Actual Cisco 300-420 Exam Questions and Answers

300-420 certification exam opens the doors for starting a bright career. After passing the Designing Cisco Enterprise Networks 300-420 test you will easily apply for well-paid jobs in top companies all over the world. 300-420 exam offers multiple advantages including, high salaries, promotions, enhancing resumes, and skills improvement. Once you pass the 300-420 Exam, you can avail all these benefits. If you want to pass the Cisco 300-420 certification exam, you must find the best resource to prepare for the 300-420 test.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which consideration must be taken into account when using the DHCP relay feature in a Cisco SD-Access Architecture?

- A. DHCP-relay must be enabled on fabric edge nodes to provide the correct mapping of DHCP scope to the local anycast gateway.
- B. DHCP servers must support Cisco SD-Access extensions to correctly assign IPs to endpoints in an SDAccess fabric with anycast gateway.
- C. A DHCP server must be enabled on the border nodes to allow subnets to span multiple fabric edges.
- D. DHCP Option-82 must be enabled to map the circuit IP option to the access fabric node where the DHCP discover originated.

Answer: A

NEW QUESTION # 48

When IPsec VPNs are designed, what is a unique requirement if support for IP Multicast is required?

- A. encapsulation of traffic with GRE or VTI
- B. additional bandwidth for headend
- C. IPsec forwarding using tunnel mode
- D. IPsec forwarding using transport mode

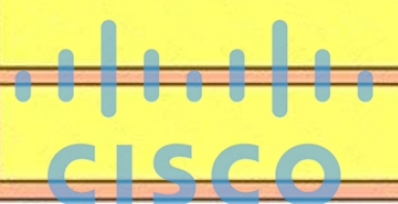

Answer: A

NEW QUESTION # 49

Drag and drop the characteristics from the left onto the Yang model they describe on the right.

Select and Place:

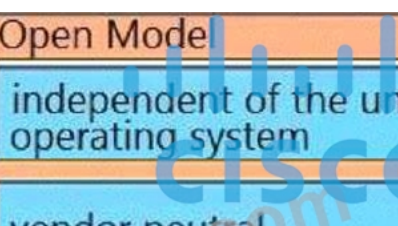

independent of the underlying operating system	Open Model
specific to the underlying operating system	
vendor neutral	Native Model
provided by the vendor for device management	

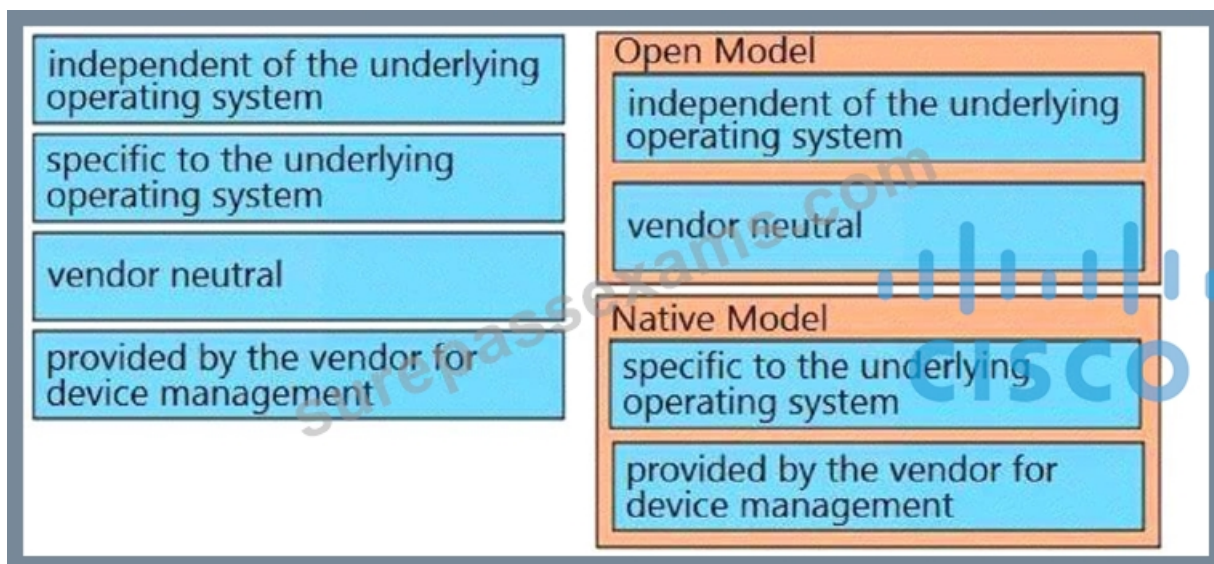

Answer:

