A whole new scope opens up to you and you are immediately hired by reputed firms. Even though the GAQM CASPO-001 certification boosts your career options, you have to pass the CASPO-001 Exam. This GAQM CASPO-001 exam serves to filter out the capable from incapable candidates.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q45-Q50):

NEW QUESTION # 45
Which are NOT appropriate topics for discussion in a Sprint Retrospective? (Choose the best two answers)

- A. Definition of "Done"
- B. Team relations
- C. Sprint Backlog for the next Sprint
- D. How the team does its work
- E. The value of work currently represented in the Product Backlog

Answer: C,E

Explanation:
TheScrum Guidestates: "The purpose of the Sprint Retrospective is to plan ways to increase quality and effectiveness" by inspecting the last Sprint's people, processes, and tools.
* D:The next Sprint's Sprint Backlog is planned in Sprint Planning, not the Retrospective,making it inappropriate.

NEW QUESTION # 46
The Product Owner's authority to change and update the Product Backlog is unlimited, except for: (Choose the best answer)

- A. Decisions by the chief program manager.
- B. Work for which impediments exist that the Scrum Master still needs to resolve.
- C. Nothing. The entire organization must respect a Product Owner's decisions.
- D. High impact changes that have not been approved by the change request board.
- E. Decisions by the CFO, the CEO, or the board of directors.
- F. Technical and architectural work that needs to be done first, as indicated by the chief enterprisearchitect.

Answer: C

Explanation:
TheScrum Guidegrants the Product Owner sole authority over the Product Backlog: "The Product Owner is one person, not a committee... For Product Owners to succeed, the entire organization must respect their decisions." No external roles or processes override this.
* A, C, D, E:These introduce roles (CFO, CEO, program manager, architect, change board) not recognized in Scrum as limiting the Product Owner's authority.
* F:Impediments affect execution, not the Product Owner's right to update the backlog.

NEW QUESTION # 47
What best describes the relationship of the Product Owner and the stakeholders? (Choose the best answer)

- A. The Product Owner provides the stakeholders with acceptance forms at the Sprint Review to record their formal agreement over the delivered software.
- B. The Product Owner actively asks for stakeholder input and expectations to process into the Product Backlog.
- C. The Product Owner has the final call over the requirements and should involve the stakeholders as little as possible.
- D. The Product Owner writes the User Stories as provided by the stakeholders.

Answer: B

Explanation:
TheScrum Guidestates: "The Product Owner is also accountable for effective Product Backlog management, which includes...

representing the needs of many stakeholders in the Product Backlog." Option C reflects this collaborative approach-actively seeking stakeholder input to shape the Product Backlog. Option A is too passive; the Product Owner interprets, not just transcribes. Option B contradicts Scrum's emphasis on stakeholder engagement. Option D introduces a formal process not in Scrum; the Sprint Review is for feedback, not signed agreements. Thus, C is best.

NEW QUESTION # 48

True or False: In the Sprint Review, the Product Backlog is re-prioritized by the stakeholders.

- A. True
- B. False

Answer: B

Explanation:
The Product Backlog is managed solely by the Product Owner, not stakeholders. TheScrum Guideexplains:
"The Sprint Review is a working session... The Product Owner discusses the Product Backlog as it stands." Stakeholders provide feedback during the Sprint Review, which the Product Owner may use to adjust priorities, but they don't directly re-prioritize it.
* A:False-stakeholders don't have this authority.

NEW QUESTION # 49

When is a Sprint finished? (Choose the best answer)

- A. When the Definition of Done is met
- B. When the time-boxed duration is met
- C. When the work remaining is zero
- D. When the Product Owner accepts the Increment

Answer: B

Explanation:
A Sprint is a fixed-length, time-boxed event that ends when its duration expires, regardless of work completion. TheScrum Guidestates: "Sprints are the heartbeat of Scrum, where ideas are turned into value.
They are fixed length events of one month or less to create consistency." The end is determined by the time- box, not by acceptance, quality standards, or task completion.
* A:Product Owner acceptance occurs at Sprint Review, but doesn't define Sprint end.
* B:The Definition of "Done" applies to the Increment, not the Sprint's duration.
* C:Correct-the time-box dictates the end.

NEW QUESTION # 50

......

The learning material is open in three excellent formats, PDF, a desktop practice test, and a web-based practice test. GAQM CASPO-001 Dumps is organized by experts while saving the furthest down-the-line plan to them for the GAQM CASPO-001 Exam.
