We believe that the best brands are those that go beyond expectations. They don't just do the job – they go deeper and become the fabric of our lives. Therefore, as the famous brand, even though we have been very successful we have never satisfied with the status quo, and always be willing to constantly update the contents of our SC-401 Exam Torrent. Decades of painstaking efforts have put us in the leading position of SC-401 training materials compiling market, and the excellent quality of our SC-401 guide torrent and high class operation system in our company have won the common recognition from many international customers for us.

Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	• Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.
Topic 2	• Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.
Topic 3	• Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.

Topic 4	• Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.

Quiz 2025 Microsoft - SC-401 - New Administering Information Security in Microsoft 365 Dumps Free

Infinite striving to be the best is man's duty. We have the responsibility to realize our values in the society. Of course, you must have enough ability to assume the tasks. Then our SC-401 learning quiz can give you some help. First of all, you can easily pass the SC-401 Exam and win out from many candidates for our SC-401 study materials are the most effective exam materials in the market. Secondly, you can also learn a lot of the specialized knowledge at the same time.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q70-Q75):

NEW QUESTION # 70

HOTSPOT

You have a Microsoft 365 E5 subscription that has data loss prevention (DLP) implemented.

You plan to export DLP activity by using Activity explorer.

The exported file needs to display the sensitive info type detected for each DLP rule match.

What should you do in Activity explorer before exporting the data, and in which file format is the file exported? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

In Activity explorer:

☐ Add a custom column
☐ Apply a built-in filter
☒ Customize the default filter

File type:

CSV
 JSON
 TXT
 XML

Answer:

Explanation:

Explanation:

Box 1: To include the sensitive info type detected for each DLP rule match, you need to add a custom column in Activity Explorer. This ensures that the exported file contains specific details about the detected sensitive information types.

Box 2: DLP activity exports from Activity Explorer are always in CSV (Comma-Separated Values) format. This format allows for easy data analysis and reporting in Excel or other data-processing tools.

NEW QUESTION # 71

You have a sensitive information type based on a trainable classifier.

You are unsatisfied with the result of the trainable classifier.

You need to retrain the classifier.

What should you use in the Microsoft Purview portal?

- A. Content explorer from Data classification
- B. Labels from Information governance
- C. Labels from Information protection
- D. Content search

Answer: A

NEW QUESTION # 72

You have a Microsoft 365 IS subscription that contains the resources shown in the following table.

Name	Type	Member of
User1	User	None
User2	User	Group1
Group1	Group	None

The subscription contains a Windows 11 device named Device 1 and has the Microsoft Purview Information Protection client installed. Device 1 contains the resources shown in the following table.

Name	Type	Path
File1.png	File	C:\temp
File2.docx	File	D:\Folder1
Folder2	Folder	D:\

You publish a sensitivity label named Label1 to User1 and Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
User1 can apply Label1 to File1.png by using the information protection client.	☐	☐
User1 can apply Label1 to Folder2 by using the information protection client.	☐	☐
User2 can apply Label1 to File2.docx by using the information protection client.	☐	☐

Answer:

Explanation:

Statements	Yes	No
User1 can apply Label1 to File1.png by using the information protection client.	☒	☐
User1 can apply Label1 to Folder2 by using the information protection client.	☐	☒
User2 can apply Label1 to File2.docx by using the information protection client.	☒	☐

Explanation:

Statements	Yes	No
User1 can apply Label1 to File1.png by using the information protection client.	☒	☐
User1 can apply Label1 to Folder2 by using the information protection client.	☐	☒
User2 can apply Label1 to File2.docx by using the information protection client.	☒	☐

Step 1 - Label publishing and scope

The sensitivity label Label1 is published to User1 and Group1.

User1 # Directly included in label publishing.

User2 # Member of Group1, so also included indirectly.

This means both User1 and User2 are eligible to use Label1.

Step 2 - File vs Folder labeling with the Information Protection client The Microsoft Purview Information Protection (AIP unified labeling) client can apply labels to files such as .

docx, .png, .pdf, etc.

It cannot label folders directly. Labels are applied to items (files and emails), not folders.

