

# Three User-Friendly Formats With Real Databricks Databricks-Certified-Data-Analyst-Associate Questions

BTW, DOWNLOAD part of Actual4Labs Databricks-Certified-Data-Analyst-Associate dumps from Cloud Storage:  
[https://drive.google.com/open?id=1y3kjqMXn7UC\\_KMMtJ0GDS\\_6zmEUkKWpF](https://drive.google.com/open?id=1y3kjqMXn7UC_KMMtJ0GDS_6zmEUkKWpF)

It's not easy for most people to get the Databricks-Certified-Data-Analyst-Associate guide torrent, but I believe that you can easily and efficiently obtain qualification certificates as long as you choose our products. Interest is the best teacher, so it is only by letting the user have fun in the boring study that they can better put knowledge into their thinking. How perfect Databricks-Certified-Data-Analyst-Associate Exam Questions are! Maybe you cannot wait to understand our study materials.

Before we decide to develop the Databricks-Certified-Data-Analyst-Associate preparation questions, we have make a careful and through investigation to the customers. We have taken all your requirements into account. Firstly, the revision process is long if you prepare by yourself. If you collect the keypoints of the Databricks-Certified-Data-Analyst-Associate exam one by one, it will be a long time to work on them. Secondly, the accuracy of the Databricks-Certified-Data-Analyst-Associate Exam Questions And Answers is hard to master. Because the content of the exam is changing from time to time. But our Databricks-Certified-Data-Analyst-Associate practice guide can help you solve all of these problems.

## Exam Databricks Databricks-Certified-Data-Analyst-Associate Book, Databricks-Certified-Data-Analyst-Associate Reliable Learning Materials

People can achieve great success without an outstanding education and that the Databricks qualifications a successful person needs can be acquired through the study to get some professional certifications. So it cannot be denied that suitable Databricks-Certified-Data-Analyst-Associate actual test guide do help you a lot; thus we strongly recommend our Databricks-Certified-Data-Analyst-Associate Exam Questions for not only that our Databricks-Certified-Data-Analyst-Associate training guide is designed to different versions: PDF, Soft and APP versions, which can offer you different study methods, but also that our Databricks-Certified-Data-Analyst-Associate learning perp can help you pass the exam without difficulty.

## Databricks Certified Data Analyst Associate Exam Sample Questions (Q62-Q67):

### NEW QUESTION # 62

A data scientist has asked a data analyst to create histograms for every continuous variable in a data set. The data analyst needs to identify which columns are continuous in the data set.

What describes a continuous variable?

- A. A quantitative variable that can take on an uncountable set of values
- B. A quantitative variable Chat can take on a finite or countably infinite set of values
- C. A quantitative variable that never stops changing
- D. A categorical variable in which the number of categories continues to increase over time

**Answer: A**

Explanation:

A continuous variable is a type of quantitative variable that can assume an infinite number of values within a given range. This means that between any two possible values, there can be an infinite number of other values. For example, variables such as height, weight, and temperature are continuous because they can be measured to any level of precision, and there are no gaps between possible values. This is in contrast to discrete variables, which can only take on specific, distinct values (e.g., the number of children in a family). Understanding the nature of continuous variables is crucial for data analysts, especially when selecting appropriate statistical methods and visualizations, such as histograms, to accurately represent and analyze the data.

#### NEW QUESTION # 63

Which of the following approaches can be used to connect Databricks to Fivetran for data ingestion?

- **A. Use Partner Connect's automated workflow to establish a cluster for Fivetran to interact with**
- B. Use Workflows to establish a SQL warehouse (formerly known as a SQL endpoint) for Fivetran to interact with
- C. Use Partner Connect's automated workflow to establish a SQL warehouse (formerly known as a SQL endpoint) for Fivetran to interact with
- D. Use Workflows to establish a cluster for Fivetran to interact with
- E. Use Delta Live Tables to establish a cluster for Fivetran to interact with

**Answer: A**

Explanation:

