

The Top Features of Confluent CCDAK PDF Dumps File and Practice Test Software

Our company always lays great emphasis on service. All of our works have good sense of service. Once you browser our website and select the CCDAK exam questions, we have arrange all study materials separately and logically. You will know the details if you click the CCDAK practice quiz. You will find that it is easy, fast and convenient. And if you have something confused on our CCDAK learning braindumps, then you can contact with our service online or send email to us. We will help you in the first time.

No matter how good the product is users will encounter some difficult problems in the process of use, and how to deal with these problems quickly becomes a standard to test the level of product service. Our CCDAK study materials are not exceptional also, in order to enjoy the best product experience, as long as the user is in use process found any problem, can timely feedback to us, for the first time you check our CCDAK Study Materials performance, professional maintenance staff to help users solve problems.

CCDAK PDF Questions, Valid CCDAK Exam Tutorial

The customizable mock tests make an image of a real-based Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) exam which is helpful for you to overcome the pressure of taking the final examination. Customers of ActualTestsIT can take multiple Confluent Certified Developer for Apache Kafka Certification Examination (CCDAK) practice tests and improve their preparation to achieve the CCDAK Certification. You can even access your previously given tests from the history, which allows you to be careful while giving the mock test next time and prepare for Confluent Certified Developer for

Apache Kafka Certification Examination (CCDAK) certification in a better way.

Confluent CCDAK (Confluent Certified Developer for Apache Kafka Certification Examination) Certification Exam is a globally recognized certification exam that tests the candidate's knowledge and proficiency in Apache Kafka development using Confluent platform. Confluent Certified Developer for Apache Kafka Certification Examination certification exam is designed to certify the developers who have a thorough understanding of Apache Kafka basics, Confluent platform, and building real-world applications using Kafka.

Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q198-Q203):

NEW QUESTION # 198

In Kafka, what are Topics split into?

- A. Chunks
- **B. Partitions**
- C. Sub Topics
- D. Consumers

Answer: B

NEW QUESTION # 199

You are writing to a topic with acks=all.

The producer receives acknowledgments but you notice duplicate messages.

You find that timeouts due to network delay are causing resends.

Which configuration should you use to prevent duplicates?

- A. `enable.auto.commit=true`
- B. `retries=2147483647`
`max.in.flight.requests.per.connection=1`
`enable.idempotence=false`
- C. `retries=0`
`max.in.flight.requests.per.connection=5`
`enable.idempotence=true`
- **D. `retries=2147483647`
`max.in.flight.requests.per.connection=5`
`enable.idempotence=true`**

Answer: D

Explanation:

To ensure exactly-once delivery and avoid duplicates even during retries:

* `enable.idempotence=true` ensures deduplication on the broker

* `retries=2147483647` allows unlimited retries on retrievable errors

* `max.in.flight.requests.per.connection=5` is the maximum value that preserves message order with idempotence From Kafka Producer Config Docs:

"To achieve exactly-once semantics, set `enable.idempotence=true`, and `max.in.flight.requests.per.connection` # 5."

* A is unrelated (consumer-side)

* C disables retries

* D disables idempotence, leading to duplicates

Reference: Kafka Producer Configs > `enable.idempotence`, `retries`

NEW QUESTION # 200

Which configurations define which connector is deployed?

- A. `rest.extension.classes`
- **B. `connector.class`**

- C. key.converter
- D. value.converter

Answer: B

NEW QUESTION # 201

Select all the way for one consumer to subscribe simultaneously to the following topics - topic.history, topic.sports, topic.politics? (select two)

- A. consumer.subscribePrefix("topic.");
- B. consumer.subscribe(Arrays.asList("topic.history", "topic.sports", "topic.politics"));
- C. consumer.subscribe("topic.history"); consumer.subscribe("topic.sports"); consumer.subscribe("topic.politics");
- D. consumer.subscribe(Pattern.compile("topic\\.*"));

Answer: B,D

Explanation:

Multiple topics can be passed as a list or regex pattern.

NEW QUESTION # 202

Which two statements about Kafka Connect Single Message Transforms (SMTs) are correct? (Select two.)

- A. SMT functionality is included within Kafka Connect converters.
- B. Multiple SMTs can be chained together and act on source or sink messages.
- C. SMTs are often used to join multiple records from a source data system into a single Kafka record.
- D. Masking data is a good example of an SMT.

Answer: B,D

Explanation:

SMTs (Single Message Transforms) are lightweight transformations applied to individual messages as they pass through Kafka Connect.

* Chaining SMTs: You can apply multiple SMTs in sequence by defining them in order in the connector config.

* Masking or modifying fields is a common use case (e.g., redacting sensitive data).

From Kafka Connect Documentation:

"Single Message Transforms (SMTs) are applied to individual messages. You can chain multiple SMTs together."

* SMTs do not perform joins (B is incorrect).

* Converters and SMTs are separate concerns (D is incorrect).
