You will receive C-SEC-2405 exam materials immediately after your payment is successful, and then, you can use C-SEC-2405 test guide to learn. Everyone knows that time is very important and hopes to learn efficiently, especially for those who have taken a lot of detours and wasted a lot of time. Once they discover C-SEC-2405 study braindumps, they will definitely want to seize the time to learn. However, students often purchase materials from the Internet, who always encounters a problem that they have to waste several days of time on transportation, especially for those students who live in remote areas. But with C-SEC-2405 Exam Materials, there is no way for you to waste time. The sooner you download and use C-SEC-2405 study braindumps, the sooner you get the certificate.

SAP Certified Associate - Security Administrator Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which of the following rules does SAP recommend you consider when you define a role-naming convention for an SAP S/4HANA on-premise system? Note: There are 3 correct answers to this question.

- A. Role names are system language-independent
- B. Role names can be no longer than 20 characters
- C. Role names are system language-dependent
- D. Role names can be no longer than 30 characters
- E. Role names must NOT start with "SAP"

Answer: A,D,E

Explanation:

When defining a role-naming convention in an SAP S/4HANA on-premise system, SAP recommends the following rules:

- * Role Names Must NOT Start with "SAP" (A):
- * The prefix "SAP" is reserved for standard roles delivered by SAP.
- * Custom roles should use a different prefix to avoid confusion and potential conflicts during upgrades or support packages.
- * Role Names Are System Language-Independent (B):
- * Role names should be consistent across different language settings.
- * Using language-independent names ensures that roles are easily identifiable and maintainable regardless of the system's logon language.
- * Role Names Can Be No Longer Than 30 Characters (E):
- * The maximum length for role names is 30 characters.
- * Keeping within this limit ensures compatibility with SAP standards and avoids issues in role assignment and maintenance.

SAP Security References:

- * SAP Help Portal: Guidelines for Role Administration
- * SAP Note: Role Naming Standards in SAP Systems

NEW QUESTION # 15

Which of the following allow you to control the assignment of table authorization groups? Note:
There are 2 correct answers to this question.

- A. SSM_CUST
- B. PRGN_CUST
- C. V_DDAT_54
- D. V_BRG_54

Answer: B,D

NEW QUESTION # 16

What does SAP recommend you do when you transport a custom leading business role in SAP S/4HANA Cloud Public Edition?

- A. Add the pre-delivered business role that was used as a template to create the custom leading business role to the Software Collection.
- B. Add all derived business roles as dependencies to the Software Collection.
- C. Add all other leading business roles from the same Line of Business as dependencies to the Software Collection.

Answer: A

Explanation:

When transporting a custom leading business role in SAP S/4HANA Cloud Public Edition:

* Include the Template Role (C):

* SAP recommends adding the pre-delivered business role (template) to the software collection.

This ensures that all dependencies and baseline configurations are included during the transport.

* Maintain Consistency:

* Adding the template role ensures that the custom role remains functional across environments and avoids issues related to missing dependencies.

SAP Security References:

* SAP Help Portal: Role Transport Guidelines in SAP S/4HANA Cloud

* SAP Note: Transporting Custom Business Roles

NEW QUESTION # 17

In which order do you define the security-relevant objects in SAP BTP?

- A. Role3
- B. Role collection
- C. Role template

Answer: A,B,C

Explanation:

* Context: In SAP Business Technology Platform (BTP), defining security-relevant objects follows a hierarchical process for managing access.

* Order Explanation:

* Role template: Defines permissions at a granular level.

* Role collection: Groups role templates for easier assignment.

* Role: Represents the combination of permissions granted to users or services.

SAP Security References:

* SAP BTP Role Management Documentation

* SAP Help Portal for BTP Security Configurations

NEW QUESTION # 18

For users with system administration authorization, which additional functions are provided by the SAP Easy Access menu? Note:
There are 2 correct answers to this question.

- A. Creating users
- B. Calling programs

- C. Calling menus for roles and assigning them to users
- D. Creating roles

Answer: A,D

Explanation:

In SAP systems, users with system administration authorization have access to additional functions in the SAP Easy Access menu to manage system security and user administration. The menu includes options for creating roles, allowing administrators to use transaction PFCG to define and maintain authorization roles, which are critical for assigning permissions to users based on their job functions. Additionally, the menu provides access to creating users, enabling administrators to use transaction SU01 to set up user master records, including user IDs, passwords, and role assignments. These functions are essential for managing access control and ensuring system security. Calling menus for roles and assigning them to users is not a specific function of the Easy Access menu, as role assignment is typically performed within SU01 or PFCG.

Calling programs is a general user function, not exclusive to administrators. These administrative capabilities in the Easy Access menu streamline security management tasks in SAP environments.

NEW QUESTION # 19
