New 220-1101 Test Tips & 220-1101 Reliable Test Sims

After taking a bird's eye view of applicants' issues, DumpsMaterials has decided to provide them with the real 220-1101 Questions. These CompTIA 220-1101 dumps pdf is according to the new and updated syllabus so they can prepare for CompTIA A+ Certification Exam: Core 1 (220-1101) certification anywhere, anytime, with ease. A team of professionals has made the product of DumpsMaterials after much hard work with their complete potential so the candidates can prepare for CompTIA A+ Certification Exam: Core 1 (220-1101) practice test in a short time.

CompTIA 220-1101 (CompTIA A+ Certification Exam: Core 1) is an entry-level certification exam designed for individuals who want to establish their career in the information technology field. 220-1101 exam is the first step towards earning the CompTIA A+ certification, which is a globally recognized credential in the IT industry. 220-1101 exam tests the candidate's knowledge and skills in various areas such as hardware, software, networking, security, and troubleshooting. 220-1101 exam is ideal for individuals who want to succeed in their IT career and demonstrate their proficiency in the foundational concepts of IT.

To prepare for the exam, candidates can take advantage of various resources such as study guides, practice exams, and online courses. They can also gain hands-on experience through internships, apprenticeships, or working in an IT environment. 220-1101 Exam is available in multiple languages, including English, German, Japanese, Portuguese, and Spanish.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q136-Q141):

NEW QUESTION # 136
A user reports limited or no connectivity on a laptop. A technician runs ipconfig /all with the following result:
IPv4 connectivity...limited or none
IPv4 address...169.254.254.1
subnet mask...255.255.0.0
default gateway...
Which of the following is the MOST likely cause of this issue?

- A. DNS resolution
- B. ARP cache
- C. DHCP failure
- D. Duplicate IP address

Answer: C

NEW QUESTION # 137
When installing a network printer, a technician needs to ensure the printer is available after a network is restarted. Which of the following should the technician set up on the printer to meet this requirement?

- A. Private address
- B. Static IP address
- C. Dynamic addressing
- D. Wi-Fi on the printer

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:
Assigning a static IP address to a network printer ensures it always retains the same address, allowing users and print servers to consistently reach it even after a reboot or network refresh.
* Option B (Private address): Refers to address ranges (e.g., 192.168.x.x) - doesn't guarantee address persistence.
* Option C (Wi-Fi): Is a connection method, not a method of IP assignment.
* Option D (Dynamic addressing): Via DHCP, which can change over time unless reservations are made (less reliable).
CompTIA A+ Core 1 Exam Objective Reference:
* Objective 3.4: Given a scenario, install and configure printers.

NEW QUESTION # 138
Which of the following 802.11 Wi-Fi protocols utilizes the 5.0GHz frequency and has the BEST speed and reception?

- A. 802.11b/g/n
- B. 802.11 ax
- C. 802.11a
- D. 802.11n

Answer: B

Explanation:
Explanation
802.11 ax is a wireless networking protocol that utilizes the 5.0GHz frequency and has the best speed and reception among the options given. 802.11 ax offers higher data rates, lower latency, increased capacity, and improved power efficiency than previous protocols. It is also known as Wi-Fi 6 or High Efficiency Wireless (HEW). 802.11a also uses the 5.0GHz frequency, but it is an older protocol that has lower speed and reception than 802.11 ax. 802.11b/g/n use the 2.4GHz frequency, which is more crowded and prone to interference than the 5.0GHz frequency. 802.11n can use both frequencies, but it is also slower and less efficient than 802.11 ax.

NEW QUESTION # 139
A customer has contacted you about building two new desktops. The first desktop will be a gaming workstation. The customer requirements include:
Playing the newest games at a high frame rate
Fast game load times
Enough storage to have several games installed at once
High-end audio
No concern about cost
Running the current Windows OS
The second workstation will be a family workstation. The requirements include:
Capability for word processing, videoconferencing, and basic web surfing Minimal cost, as long as it meets the requirements Running the current Windows OS

NEW QUESTION # 140
A technician needs to fix a computer that received a non-specific error after a scheduled computer restart. Which of the following is the best way to start troubleshooting?

- A. Update all of the firmware.
- B. Review the system event log.
- C. Search for the error on the internet.
- D. Roll back all of the recent updates.

Answer: B

Explanation:
The best way to start troubleshooting a non-specific error after a scheduled computer restart is to review the system event log. The system event log is a record of significant events that occur on the computer, such as errors, warnings, or information messages. The system event log can help identify the cause of the error and provide possible solutions.
