the entire scope of the enterprise, including all its sub-units and external partnerships.

* Enterprise Continuum: TOGAF's Enterprise Continuum provides a framework for understanding and organizing the artifacts that make up the enterprise architecture.

In summary, the examples provided are considered "Enterprises" according to the TOGAF Standard, as they represent collections of organizations with shared goals.

NEW QUESTION # 77

.....