Explanation:

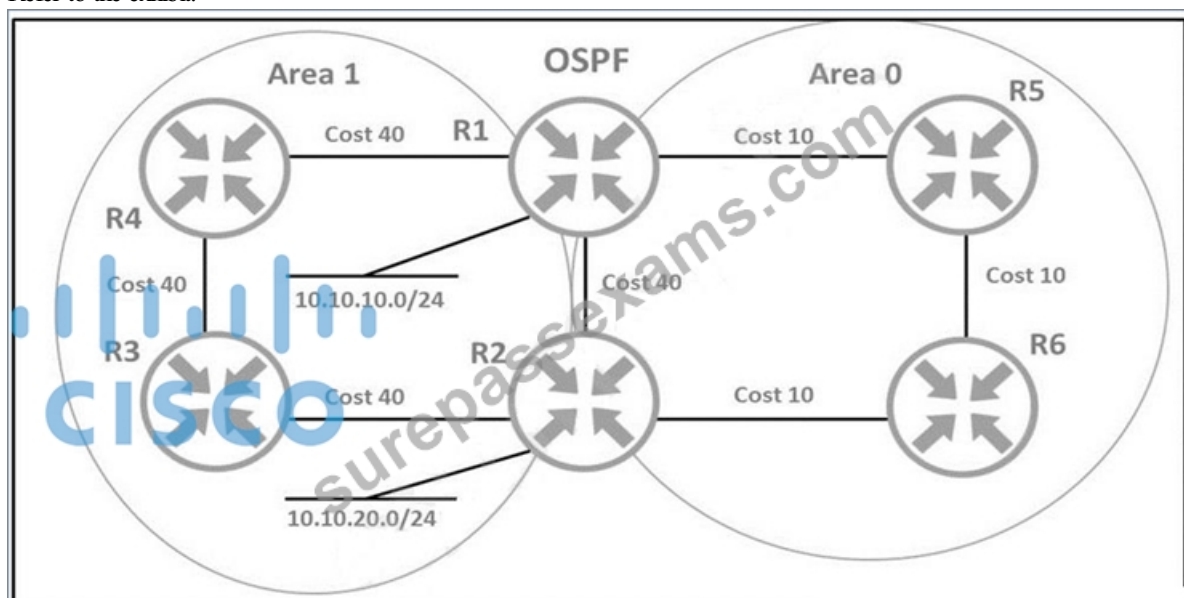

independent of the underlying operating system	Open Model
specific to the underlying operating system	
vendor neutral	Native Model
provided by the vendor for device management	

NEW QUESTION # 50

Refer to the exhibit.

An architect must design a solution that uses the direct link between R1 and R2 for traffic from 10.10.10.0/24 toward network 10.10.20.0/24. Which solution should the architect include in the design?

- A. Place the link into area 2 and install a new link between R1 and R2 in area 0.
- B. Configure the link to provide multiarea adjacency.
- **C. Configure the OSPF cost of the link to a value lower than 30.**
- D. Lower the Administrative Distance for OSPF area 0.

Answer: C

NEW QUESTION # 51

A company's security policy requires that all connections between sites be encrypted in a manner that does not require maintenance of permanent tunnels. The sites are connected through a private MPLS-based service that uses a dynamically changing key and spoke-to-spoke communication. Which type of transport encryption must be used in this environment?

- A. GRE VPN
- **B. GETVPN**
- C. standard IPsec VPN
- D. DMVPN

Answer: B

Explanation:

GETVPN (Group Encrypted Transport VPN) is a Cisco proprietary technology that provides dynamic encryption for spoke-to-spoke communication over a private MPLS network. It does not require the maintenance of permanent tunnels, and it uses dynamically changing keys.

DMVPN (Dynamic Multipoint VPN) is another Cisco proprietary technology that can be used to create a VPN over a private MPLS network. However, DMVPN does require the maintenance of permanent tunnels, and it does not support dynamically changing keys.

GRE VPN (Generic Routing Encapsulation VPN) is a generic VPN technology that can be used over any type of network, including a private MPLS network. However, GRE VPN does not support dynamically changing keys.

Standard IPsec VPN is a generic VPN technology that can be used over any type of network, including a private MPLS network. It supports dynamically changing keys, but it requires the maintenance of permanent tunnels.

Therefore, the best choice for this environment is GETVPN. It meets all of the requirements, including dynamically changing keys, spoke-to-spoke communication, and no need for permanent tunnels.

NEW QUESTION # 52
