

Three formats of the TrainingDump Splunk SPLK-4001 Exam Dumps

P.S. Free & New SPLK-4001 dumps are available on Google Drive shared by TrainingDump: <https://drive.google.com/open?id=1ZUeRB4y5AljvgHVLQoxab5Me9SAwNFVY>

In order to meet the need of all customers, there are a lot of professionals in our company. We can promise that we are going to provide you with 24-hours online efficient service after you buy our Splunk O11y Cloud Certified Metrics User guide torrent. We are willing to help you solve your all problem. If you purchase our SPLK-4001 test guide, you will have the right to ask us any question about our products, and we are going to answer your question immediately, because we hope that we can help you solve your problem about our SPLK-4001 Exam Questions in the shortest time. We can promise that our online workers will be online every day. If you buy our SPLK-4001 test guide, we can make sure that we will offer you help in the process of using our SPLK-4001 exam questions. You will have the opportunity to enjoy the best service from our company.

We promise you that if you fail to pass your exam after using SPLK-4001 exam materials, we will give you refund. We are pass guarantee and money back guarantee. Moreover, SPLK-4001 training materials cover most of knowledge points for the exam, and you can master the major knowledge points as well as improve your professional ability after practicing. SPLK-4001 Exam Materials contain both questions and answers, and it's convenient for you to have a quickly check after practicing. We also have online and offline chat service, if you have any questions about SPLK-4001 exam dumps, you can consult us.

Free PDF Quiz 2025 Authoritative SPLK-4001: New Splunk O11y Cloud Certified Metrics User Exam Practice

People who get SPLK-4001 certification show dedication and willingness to work hard, also can get more opportunities in job hunting. It seems that SPLK-4001 certification becomes one important certification for many IT candidates. While a good study material will do great help in SPLK-4001 Exam Preparation. TrainingDump SPLK-4001 will solve your problem and bring light for you. SPLK-4001 exam questions and answers are the best valid with high hit rate, which is the best learning guide for your Splunk SPLK-4001 preparation.

Splunk O11y Cloud Certified Metrics User Sample Questions (Q21-Q26):

NEW QUESTION # 21

The alert recipients tab specifies where notification messages should be sent when alerts are triggered or cleared. Which of the below options can be used? (select all that apply)

- A. Invoke a webhook URL.
- B. Send to email addresses.
- C. Export to CSV.
- D. Send an SMS message.

Answer: A,B,D

Explanation:

The alert recipients tab specifies where notification messages should be sent when alerts are triggered or cleared. The options that can be used are:

Invoke a webhook URL. This option allows you to send a HTTP POST request to a custom URL that can perform various actions based on the alert information. For example, you can use a webhook to create a ticket in a service desk system, post a message to a chat channel, or trigger another workflow¹ Send an SMS message. This option allows you to send a text message to one or more phone numbers when an alert is triggered or cleared. You can customize the message content and format using variables and templates² Send to email addresses. This option allows you to send an email notification to one or more recipients when an alert is triggered or cleared. You can customize the email subject, body, and attachments using variables and templates. You can also include information from search results, the search job, and alert triggering in the email³ Therefore, the correct answer is A, C, and D.

1: <https://docs.splunk.com/Documentation/Splunk/latest/Alert/Webhooks> 2:

<https://docs.splunk.com/Documentation/Splunk/latest/Alert/SMSnotification> 3:

<https://docs.splunk.com/Documentation/Splunk/latest/Alert/Emailnotification>

NEW QUESTION # 22

A customer is experiencing an issue where their detector is not sending email notifications but is generating alerts within the Splunk Observability UI. Which of the below is the root cause?

- **A. The detector has a muting rule.**
- B. The detector has an incorrect alert rule.
- C. The detector has an incorrect signal,
- D. The detector is disabled.

Answer: A

Explanation:

Explanation

The most likely root cause of the issue is D. The detector has a muting rule.

