New GH-100 Test Voucher, GH-100 Reliable Dumps Sheet

Availability in different formats is one of the advantages valued by GitHub Administration test candidates. It allows them to choose the format of Microsoft GH-100 Dumps they want. They are not forced to buy one format or the other to prepare for the Microsoft GH-100 Exam. PrepAwayETE designed GitHub Administration exam preparation material in Microsoft GH-100 PDF and practice test (online and offline). If you prefer PDF Dumps notes or practicing on the Microsoft GH-100 practice test software, use either.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.
Topic 2	- Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI - CD pipelines.

Topic 3	• Enable secure software development and ensure compliance: This section of the exam measures skills of GitHub Enterprise Administrators and deals with applying GitHub's security and compliance capabilities. It covers policies, auditing, scrubbing sensitive data, secret scanning, code scanning with CodeQL, dependency management with Dependabot, and implementing security response plans. It also explores authentication tokens, app security policies, and enterprise managed users.
Topic 4	• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.

Microsoft GitHub Administration Sample Questions (Q38-Q43):

NEW QUESTION # 38

How does Dependabot determine which security update PRs to open?

- A. It waits for manual triage of all CVEs.
- B. It reads the GitHub Issues and automatically suggests fixes.
- **C. It uses the dependency graph and Dependabot alerts to open PRs for patched versions.**
- D. It compares your codebase to the GitHub Trending list.

Answer: C

Explanation:

Dependabot relies on your repository's enabled Dependency Graph and Dependabot Alerts to identify vulnerable dependencies; it then automatically opens pull requests to update to the patched versions that resolve those alerts.

NEW QUESTION # 39

What distinguishes Enterprise Managed Users (EMUs) from standard GitHub accounts?

- A. EMUs are only available for GitHub Enterprise Server
- B. EMUs are managed in GitHub and use GitHub authentication
- **C. EMUs are fully controlled by an IdP and cannot log in with personal credentials**
- D. EMUs can only be created using email invites

Answer: C

Explanation:

EMU accounts are provisioned and authenticated exclusively through your identity provider - users sign in via the IdP and cannot use or manage GitHub-native credentials.

NEW QUESTION # 40

How does metered billing work in GitHub Enterprise Cloud with Enterprise Managed Users (EMU)?

- A. Billing is based on total users in the enterprise that are not dormant
- B. Billing is based on the number of users created in Azure AD
- **C. Billing is based on number of total users in the enterprise**
- D. Billing is based on owners and members of GitHub organizations

Answer: C

Explanation:

Billing for GitHub Enterprise Cloud under metered (usage-based) billing is calculated by the total number of Enterprise Managed Users (and other license-consuming accounts) in your enterprise - each EMU consumes a seat and contributes to the monthly bill.

NEW QUESTION # 41

When a user becomes a member of multiple GitHub organizations, which THREE of the following are important considerations for administrators? (Choose three.)

- A. The user will have different permission levels in each organization.
- B. The user will automatically have the same role across all organizations.
- C. The user's profile information becomes private to non-organization members.
- D. The user will need to authorize credentials separately for each SAML-enabled organization.
- E. The user's repository access and/or team membership needs to be managed separately for each organization.
- F. The user's personal repositories will become accessible to all organizations.

Answer: A,D,E

Explanation:

A user's repository access and team memberships are scoped to each organization, so admins must configure permissions separately per org.

When an organization enforces SAML SSO, each member must authorize their personal access tokens or SSH keys for that org, requiring separate approval for each SAML-enabled organization. Roles and permission levels (owner, member, billing manager, repository roles, etc.) are assigned on a per-organization basis, so a user often has different permissions in different organizations.

NEW QUESTION # 42

You are managing a repository in your organization's GitHub account. A team member asks you to confirm who has access to the repository and their permission levels. Which tool should you use to review and manage repository access?

- A. GitHub Actions Logs.
- B. Branch Protection Rules.
- C. GitHub Pages Settings.
- D. Repository Settings > Manage Access.

Answer: D

Explanation:

Use the Repository Settings Manage Access page to view all users and teams with access and their assigned permission levels.

NEW QUESTION # 43

.....

As we all know, time for preparing a exam is quite tight. Once you have signed up for the exam, you need to prepare. Therefore improving the efficiency is quite necessary. Our GH-100 training materials include the main knowledge point of the exam, which will help you to know the main knowledge. Besides the professionals check the GH-100 at time, it can ensure the accuracy of the answers. Therefore, please make it easy to use the GH-100 training materials freely.
