

Three Easy-to-Use Formats of Dumpcollection Salesforce Salesforce-MuleSoft-Developer-I Exam Questions

P.S. Free & New Salesforce-MuleSoft-Developer-I dumps are available on Google Drive shared by Dumpcollection:
<https://drive.google.com/open?id=1Oaklt1IMr-wsUHQ1zQklxbwpBIV-ja5>

We can say that how many the Salesforce-MuleSoft-Developer-I certifications you get and obtain qualification certificates, to some extent determines your future employment and development, as a result, the Salesforce-MuleSoft-Developer-I exam guide is committed to helping you become a competitive workforce, let you have no trouble back at home. Actually, just think of our Salesforce-MuleSoft-Developer-I Test Prep as the best way to pass the exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	Structuring Mule Applications: Structuring Mule applications covers parameterizing an application and defining and reusing global configurations. It includes breaking an application into multiple flows using private flows, subflows, and the Flow Reference component.
Topic 2	Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.
Topic 3	Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.
Topic 4	Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.

Topic 5	Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.
Topic 6	Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.
Topic 7	Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.
Topic 8	Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.
Topic 9	Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.
Topic 10	Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.

Three Easy-to-Use Dumpcollection Salesforce Salesforce-MuleSoft-Developer-I Exam Dumps Formats

After successful competition of the Salesforce-MuleSoft-Developer-I certification, the certified candidates can put their career on the right track and achieve their professional career objectives in a short time period. However, to pass the Salesforce-MuleSoft-Developer-I Exam you have to prepare well. For the quick Salesforce-MuleSoft-Developer-I exam preparation the Salesforce-MuleSoft-Developer-I Questions are the right choice.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q178-Q183):

NEW QUESTION # 178

Refer to the exhibit.

How should the WHERE clause be changed to set the city and state values from the configured input parameters?

The screenshot shows a Salesforce query editor interface. At the top, there's a 'Query' section with a 'SQL Query Text' field. The query is: `SELECT * FROM accounts WHERE city = attributes.queryParams.city AND state = attributes.queryParams.state`. Below the query text, there's an 'Input Parameters' section. It contains a list of parameters: `1 {`, `2 city: attributes.queryParams.city,`, `3 state: attributes.queryParams.state`, and `4 }`. A blue cloud logo with the word 'salesforce' is overlaid on the query text. A diagonal watermark 'dumpcollection.com' is visible across the entire screenshot.

• A.

```
WHERE city := ${city} AND state := ${state}
```

• B.

```
WHERE city = :city AND state = :state
```

• C.

```
WHERE city = attributes.city AND state = attributes.state
```

• D.

```
WHERE city = #[city] AND state = #[state]
```

Answer: B

NEW QUESTION # 179

A company has an API to manage purchase orders, with each record identified by a unique purchase order ID.

The API was built with RAML according to MuleSoft best practices.

What URI should a web client use to request order P05555?

- A. /orders?order=P05555
- B. /orders/order=P05555
- C. /orders/P05555
- D. /orders/{P05555}

Answer: C

NEW QUESTION # 180

Refer to the exhibits.

▼ custNameFlow

Listener
salesforce

Set Variable
customer to
{ firstName:
"Madhav",
lastName:
"Joshi"}

Logger
firstName

Error
handling

```
<flow name="custNameFlow" doc:id="bcb43c0a-7ff3-469a-a38f-026be38282ba" >
  <http:listener doc:name="Listener" config-ref="HTTP Listener_config" path="/Log"/>
  <set-variable value="#[{ firstName:"Madhav", LastName:"Joshi"}]"
    doc:name='customer to { firstName: "Madhav", LastName: "Joshi"}' variableName="customer"/>
  <logger level="INFO" doc:name="firstName" message="?????"/>
</flow>
```

Set payload transformer is set the firstName and lastName of the customer as shown in below images.

What is the correct Dataweave expression which can be added in message attribute of a Logger activity to access firstName (which in this case is Madhav) from the incoming event?

- A. customer.firstName
- B. vars."customer"."firstName"
- C. firstName
- D. vars."customer.firstName"

Answer: B

Explanation:

Correct answer is vars."customer"."firstName"

Please note that you can also access firstName using this syntax vars.customer.firstName.

Mule Ref Doc : Variables in Mule Apps | MuleSoft Documentation

NEW QUESTION # 181

A RAML example fragment named StudentExample.raml is placed in the examples folder in an API specification project. What is the correct syntax to reference the fragment?

- A. examples: #import StudentExample.raml
- B. examples: !include examples/StudentExample.raml
- C. examples: #import examples/StudentExample.raml
- D. examples: !include StudentExample.raml

Answer: B

Explanation:

To include property. To keep the API definition concise, you can include external content, such as documentation, schemas, and frequently used patterns outside the definition itself. The parser interprets !

include as if the content of the externally-hosted file or a URL were declared in-line.

To use the fragments in RAML you have to include the exact path(copy the path) of that fragment you want to use as shown below

Option 3 is the correct as correct syntax is examples: !include examples/StudentExample.raml Reference:

<https://docs.mulesoft.com/api-manager/1.x/tutorial-design-an-api>

NEW QUESTION # 182

Refer to the exhibits.

What is valid text to set the field in the Database connector configuration to the username value specified in the config.yaml file?

- A. #[db.username]
- B. \${db.username}
- C. #[db.username]
- D. \${db.username}

Answer: B

Explanation:

option 3 is the correct syntz to access application properties

NEW QUESTION # 183

.....

Heaps of beginners and skilled professionals already have surpassed the Salesforce Salesforce-MuleSoft-Developer-I certification exam and pursuing a worthwhile profession inside the quite aggressive market. You may additionally turn out to be a part of this skilled and certified community. To try this you sincerely need to pass the Salesforce Salesforce-MuleSoft-Developer-I Certification

examination.
