Desktop and Web-Based Practice Exams to Evaluate Chrome-Enterprise-Administrator Exam Preparation

Begin Your Preparation with Google Chrome-Enterprise-Administrator Real Questions. The ExamsLabs is a reliable platform that is committed to making your preparation for the Google Chrome-Enterprise-Administrator examination easier and more effective. To meet this objective, the ExamsLabs is offering updated and real Understanding Professional Chrome Enterprise Administrator Certification Exam exam dumps. These Google Chrome-Enterprise-Administrator Exam Questions are approved by experts.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q28-Q33):

NEW QUESTION # 28

An administrator is using Organizational Units (OU) to apply different Chrome browser settings to different types of devices. The administrator needs to ensure that the browsers are placed in the correct OU. Which token must the administrator generate and apply?

- A. Enrollment Token
- B. Cloud Management Token
- C. Device Management Token
- D. Browser Policy Token

Answer: A

Explanation:

The ****Enrollment Token**** is the key to associating a Chrome browser instance with a specific organizational unit (OU) in the Google Admin console during the enrollment process. By applying the correct enrollment token during setup, the browser will be placed in the designated OU and inherit the policies configured for that OU. Device Management Tokens are more relevant for ChromeOS devices. Browser Policy Tokens are not a standard term for OU assignment during enrollment. Cloud Management Token is a general term encompassing the enrollment process.

NEW QUESTION # 29

Chrome Browser Cloud Management has been successfully implemented at a company for the past year.

Recently, the engineering team has received feedback from the security team that Chrome browsers are not meeting patching Service Level Agreements (SLAs). In the Insight report, the engineering team sees that 30% of their companies' browsers are pending updates.

Which browser policy could the engineering team implement to ensure better compliance with the security team's patching requirement?

- A. Relaunch notification
- B. Google updater policy precedence
- **C. Auto-update check period**
- D. Chrome browser updates

Answer: C

Explanation:

To ensure timely patching, the engineering team should adjust the "Auto-update check period" policy. By shortening this period, Chrome browsers will check for updates more frequently, increasing the likelihood of applying security patches sooner and improving compliance with patching SLAs. "Chrome browser updates" is a general category, "Relaunch notification" affects when users are prompted to restart, and "Google updater policy precedence" deals with the order of policy application, not the frequency of checks.

NEW QUESTION # 30

Which operating system must be used to self-host a Chrome extension*?

- A. ChromeOS
- **B. Linux**
- C. macOS
- D. Windows 11

Answer: B

Explanation:

While the provided study guide doesn't explicitly detail the OS requirements for self-hosting Chrome extensions, general web hosting best practices suggest that Linux is a common and robust platform for serving files and managing web-related services. Its open-source nature, command-line interface, and extensive server software support make it well-suited for self-hosting compared to desktop-centric operating systems like Windows 11 or macOS, and the client-focused ChromeOS. Self-hosting typically involves setting up a web server to distribute the extension files, a task commonly performed on Linux servers.

NEW QUESTION # 31

An organization is deploying 50 new devices which will be managed by a Mobile Device Management solution Which method should be used to enroll the Chrome browser on those devices into Chrome Enterprise Core?

- A. Use Google Admin to generate 50 individual device registration keys and distribute them using mobile device management software
- B. Generate a single device enrollment token and email it to all users, instructing them to enroll their devices individually
- C. Use Google Admin console bulk enrollment feature to generate a set of unique tokens, and then distribute them via secure file sharing platform
- **D. Use Google Admin to generate an enrollment token and distribute it using mobile device management software**

Answer: D

Explanation:

The study guide emphasizes using enrollment tokens generated in the Google Admin console for enrolling browsers. When using an MDM solution, the most efficient and recommended method is to generate a single enrollment token and then deploy it to the devices through the MDM software. This allows for automated and scalable enrollment. Bulk enrollment features in the Admin console are typically for direct enrollment, not through MDM. Individual tokens or keys would be inefficient for a large deployment.

NEW QUESTION # 32

The security team requires Chrome to be updated on computers that only have intranet access with no available internet connectivity. These computers cannot be restarted, and Chrome is not updating. How can Chrome be updated?"

- A. Use force relaunch after period
- B. Use a target version
- C. Run auto-update.
- **D. Run the Chrome installer**

Answer: D

Explanation:

For machines with no internet connectivity, automatic updates will not work. The only way to update Chrome in this scenario is to manually run the Chrome installer with an updated version obtained through an alternative method (e.g., downloaded on a connected machine and transferred). Auto-update requires internet access, setting a target version only dictates the desired version for automatic updates, and force relaunch requires an update to be downloaded first.

NEW QUESTION # 33

.....

There may be a lot of people feel that the preparation process for exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our Chrome-Enterprise-Administrator study materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our Chrome-Enterprise-Administrator Study Materials prepared for you.
