Test Salesforce Salesforce-MuleSoft-Developer-I Free & Salesforce-MuleSoft-Developer-I Latest Materials

Our Salesforce-MuleSoft-Developer-I quiz torrent can provide you with a free trial version, thus helping you have a deeper understanding about our Salesforce-MuleSoft-Developer-I test prep and estimating whether this kind of study material is suitable to you or not before purchasing. With the help of our trial version, you will have a closer understanding about our Salesforce-MuleSoft-Developer-I Exam Torrent from different aspects, ranging from choice of three different versions available on our test platform to our after-sales service. After you have a try on our Salesforce-MuleSoft-Developer-I exam questions, you will love to buy it.

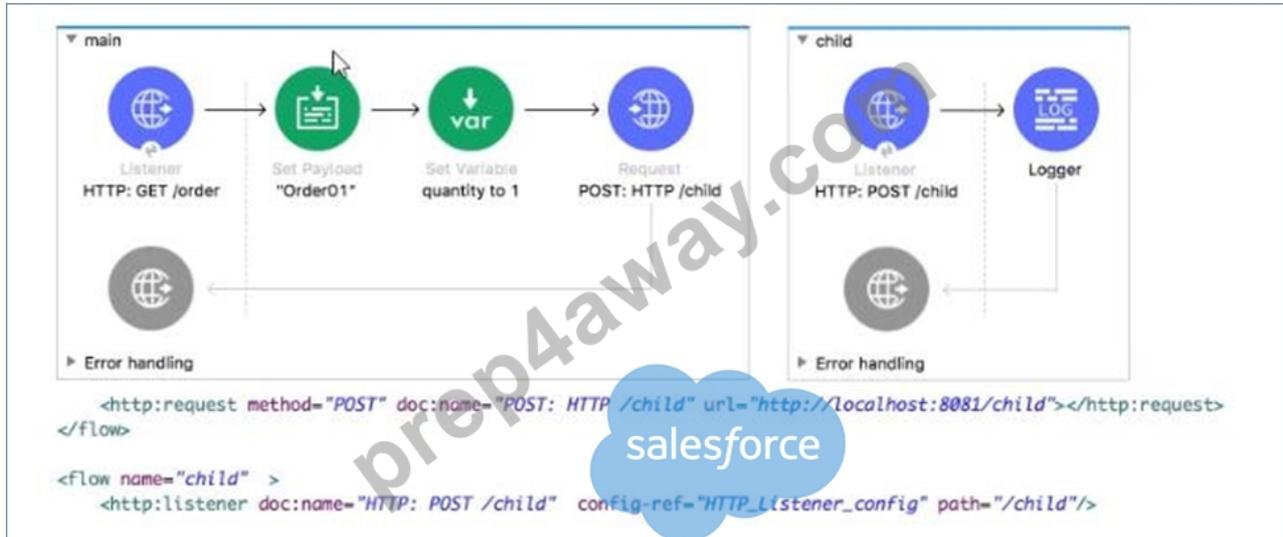

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.
Topic 2	<ul style="list-style-type: none"> Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.
Topic 3	<ul style="list-style-type: none"> Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.
Topic 4	<ul style="list-style-type: none"> Using Connectors: It focuses on retrieving data from REST services using HTTP Request or REST Connector. Moreover, the topic covers using a Web Service Consumer connector for SOAP web services and the Transform Message component.
Topic 5	<ul style="list-style-type: none"> Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.
Topic 6	<ul style="list-style-type: none"> Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.
Topic 7	<ul style="list-style-type: none"> Deploying and Managing APIs and Integrations: It includes packaging Mule applications for deployment and deploying them to CloudHub. This topic also involves using CloudHub properties, creating and deploying API proxies, connecting an API implementation to API Manager, and applying policies to secure an API.
Topic 8	<ul style="list-style-type: none"> Processing Records: Processing records includes methods for processing individual records in a collection and explaining how Mule events are processed by the For Each scope. It also involves using the Batch Job with Batch Steps and a Batch Aggregator.
Topic 9	<ul style="list-style-type: none"> Structuring Mule Applications: Structuring Mule applications covers parameterizing an application and defining and reusing global configurations. It includes breaking an application into multiple flows using private flows, subflows, and the Flow Reference component.
Topic 10	<ul style="list-style-type: none"> Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.
Topic 11	<ul style="list-style-type: none"> Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q119-Q124):

NEW QUESTION # 119

Refer to the exhibits.

The main flow contains an HTTP Request. The HTTP Listeners and HTTP Request use default configurations.

What values are accessible in the child flow after a web client submits a request to `http://localhost:8081/order?` `col` or `red`?

- A. payload
quantity var color query param
- B. payload
color query param
- C. payload
quantity var
- D. payload
quantity var

Answer: A

NEW QUESTION # 120

An API instance of type API endpoint with API proxy is created in API manager using an API specification from Anypoint Exchange. The API instance is also configured with an API proxy that is deployed and running in CloudHub.

An SLA- based policy is enabled in API manager for this API instance.

Where can an external API consumer obtain a valid client ID and client secret to successfully send requests to the API proxy?

- A. In Anypoint Studio, from components generated by Rest Connect for API specification
- B. In the organization's public API portal in Anypoint Exchange, from an approved client application for the API proxy
- C. In Runtime Manager, from the properties tab of the deployed approved API proxy
- D. In Anypoint Studio, from components generated by APIkit for the API specification

Answer: B

Explanation:

* When a client application is registered in Anypoint Platform, a pair of credentials consisting of a client ID and client secret is generated.

* When the client application requests access to an API, a contract is created between the application and that API.