Partner Connect is a feature that allows you to easily connect your Databricks workspace to Fivetran and other ingestion partners using an automated workflow. You can select a SQL warehouse or a cluster as the destination for your data replication, and the connection details are sent to Fivetran. You can then choose from over 200 data sources that Fivetran supports and start ingesting data into Delta Lake. Reference: [Connect to Fivetran using Partner Connect](#), [Use Databricks with Fivetran](#)

#### NEW QUESTION # 64

A data analyst is processing a complex aggregation on a table with zero null values and the query returns the following result:

| group_1 | group_2 | sum |
|---------|---------|-----|
| null    | null    | 100 |
| A       | null    | 50  |
| A       | Y       | 30  |
| A       | Z       | 20  |
| B       | null    | 50  |
| B       | Y       | 40  |
| B       | Z       | 1   |

Which query did the analyst execute in order to get this result?

- **A. 

```
SELECT
  group_1,
  group_2,
  sum(values) as sum
FROM my_table
GROUP BY group_1, group_2 INCLUDING NULL;
```**
- B. 

```
SELECT
  group_1,
  group_2,
  sum(values) as sum
FROM my_table
GROUP BY group_1, group_2 WITH CUBE;
```

```

SELECT
    group_1,
    group_2,
    sum(values) AS sum
FROM my_table
GROUP BY group_1, group_2;

```

• C.

```

SELECT
    group_1,
    group_2,
    sum(values) AS sum
FROM my_table
GROUP BY group_1, group_2 WITH ROLLUP;

```

• D.

**Answer: A**

#### NEW QUESTION # 65

Which of the following approaches can be used to ingest data directly from cloud-based object storage?

- A. Create an external table while specifying the DBFS storage path to PATH
- B. It is not possible to directly ingest data from cloud-based object storage
- C. Create an external table while specifying the object storage path to FROM
- **D. Create an external table while specifying the object storage path to LOCATION**
- E. Create an external table while specifying the DBFS storage path to FROM

**Answer: D**

Explanation:

External tables are tables that are defined in the Databricks metastore using the information stored in a cloud object storage location. External tables do not manage the data, but provide a schema and a table name to query the data. To create an external table, you can use the CREATE EXTERNAL TABLE statement and specify the object storage path to the LOCATION clause. For example, to create an external table named ext\_table on a Parquet file stored in S3, you can use the following statement:

SQL

```

CREATE EXTERNAL TABLE ext_table (
  col1 INT,
  col2 STRING
)

```

STORED AS PARQUET

LOCATION 's3://bucket/path/file.parquet'

AI-generated code. Review and use carefully. More info on FAQ.

#### NEW QUESTION # 66

Which of the following approaches can be used to ingest data directly from cloud-based object storage?

- A. Create an external table while specifying the DBFS storage path to PATH
- B. It is not possible to directly ingest data from cloud-based object storage
- C. Create an external table while specifying the object storage path to FROM
- **D. Create an external table while specifying the object storage path to LOCATION**
- E. Create an external table while specifying the DBFS storage path to FROM

**Answer: D**

Explanation:

External tables are tables that are defined in the Databricks metastore using the information stored in a cloud object storage location. External tables do not manage the data, but provide a schema and a table name to query the data. To create an external table, you

can use the CREATE EXTERNAL TABLE statement and specify the object storage path to the LOCATION clause. For example, to create an external table named ext\_table on a Parquet file stored in S3, you can use the following statement:

SQL

```
CREATE EXTERNAL TABLE ext_table (  
  col1 INT,  
  col2 STRING  
)
```

STORED AS PARQUET

LOCATION 's3://bucket/path/file.parquet'

AI-generated code. Review and use carefully. More info on FAQ.

## NEW QUESTION # 67

.....

There is no exaggeration that you can be confident about your coming exam just after studying with our Databricks-Certified-Data-Analyst-Associate preparation materials for 20 to 30 hours. Tens of thousands of our customers have benefited from our exam materials and passed their Databricks-Certified-Data-Analyst-Associate exams with ease. The data showed that our high pass rate is unbelievably 98% to 100%. Without doubt, your success is 100% guaranteed with our Databricks-Certified-Data-Analyst-Associate training guide. You will be quite surprised by the convenience to have an overview just by clicking into the link, and you can experience all kinds of Databricks-Certified-Data-Analyst-Associate versions.