A muting rule is a way to temporarily stop a detector from sending notifications for certain alerts, without disabling the detector or changing its alert conditions. A muting rule can be useful when you want to avoid alert noise during planned maintenance, testing, or other situations where you expect the metrics to deviate from normal¹ When a detector has a muting rule, it will still generate alerts within the Splunk Observability UI, but it will not send email notifications or any other types of notifications that you have configured for the detector. You can see if a detector has a muting rule by looking at the Muting Rules tab on the detector page. You can also create, edit, or delete muting rules from there¹ To learn more about how to use muting rules in Splunk Observability Cloud, you can refer to this documentation¹.

NEW QUESTION # 23

A user wants to add a link to an existing dashboard from an alert. When they click the dimension value in the alert message, they are taken to the dashboard keeping the context. How can this be accomplished? (select all that apply)

- **A. Add a link to the field.**
- B. Add a link to the Runbook URL.
- **C. Build a global data link.**
- D. Add the link to the alert message body.

Answer: A,C

Explanation:

Explanation

The possible ways to add a link to an existing dashboard from an alert are:

Build a global data link. A global data link is a feature that allows you to create a link from any dimension value in any chart or table to a dashboard of your choice. You can specify the source and target dashboards, the dimension name and value, and the query parameters to pass along. When you click on the dimension value in the alert message, you will be taken to the dashboard with the context preserved¹ Add a link to the field. A field link is a feature that allows you to create a link from any field value in any search result or alert message to a dashboard of your choice. You can specify the field name and value, the dashboard name and ID, and the query parameters to pass along. When you click on the field value in the alert message, you will be taken to the dashboard with the context preserved² Therefore, the correct answer is A and C.

To learn more about how to use global data links and field links in Splunk Observability Cloud, you can refer to these

documentations¹2.

1: <https://docs.splunk.com/Observability/gdi/metrics/charts.html#Global-data-links> 2:

<https://docs.splunk.com/Observability/gdi/metrics/search.html#Field-links>

NEW QUESTION # 24

Which of the following statements about adding properties to MTS are true? (select all that apply)

- A. Properties are sent in with datapoints.
- B. Properties are applied to dimension key:value pairs and propagated to all MTS with that dimension
- C. Properties can be set in the UI under Metric Metadata.
- D. Properties can be set via the API.

Answer: C,D

Explanation:

Explanation

According to the web search results, properties are key-value pairs that you can assign to dimensions of existing metric time series (MTS) in Splunk Observability Cloud¹. Properties provide additional context and information about the metrics, such as the environment, role, or owner of the dimension. For example, you can add the property use: QA to the host dimension of your metrics to indicate that the host that is sending the data is used for QA.

To add properties to MTS, you can use either the API or the UI. The API allows you to programmatically create, update, delete, and list properties for dimensions using HTTP requests². The UI allows you to interactively create, edit, and delete properties for dimensions using the Metric Metadata page under Settings³.

Therefore, option A and D are correct.

NEW QUESTION # 25

What are the best practices for creating detectors? (select all that apply)

- A. Have a consistent value.
- B. Have a consistent type of measurement.
- C. View detector in a chart.
- D. View data at highest resolution.

Answer: A,B,C,D

Explanation:

Explanation

The best practices for creating detectors are:

View data at highest resolution. This helps to avoid missing important signals or patterns in the data that could indicate anomalies or issues¹ Have a consistent value. This means that the metric or dimension used for detection should have a clear and stable meaning across different sources, contexts, and time periods. For example, avoid using metrics that are affected by changes in configuration, sampling, or aggregation² View detector in a chart. This helps to visualize the data and the detector logic, as well as to identify any false positives or negatives. It also allows to adjust the detector parameters and thresholds based on the data distribution and behavior³ Have a consistent type of measurement. This means that the metric or dimension used for detection should have the same unit and scale across different sources, contexts, and time periods. For example, avoid mixing bytes and bits, or seconds and milliseconds.
