CheckPoint Check Point Certified Security Administrator R81 Sample Questions (Q146-Q151):

NEW QUESTION # 146

Which Threat Prevention Software Blade provides protection from malicious software that can infect your network computers? (Choose the best answer.)

- **A. Anti-Virus**
- B. IPS
- C. Anti-Malware
- D. Content Awareness

Answer: A

Explanation:

Explanation

The Threat Prevention Software Blade that provides protection from malicious software that can infect your network computers is Anti-Virus. Anti-Virus is a software blade that scans files and traffic for viruses, worms, trojans, spyware, and other malware. Anti-Virus can block or clean infected files and prevent malware outbreaks. IPS is a software blade that provides protection from network attacks and exploits. Anti-Malware is not a software blade, but rather a term that refers to any software that can detect and remove malware. Content Awareness is a software blade that provides visibility and control over data that enters or leaves the network based on file types, data types, and keywords.

NEW QUESTION # 147

Fill in the blanks: In _____ NAT, Only the _____ is translated.

- **A. Hide; source**
- B. Simple; source
- C. Hide; destination
- D. Static; source

Answer: A

Explanation:

Explanation

In Hide NAT, only the source IP address is translated to a different IP address. This is used to hide a group of hosts behind a single IP address, usually the external interface of the Security Gateway. References: Check Point R81 Firewall Administration Guide

NEW QUESTION # 148

The organization's security manager wishes to back up just the Gaia operating system parameters. Which command can be used to back up only Gaia operating system parameters like interface details, Static routes and Proxy ARP entries?

- A. upgrade export
- **B. backup**
- C. show configuration
- D. migrate export

Answer: B

Explanation:

System Backup (and System Restore)

System Backup can be used to backup current system configuration. A backup creates a compressed file that contains the Check Point configuration including the networking and operating system parameters, such as routing and interface configuration etc., but unlike a snapshot, it does not include the operating system, product binaries, and hotfixes.

NEW QUESTION # 149

Where is the "Hit Count" feature enabled or disabled in SmartConsole?

- **A. On the Policy layer**
- B. In Global Properties for the Security Management Server
- C. On the Policy Package
- D. On each Security Gateway

Answer: A

Explanation:

Explanation

The "Hit Count" feature is enabled or disabled on the Policy layer in SmartConsole1. To enable or disable the "Hit Count" feature, right-click on the Policy layer and select "Edit Layer". Then, check or uncheck the "Enable Hit Count" option1. References: Solved: Hit Count in R80.x

NEW QUESTION # 150

Which SmartConsole application shows correlated logs and aggregated data to provide an overview of potential threats and attack patterns?

- A. SmartLog
- **B. SmartEvent**
- C. SmartView Tracker
- D. SmartView Monitor

Answer: B

NEW QUESTION # 151
