Oracle APEX Developer Professional Sample Questions (Q71-Q76):

NEW QUESTION # 71

I want to hide a few columns in my interactive report. To do so, which option should I choose from the Actions menu?

- A. Data
- **B. columns**
- C. Filter
- D. Format

Answer: B

Explanation:

Explanation

To hide a few columns in your interactive report, you should choose Columns from the Actions menu. This option allows you to select which columns to show or hide in your report by using checkboxes. You can also reorder or resize the columns from this option.

The other options are incorrect because:

Filter allows you to filter the data in your report by applying one or more conditions on the columns.

Data allows you to add, modify, or delete data in your report by using inline editing or modal dialog editing.

Format allows you to change the appearance of your report by applying conditional formatting rules or highlighting colors.

NEW QUESTION # 72

To highlight certain rows in the interactive report based on a condition, you must:

- A. Provide a conditional SQL query
- B. Rows cannot be highlighted in an Interactive report
- **C. Choose a condition in Format > Highlight**
- D. Edit the rows in the report and select a color

Answer: C

Explanation:

Explanation

To highlight certain rows in the interactive report based on a condition, you must choose a condition in Format

> Highlight. This option allows you to apply a conditional formatting rule to the report, which changes the appearance of the rows that match the condition. You can specify the condition type, expression, column, operator, and value. You can also choose the highlighting style, such as background color, text color, or icon.

The other options are incorrect because:

Provide a conditional SQL query: This option will not highlight certain rows in the interactive report based on a condition. It will filter the data in the report by applying a WHERE clause to the SQL query that defines the report source.

Edit the rows in the report and select a color: This option will not highlight certain rows in the interactive report based on a condition. It will modify the data in the report by using inline editing or modal dialog editing. You cannot select a color for the rows in this option.

Rows cannot be highlighted in an Interactive report: This option is false. Rows can be highlighted in an Interactive Report by using the Format > Highlight option.

NEW QUESTION # 73

Which three of the following statements are TRUE about Faceted Search?

- A. You can create only 5 facets per page
- B. After the end user changes a facet, the results, dependent facets, and occurrence counts refresh immediately.
- C. The right side of the page features a Search Results region, which can display as a classic report or a cards report.
- D. The facets are displayed on the left and upper part of the screen

Answer: B,C,D

Explanation:

Explanation

A faceted search is a type of component that enables users to filter information easily and intuitively by selecting the options in each facet. A faceted search consists of a faceted search region and a search results region. The faceted search region displays on the left and upper part of the screen and shows possible values and occurrence counts for each facet. The search results region displays on the right side of the screen and shows the data that matches the selected facet values. The search results region can display as either a classic report or a cards report. Three of the statements that are true about faceted search are:

After the end user changes a facet, the results, dependent facets, and occurrence counts refresh immediately. This feature provides instant feedback to the user and allows them to refine their search criteria without reloading the page.

The right side of the page features a Search Results region, which can display as a classic report or a cards report. A classic report displays data in a tabular format with columns and rows. A cards report displays data in a grid of cards with images and text.

The facets are displayed on the left and upper part of the screen. This layout provides a clear separation between the facets and the results and allows users to see and access all the facets without scrolling.

NEW QUESTION # 74

Which two functions can be used by an end user when pivoting an interactive report?

- A. Rank
- B. List aggregate
- C. list aggregate
- D. Minimum
- E. Median

Answer: A,D

Explanation:

Explanation

When pivoting an interactive report, you can use different functions to aggregate or summarize the data in the pivot table. Some of the available functions are Minimum, Maximum, Average, Sum, Count, Median, and Rank. Minimum returns the smallest value in a set of values. Rank returns the rank of each value in a group of values. Verified References: 56

NEW QUESTION # 75

Which two are true when the Edit option is NOT enabled for an Interactive Grid?

- A. The end user cannot edit the underlying data in the database
- B. The end user cannot create charts
- C. The end user can edit the underlying data in the database
- D. The end user can customize the report

Answer: A,D

Explanation:

Explanation

An interactive grid is a component that displays data in a tabular format and allows users to perform various actions on the data, such as sorting, filtering, grouping, highlighting, and editing. However, the editing feature is optional and can be enabled or disabled by the developer. When the Edit option is not enabled for an interactive grid, the following statements are true:

The end user cannot edit the underlying data in the database. The interactive grid becomes read-only and does not allow users to add, modify, or delete rows. The Add Row and Save buttons are hidden from the toolbar and the cells are not editable.

The end user can customize the report. The interactive grid still allows users to change the appearance and behavior of the report

using the Actions menu. Users can perform actions such as changing column order, resizing column width, hiding or showing columns, applying filters or highlights, creating control breaks or charts, and saving reports.

NEW QUESTION # 76
