Just as an old saying goes, it is better to gain a skill than to be rich. Contemporarily, competence far outweighs family backgrounds and academic degrees. One of the significant factors to judge whether one is competent or not is his or her NetSec-Pro certificates. Generally speaking, NetSec-Pro certificates function as the fundamental requirement when a company needs to increase manpower in its start-up stage. In this respect, our NetSec-Pro practice materials can satisfy your demands if you are now in preparation for a NetSec-Pro certificate.

Are you interested in DumpExam NetSec-Pro pdf torrent? You know, most of IT candidates choose Palo Alto Networks NetSec-Pro for preparation for their exam test. Yes, we provide you with the comprehensive and most valid NetSec-Pro study material. We say valid because we check the update every day, so as to ensure the NetSec-Pro Exam Dump offered to you is the latest and best. With NetSec-Pro updated training pdf, you can pass your NetSec-Pro actual exam at first attempt.

Pass Guaranteed Quiz 2025 Palo Alto Networks Professional Top NetSec-Pro Questions

At present, Palo Alto Networks NetSec-Pro exam really enjoys tremendous popularity. As far as you that you have not got the certificate, do you also want to take NetSec-Pro test? Palo Alto Networks NetSec-Pro certification test is really hard examination. But it doesn't mean that you cannot get high marks and pass the exam easily. What is the shortcut for your exam? Do you want to know the test taking skills? Now, I would like to tell you making use of DumpExam NetSec-Pro Questions and answers can help you get the certificate.

Palo Alto Networks Network Security Professional Sample Questions (Q39-Q44):

NEW QUESTION # 39

Which two security services are required for configuration of NGFW Security policies to protect against malicious and misconfigured domains? (Choose two.)

- A. Advanced DNS Security
- B. Advanced Threat Prevention
- C. SaaS Security
- D. Advanced WildFire

Answer: A,B

Explanation:

Protecting against malicious and misconfigured domains requires two critical services:

Advanced Threat Prevention

Provides signature-based and advanced analysis to identify threats, including DNS-based attacks.

"Advanced Threat Prevention enables the NGFW to detect and prevent exploits and malware-based communications, including those leveraging DNS." (Source: Advanced Threat Prevention) Advanced DNS Security Specifically designed to detect and sinkhole malicious and misconfigured DNS queries.

"DNS Security uses real-time intelligence to block DNS-based threats, protect against data exfiltration, and automatically sinkhole suspicious domain lookups." (Source: DNS Security) By combining these services in security policies, NGFWs ensure robust protection against domain-based threats and misconfigurations.

NEW QUESTION # 40

How does Strata Logging Service help resolve ever-increasing log retention needs for a company using Prisma Access?

- A. Log traffic using the licensed bandwidth purchased for Prisma Access reduces overhead.
- B. Automatic selection of physical data storage regions decreases adoption time.
- C. It can scale to meet the capacity needs of new locations as business grows.
- D. It increases resilience due to decentralized collection and storage of logs.

Answer: C

Explanation:

The Strata Logging Service offers scalable log storage to accommodate data growth, which ensures organizations can retain logs for compliance and threat hunting as their environments expand.

"The Strata Logging Service is designed to scale dynamically to accommodate growing log retention needs, allowing enterprises to maintain comprehensive visibility as they expand their network footprint." (Source: Strata Logging Service Overview)

NEW QUESTION # 41

After a firewall is associated with Strata Cloud Manager (SCM), which two additional actions are required to enable management of the firewall from SCM? (Choose two.)

- A. Configure NTP and DNS servers for the firewall.
- B. Deploy a service connection for each branch site and connect with SCM.
- C. Install a device certificate.
- D. Configure a Security policy allowing "stratacloudmanager.paloaltonetworks.com" for all users.

Answer: A,C

Explanation:

To fully manage a firewall from Strata Cloud Manager (SCM), it's essential to establish trust and ensure reliable connectivity:
Configure NTP and DNS servers

The firewall must have accurate time (NTP) and name resolution (DNS) to securely communicate with SCM and related cloud services.

"To ensure successful management, configure the firewall's NTP and DNS settings to synchronize time and resolve domain names such as stratacloudmanager.paloaltonetworks.com." (Source: SCM Onboarding Requirements) Install a device certificate A device certificate authenticates the firewall's identity when connecting to SCM.

"The device certificate authenticates the firewall to Palo Alto Networks cloud services, including SCM. It's a fundamental requirement to establish secure connectivity." (Source: Device Certificates) These steps ensure trust, secure communication, and successful onboarding into SCM.

NEW QUESTION # 42

How can a firewall administrator block a list of 300 unique URLs in the most time-efficient manner?

- A. Use application filters to block the App-IDs.
- B. Use application groups to block the App-IDs.
- C. Import the list into a custom URL category.
- D. Block multiple predefined URL categories.

Answer: C

Explanation:

For large lists of specific URLs, creating a custom URL category and importing the list is the most efficient approach for granular URL filtering.

"You can create custom URL categories to define specific URLs or patterns and enforce policies for these categories. This is the most efficient way to handle large sets of URLs." (Source: Custom URL Categories) This approach saves time compared to manual rule creation or using generic application filters.

NEW QUESTION # 43

Which GlobalProtect configuration is recommended for granular security enforcement of remote user device posture?

- A. Configuring a rule that blocks the ability of users to disable GlobalProtect while accessing internal applications
- B. Implementing multi-factor authentication (MFA) for all users attempting to access internal applications
- C. Configuring host information profile (HIP) checks for all mobile users
- D. Applying log at session end to all GlobalProtect Security policies

Answer: C

Explanation:

Host Information Profile (HIP) checks are used in GlobalProtect to collect and evaluate endpoint posture (OS, patch level, AV status) to enforce granular security policies for remote users.

"The HIP feature collects information about the host and can be used in security policies to enforce posture-based access control. This ensures only compliant endpoints can access sensitive resources." (Source: GlobalProtect HIP Checks) This enables fine-grained, context-aware access decisions beyond user identity alone.

NEW QUESTION # 44

.....

In this hustling society, our NetSec-Pro study guide is highly beneficial existence which can not only help you master effective knowledge but pass the NetSec-Pro exam effectively. They have a prominent role to improve your soft-power of personal capacity and boost your confidence of conquering the exam with efficiency. As there are all keypoints in the NetSec-Pro Practice Engine, it is easy to master and it also helps avoid a waste of time for selecting main content.
