NEW QUESTION # 409

Variability in product design can best be reduced by:

- **A. applying Six Sigma principles.**
- B. outsourcing the design process.
- C. broadening design specifications.
- D. initiating 100% product inspection.

Answer: A

Explanation:

Applying Six Sigma principles is the best approach to reduce variability in product design. Six Sigma is a data-driven methodology that focuses on process improvement and variation reduction through the application of statistical tools and techniques. By identifying and eliminating defects and process variations, Six Sigma helps in achieving high-quality product designs with minimal variability. This systematic approach to problem-solving ensures that products meet customer specifications and performance standards consistently.
