Valid Exam API-936 Questions Answers Help You Clear Your API-936: Refractory Personnel Exam Surely

The company is preparing for the test candidates to prepare the API-936 Study Materials professional brand, designed to be the most effective and easiest way to help users through their want to get the test API-936 certification and obtain the relevant certification. In comparison with similar educational products, our training materials are of superior quality and reasonable price, so our company has become the top enterprise in the international market.

API 936 is a certification program designed for refractory personnel who are responsible for the inspection, testing, and installation of refractory materials used in various industries such as petrochemical, power generation, and steel production. Refractory Personnel certification exam is conducted by the American Petroleum Institute (API), which is a well-known organization in the oil and gas industry. The API 936 certification program is globally recognized, and passing the exam demonstrates that the candidate has the necessary knowledge and skills to perform refractory-related tasks.

API-936 (Refractory Personnel) Exam is a certification program that is designed for individuals who work in the field of refractory installation in various industries such as oil and gas, petrochemical, power generation, and steel. Refractory Personnel certification program is offered by the American Petroleum Institute (API) and is recognized globally as a standard for refractory personnel.

API Refractory Personnel Sample Questions (Q58-Q63):

NEW QUESTION # 58
Applicator qualification for thin layer erosion resistant lining, each applicator shall pack a test panel of size.

- A. 500 x 500 x 25mm
- B. None of the above
- C. 12" x 12" x ¾ or 1" (300 x 300 x 20 or 25mm)
- D. 450 x 450 x 50 mm

Answer: C

NEW QUESTION # 59
To compose a sample for the CCS test from an equivalent number of refractory shapes the specimen should be

- A. None of the above
- B. At least five
- C. At least three
- D. At least four

Answer: B

NEW QUESTION # 60
A refractory materials, stiffer than plastic, that cannot be extruded but has suitable properties to permit ramming into place to form a monolithic structure

- A. None of the above
- B. Monolithic refractory
- C. Ramming mix
- D. Plastic refractory

Answer: C

NEW QUESTION # 61
Materials having refractory properties which form a refractory body when bonded into a conglomerate mass by a matrix is called

- A. None of the above
- B. Refractory aggregate
- C. Refractory mass
- D. Cementitious concrete

Answer: B

NEW QUESTION # 62
What abrading media is required in the ASTM C-704 abrasion-resistant test?

- A. Silicon nitride
- B. FCCU catalyst
- C. Silicon carbide
- D. Alumina grit

Answer: C

Explanation:
ASTM C704 specifiessilicon carbideas the standard abrasive media used in the abrasion resistance test for refractories. This test simulates service wear caused by mechanical erosion (e.g., in FCC units). Silicon carbide is used because of its consistent hardness, angularity, and wear characteristics that represent severe operational conditions.
Reference:
API Std 936 references ASTM C704 for erosion-resistant testing and confirms silicon carbide as the specified media.

API TR 977 also documents improvements to test reproducibility with silicon carbide use

NEW QUESTION # 63

......

The most notable feature of the API-936 learning quiz is that they provide you with the most practical solutions to help you learn the exam points of effortlessly and easily, then mastering the core information of the certification course outline. Their quality is much higher than the quality of any other materials, and questions and answers of API-936 Training Materials contain information from the best available sources. Whether you are newbie or experienced exam candidates, our API-936 study guide will relieve you of tremendous pressure and help you conquer the difficulties with efficiency.