Reference: Apply sensitivity labels using the AIP client

Step 3 - Analyze each statement

User1 can apply Label1 to File1.png

File1.png is a file type supported by the Information Protection client.

User1 has Label1 published directly.

Answer: Yes

User1 can apply Label1 to Folder2

Sensitivity labels cannot be applied to folders in File Explorer.

Answer: No

User2 can apply Label1 to File2.docx

File2.docx is a supported file type (Word document).

User2 is a member of Group1, and Label1 is published to Group1.

Answer: Yes

NEW QUESTION # 73

You need to meet the technical requirements for the Site1 documents.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Create a sensitivity label.	
Wait 24 hours and then turn on the policy.	
Create a sensitive info type.	
Create a retention label.	
Create an auto-labeling policy.	

Answer:

Explanation:

Actions	Answer Area
Create a sensitivity label.	Create a sensitive info type.
Wait 24 hours and then turn on the policy.	Create a retention label.
Create a sensitive info type.	Create an auto-labeling policy.
Create a retention label.	
Create an auto-labeling policy.	

Explanation:

A screenshot of a questionnaire AI-generated content may be incorrect.

Actions	Answer Area
Wait 24 hours and then turn on the policy.	Create a sensitive info type.
Create a retention label.	Create a sensitivity label.
	Create an auto-labeling policy.

The goal is to automatically label documents in Site1 that contain credit card numbers. To achieve this, we need a sensitivity label with an auto-labeling policy based on a sensitive info type that detects credit card numbers.

Step 1: Create a Sensitive Info Type

A sensitive info type is needed to detect credit card numbers in documents.

Microsoft Purview includes built-in sensitive info types for credit card numbers, but we can also create a custom one if necessary.

Step 2: Create a Sensitivity Label

A sensitivity label is required to classify and protect documents containing sensitive information.

This label can apply encryption, watermarking, or access controls to credit card data.

Step 3: Create an Auto-Labeling Policy

An auto-labeling policy ensures that the sensitivity label is applied automatically when credit card numbers are detected in Site1.

This policy is configured to scan files and automatically apply the correct sensitivity label.

NEW QUESTION # 74

You need to meet the retention requirement for the users' Microsoft 365 data.
What is the minimum number of retention policies required to achieve the goal?

- A. 0
- B. 1
- C. 2
- D. 3
- E. 4

Answer: A

Explanation:

The requirement states that all Microsoft 365 data for users must be retained for at least one year. In Microsoft 365, retention policies must be configured for each type of data storage.

Step 1: Identifying Where Data is Stored

From the case study, users store data in the following locations:

*SharePoint Online sites

*OneDrive accounts

*Exchange email

*Exchange public folders

*Teams chats

*Teams channel messages

Since these locations fall under two broad categories:

*Microsoft Exchange data (Emails, Public folders)

*SharePoint, OneDrive, and Teams data

Step 2: Required Retention Policies

A single retention policy can cover:

*SharePoint Online

*OneDrive

*Microsoft Teams

2. A second retention policy is required for:

*Exchange (Emails & Public Folders)

Thus, the minimum number of retention policies required to meet the requirement is 2.

Microsoft 365 retention policies can be applied broadly across multiple services with just two policies:

*One for Exchange & Public Folders

*One for SharePoint, OneDrive, and Teams

There's no need for separate policies for each individual workload unless different retention durations are required, which is not stated in the requirement.

NEW QUESTION # 75

.....

Keep reading because we have discussed specifications of Administering Information Security in Microsoft 365 SC-401 PDF format, desktop Administering Information Security in Microsoft 365 SC-401 practice exam software, and Administering Information Security in Microsoft 365 SC-401 web-based practice test. ExamsReviews is aware that many SC-401 exam applicants can't sit in front of a computer for many hours to study for the SC-401 examination. If you are one of those Administering Information Security in Microsoft 365 SC-401 exam candidates, don't worry because we have a portable file of Microsoft Administering Information Security in Microsoft 365 PDF Questions for you. Administering Information Security in Microsoft 365 SC-401 PDF format works smoothly on all smart devices.
