Peoplecert DevOps Institute AIOps Foundation V1.0 Sample Questions (Q16-Q21):

NEW QUESTION # 16

The incident related metric MTTD means:

- A. Mean time to Detect
- B. Mean Time to Distribution
- C. Mean Time to Delivery
- D. Mean Time to Deployment

Answer: A

Explanation:

Mean Time to Detect (MTTD) is an incident management metric that measures the average time taken to identify an issue within a system. A lower MTTD indicates a more responsive monitoring system, allowing for quicker remediation and minimizing potential impact. Improving MTTD is crucial for maintaining system reliability and performance. The DevOps Institute's AIOps Foundation course emphasizes the importance of MTTD in evaluating the effectiveness of IT operations and the implementation of AIOps solutions to enhance detection capabilities.

NEW QUESTION # 17

Which of the following is a characteristic of Machine Learning?

- A. Requires explicit programming to learn
- B. A superset of AI
- C. Uses small amounts of historical data to generate accurate inferences or prediction
- D. Gradually improves accuracy through iterative optimization

Answer: D

Explanation:

Machine Learning (ML) involves algorithms that learn from data and improve their performance over time through iterative optimization. Unlike traditional programming, where explicit instructions are coded, ML models identify patterns and make predictions based on historical data, refining their accuracy as they process more information.

The AIOps Foundation course covers core technologies of machine learning, emphasizing how these models enhance IT operations by automating tasks and providing predictive insights.

NEW QUESTION # 18

What is Step 1 in the AIOps Capability Scale?

- A. Use chaos engineering for antifragility
- B. Automate toils using AI Insights
- C. Reduce MTTR through noise reduction
- D. Add automation for self-healing

Answer: C

Explanation:

In the AIOps Capability Scale, Step 1 focuses on reducing Mean Time to Repair (MTTR) by minimizing alert noise. This initial phase involves implementing AIOps solutions to filter and correlate alerts, thereby decreasing the volume of irrelevant notifications. By reducing noise, IT teams can concentrate on critical issues, leading to faster incident resolution and improved system reliability. This foundational step sets the stage for more advanced AIOps capabilities.

NEW QUESTION # 19

What impact on incident related metrics is the desired outcome from AIOps implementation?

- A. Increase in MTTA, Increase in MTTR and Decrease in MTBF
- B. Decrease in MTTA, Decrease in MTTR and Decrease in MTBF
- C. Decrease in MTTA, Increase in MTTR and Decrease in MTBF
- **D. Decrease in MTTA, Decrease in MTTR and Increase in MTBF**

Answer: D

Explanation:

AIOps aims to improve incident-related metrics by:

* Decreasing Mean Time to Acknowledge (MTTA): Faster detection and acknowledgment of issues.

* Decreasing Mean Time to Resolve (MTTR): Quicker resolution through automation and actionable insights.

* Increasing Mean Time Between Failures (MTBF): Enhanced system reliability and reduced frequency of failures.

These improvements lead to more reliable IT operations, as highlighted in the DevOps Institute's AIOps Foundation course.

NEW QUESTION # 20

How do SLAs relate To AIOps?

- A. AIOps indicates which SLOs to define in an SLA
- B. There is no relationship between AIOps and SLAs
- **C. AIOps reduces the risk and improves SLA targets by overall improving IT Operations speed and capabilities.**
- D. AIOps automates the generation of SLA documentation

Answer: C

Explanation:

Service Level Agreements (SLAs) define the expected performance and availability standards for IT services.

AIOps enhances the ability to meet and exceed these SLA targets by improving IT operations' speed and capabilities. Through the integration of big data analytics and machine learning, AIOps enables real-time monitoring, rapid issue detection, and automated responses, reducing downtime and enhancing service reliability. This proactive approach minimizes risks associated with SLA breaches and ensures that IT services consistently meet agreed-upon performance standards.

NEW QUESTION # 21
