The C-SEC-2405 certification can help you to demonstrate your expertise and knowledge level. With only one badge of C-SEC-2405 certification, successful candidates can advance their careers and increase their earning potential. The SAP C-SEC-2405 Certification Exam also enables you to stay updated and competitive in the market which will help you to gain more career opportunities.

SAP Certified Associate - Security Administrator Sample Questions (Q25-Q30):

NEW QUESTION # 25

In SAP S/4HANA Cloud Public Edition, what can you do with the Display Authorization Trace? Note: There are 3 correct answers to this question.

- A. Analyze authorization check results for already assigned authorizations
- B. Adjust role restrictions to further limit access when performing forensic analysis
- C. Adjust role restrictions to account for missing authorizations
- D. Analyze authorization check results for missing authorizations
- E. Display business roles granting specific access

Answer: A,D,E

Explanation:

The Display Authorization Trace in SAP S/4HANA Cloud Public Edition is a powerful tool for analyzing authorization issues. It allows administrators to analyze authorization check results for missing authorizations, identifying gaps where users lack necessary permissions to perform tasks, which is critical for troubleshooting access issues. Additionally, it can display business roles granting specific access, providing visibility into which roles provide permissions for particular applications or data, aiding in role management and compliance checks. The tool also supports analyzing authorization check results for already assigned authorizations, helping administrators verify whether existing permissions are functioning as intended.

However, adjusting role restrictions, either to address missing authorizations or for forensic analysis, is not a function of the Display Authorization Trace, as it is a diagnostic tool, not a maintenance interface. These capabilities make the Display Authorization Trace essential for ensuring secure and efficient access control, supporting both operational and audit requirements in SAP S/4HANA Cloud Public Edition.

NEW QUESTION # 26

Which log types are available in the Administration Console of Cloud Identity Services? Note: There are 2 correct answers to this question.

- A. Troubleshooting logs
- B. Performance logs
- C. Usage logs
- D. Change logs

Answer: C,D

Explanation:

In the Administration Console of Cloud Identity Services, the following log types are available:

* Change Logs (A): These logs capture all modifications made to configurations, user data, or system settings.

* Usage Logs (D): Usage logs provide details on how the system is being utilized, including user access patterns and system resource usage.

SAP Security References:

* SAP Cloud Identity Services Administration Guide

* SAP Help Portal: Log Management in Cloud Identity Services

NEW QUESTION # 27

Which functions in SAP Access Control can be used to approve or reject a user's continued access to specific security roles? Note: There are 2 correct answers to this question.

- A. SOD Review

- B. Role Reaffirm
- **C. Role Certification**
- **D. User Access Review**

Answer: C,D

NEW QUESTION # 28

Where can you find information on the SAP-delivered default authorization object and value assignments?

Note: There are 2 correct answers to this question.

- A. SU24
- B. USOBT_C
- **C. SU22**
- **D. USOBT**

Answer: C,D

Explanation:

Information on SAP-delivered default authorization objects and their value assignments can be found in transaction SU22 and table USOBT. Transaction SU22 is used to maintain and view SAP default authorization data, including authorization objects and their proposed values for transactions, as provided by SAP. The table USOBT (Authorization Object Defaults) stores these default assignments, detailing the authorization objects linked to transactions and their standard values. In contrast, USOBT_C is a customer-specific table for customized authorization data, and SU24 is used for maintaining customer-specific authorization proposals, not SAP-delivered defaults. These tools and tables ensure administrators can access and understand SAP's standard authorization configurations for secure system setup.

NEW QUESTION # 29

In S/4HANA on-premise, which of the following combinations is required to grant a business user access to data from a Core Data Services (CDS) view using the standard ABAP authorization concept and authorization object S_RS_AUTH?

- A. *A CDS role with access conditions based on authorization object S_RS_AUTH
*APFCG role containing the CDS role and access conditions based up authorization object S_RS_AUTH
*Assignment of the PFCG role to the business user. C.
- B. *ACDS role with access conditions based on authorization object S_RS_AUTH
*A PFCG role with authorization for object S_RS_AUTH
*Assignment of the PFCG role to the business user. D.
- C. *A CDS role with access conditions based on authorization object S_RS_AUTH,
*APFCG role with authorization for object S_RS_AUTH and assignment of the PFCG role
*The CDS role to the business user.
- **D. *A CDS role with access conditions based on authorization object S_RS_AUTH
*APFCG role containing the CDS role and access conditions based up authorization object S_RS_AUTH
*Assignment of the PFCG role and the CDS role to the business user.**

Answer: D

NEW QUESTION # 30

.....

The customizable mock tests make an image of a real-based SAP Certified Associate - Security Administrator (C-SEC-2405) exam which is helpful for you to overcome the pressure of taking the final examination. Customers of BraindumpsPrep can take multiple SAP C-SEC-2405 practice tests and improve their preparation to achieve the C-SEC-2405 Certification.
