Three Formats for PL-400 Practice Tests TrainingQuiz Exam Prep Solutions
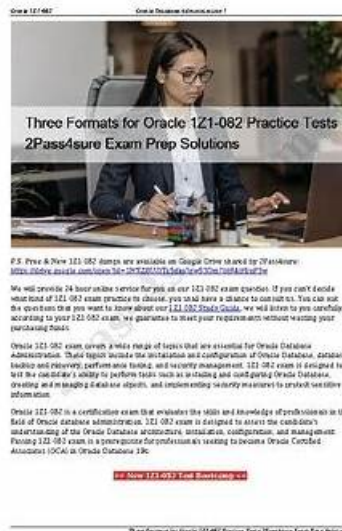

With PL-400 guide torrent, you can easily pass professional qualification exams of various industries, even if you are not a college graduate, and you have never come into contact with this professional knowledge. With PL-400 exam torrent, you can also quickly get started, easily grasp the key points of the exam, and gain access to well-known companies. PL-400 Guide Torrent helps you to use the least time to get the maximum improvement. With our PL-400 certification training, you pay for money, but you can get time and knowledge that money cannot buy.

Microsoft Power Platform Developer (PL-400) Certification Exam is a highly sought-after certification for professionals who work with Microsoft Power Platform. Microsoft Power Platform Developer certification exam is designed to validate the skills and knowledge required to build, customize, and design Power Platform solutions. PL-400 exam measures an individual's ability to create applications, automate workflows, and extend the platform to meet organizational needs.

The following skills are not required for the exam:

Knowledge of Windows Server operating systems and programming languages, Proficiency in designing and developing a web application, Proficiency in writing a JScript or VB script, Proficiency in using Visual Studio, Proficiency in developing NET Framework applications these are covered in **PL-400 exam dumps**. Experience with Windows Azure is not required but will be helpful when building solutions that integrate on-premise applications with services hosted in the cloud. Trial Microsoft Windows

Azure account is required to take the Curriculum PL-400 Exam. Customizations performed on a Windows Server 2012 R2 machine are not permitted.

Reliable PL-400 Braindumps Ppt & Visual PL-400 Cert Test

The Microsoft PL-400 practice exam will be a great help because you are left with little time to prepare for the Microsoft PL-400 certification exam which you cannot waste to make time for the Microsoft PL-400 Exam Questions. Get the Microsoft PL-400 certification by preparing through Microsoft PL-400 exam questions that will help you pass the Microsoft PL-400 exam.

Microsoft PL-400 exam is the perfect certification for individuals who want to establish their proficiency in developing solutions using the Microsoft Power Platform. The PL-400 exam is designed to validate the skills and knowledge required for building applications on the Power Platform, including Power Apps, Power BI, Power Automate, and Power Virtual Agents. Candidates who pass the PL-400 Exam will earn the Microsoft Certified: Power Platform Developer Associate certification.

Microsoft Power Platform Developer Sample Questions (Q244-Q249):

NEW QUESTION # 244
A company is creating a new system based on Common Data Service.
You need to select the features that meet the company's requirements.
Which options should you use? To answer, drag the appropriate options to the correct requirements. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

NEW QUESTION # 245
You are researching integrations with several external systems.
Each integration has different requirements.
You need to determine which data sources to use to meet each requirement.
What should you use? To answer, drag the appropriate data sources to the correct requirements. Each data source may be used once, more than one, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 246
A company is implementing business logic in a model-driven app. Employees import records from Microsoft Excel to create lead records.
The company has the following requirements:
* An existing phone number column must be formatted to only display numbers and periods.
* Three existing columns must be calculated to display the sum based on a percentage.
* The solution must not use custom development when possible.
You need to implement the business logic solution.
Which method should you use? To answer, move the appropriate solutions to the correct requirements. You may use each solution once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

Answer:

Explanation:

Solutions

:: Business rule

:: Formula column

:: Plug-in

Business logic solutions

Requirement	Solution
Phone number formatting	:: Business rule
Percentage calculation	:: Formula column

Explanation:

Solutions

:: Business rule

:: Formula column

:: Plug-in

Business logic solutions

Requirement	Solution
Phone number formatting	Business rule
Percentage calculation	Formula column

NEW QUESTION # 247

A school district wants to standardize student information and student performance records. Students in the district are assigned to a specific school. Students are evaluated using class records.

When students move between schools in the middle of a school year, the student's current class history must be available to the administrators at the new school.

You need to configure Microsoft Dataverse tables to connect the class history records to their respective class records.

How should you configure the table? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Configuration setting	Value
Table ownership for the class record table.	Organization User User or Team Team
Relationship of the class history table to the student table.	Many-to-one One-to-many Many-to-many
Behavior of the relationship between the class history table and the student table.	Parental Referential Custom

Answer:

Explanation:

Configuration setting	Value
Table ownership for the class record table.	▼
	Organization
	User
	User_or_Team
	Team
Relationship of the class history table to the student table.	▼
	Many-to-one
	One-to-many
	Many-to-many
Behavior of the relationship between the class history table and the student table.	▼
	Parental
	Referential
	Custom

Explanation

Graphical user interface, text, application, email Description automatically generated

Configuration setting	Value
Table ownership for the class record table.	▼
	Organization
	User
	User or Team
	Team
Relationship of the class history table to the student table.	▼
	Many-to-one
	One-to-many
	Many-to-many
Behavior of the relationship between the class history table and the student table.	▼
	Parental
	Referential
	Custom

Box 1: Team

'the student's current class history must be available to the administrators at the new school.' Box 2: Many-to-one Box 3: Parental
The N:1 (many-to-one) relationship type exists in the user interface because the designer shows you a view grouped by tables. 1:N relationships actually exist between tables and refer to each table as either a Primary/Current table or Related table. The related table, sometimes called the child table, has a lookup column that allows storing a reference to a row from the primary table, sometimes called the parent table. A N:1 relationship is just a 1:N relationship viewed from the related table.

NEW QUESTION # 248

A company uses Common Data Service (CDS) and manages their engineers using a model-driven app.

You create a new reusable custom component named Component1 by using the Power Apps component framework (PCF).

You need to package Component1 for deployment into the model-driven app.

Which three commands should you run in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

npm run build

pac solution init-publisher-name *<publisher>* - - publisher prefix *<prefix>*

msbuild /t:build /restore

npm start

pac pcf init –namespace *<namespace>* --name *<control name>* - -template field

pac solution add-reference –path *<control path>*

npm install

Answer Area

Answer:

Explanation:

Answer Area

pac solution init --publisher-name <publisher> -- publisher-prefix <prefix>

pac solution add-reference --path <control-path>

msbuild /t:build /restore

1 - pac solution init --publisher-name <publisher> --publisher-prefix <prefix>
2 - pac solution add-reference --path <control-path>
3 - msbuild /t:build /restore