* An API that is protected with a Client ID Enforcement policy is accessible only to applications that have an approved contract.

----- Correct Answer: In the organization's public API portal in Anypoint Exchange, from

NEW QUESTION # 121

What path setting is required for an HTTP Listener endpoint to route all requests to an APIkit router?

- A. /()
- B. /
- C. /(*)
- D. !/*!

Answer: D

Explanation:

Option1 is correct syntax to configure HTTP Listener endpoint

NEW QUESTION # 122

Refer to the exhibits.

The mule application implements a REST API that accepts GET request from two URL's which are as follows

1)http://acme.com/order/status

2)

http://acme.com/customer/status

What path value should be set in HTTP listener configuration so that requests can be accepted for both these URL's using a single HTTP listener event source?

The screenshot shows the configuration interface for an HTTP listener. The 'Path' field is empty, and an error message 'Attribute 'path' is required' is displayed. The connector configuration is 'HTTP_Listener_config'. The interface includes tabs for 'HTTP Get', 'Console', and 'Problems'. A watermark 'salesforce' and 'prep4away.com' are visible over the image.

- A. *[order,customer]/status
- B. *status
- C. */status
- D. ?[order,customer]/status

Answer: C

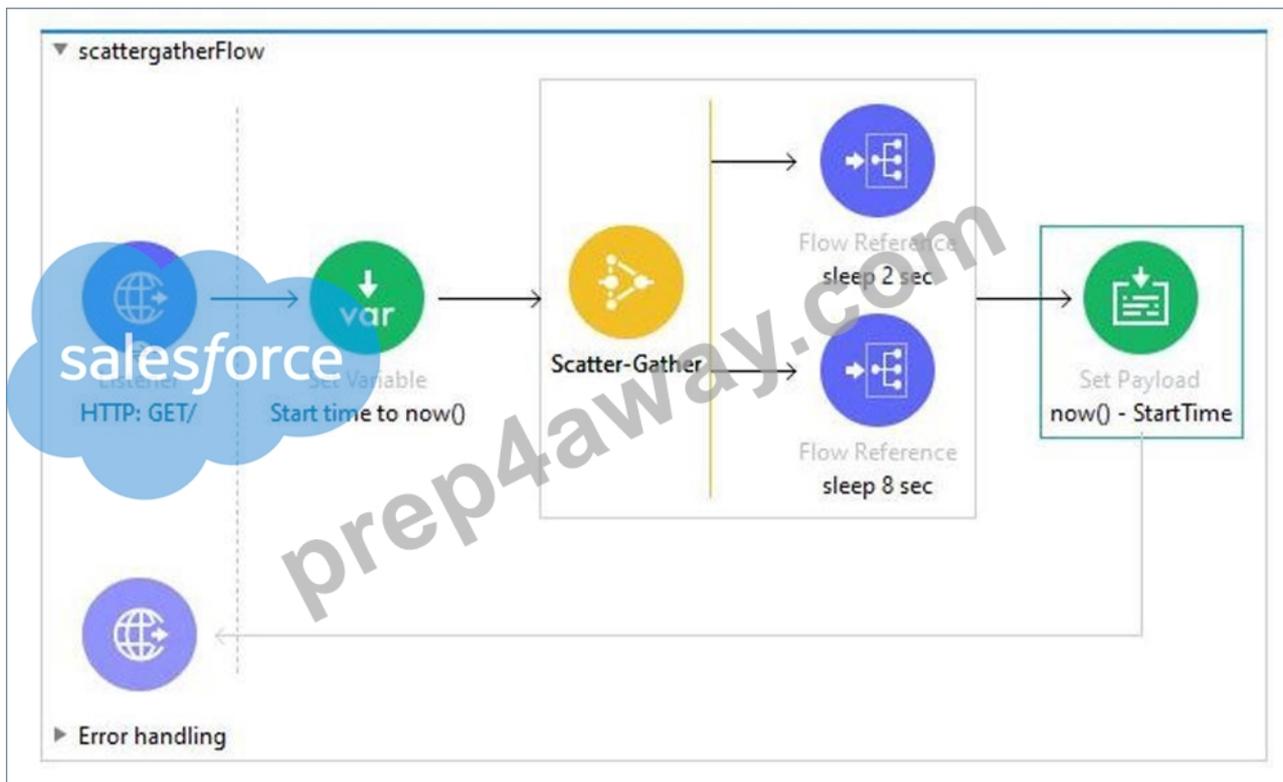

Explanation:

Correct answer is */status as it is the correct way to use wildcards while configuring path value in HTTP listener

NEW QUESTION # 123

In the execution of scatter gather, the "sleep 2 sec" Flow Reference takes about 2 sec to complete, and the "sleep 8 sec" Flow Reference takes about 8 sec to complete.

About how many sec does it take from the Scatter-Gather is called until the "Set Payload" transformer is called?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

Correct answer is 8 as events are processed in parallel in case of scatter gather router

NEW QUESTION # 124

.....

We provide the free demos before the clients decide to buy our Salesforce-MuleSoft-Developer-I study materials. The clients can visit our company's website to have a look at the demos freely. Through looking at the demos the clients can understand part of the contents of our Salesforce-MuleSoft-Developer-I study materials, the form of the questions and answers and our software, then confirm the value of our Salesforce-MuleSoft-Developer-I Study Materials. If the clients are satisfied with our Salesforce-MuleSoft-Developer-I study materials they can purchase them immediately. They can avoid spending unnecessary money and choose the most useful and efficient Salesforce-MuleSoft-Developer-I study materials.
