It is intended for individuals who have experience working with the Salesforce platform and have a solid understanding of healthcare operations and regulations. To become a Salesforce Health Cloud Accredited Professional, candidates must pass a challenging exam that tests their knowledge of these topics.

Salesforce Health Cloud Accredited Professional Sample Questions (Q52-Q57):

NEW QUESTION # 52

In which two ways can a Data Architect ensure PHI/PII data visibility is minimized during the migration of Patient Data from an existing Service Cloud org to a new HC org?(Choose 2)

- A. Use Data Templates to exclude PHI/PII data from being added to Partial Copy Sandboxes
- **B. Platform Shield enabled.**
- **C. Use Salesforce Data Masking when moving data to a Sandbox.**
- D. Export Data to a spreadsheet to remove PHI before importing it into a Sandbox
- E. Ensure Sandboxes have

Answer: B,C

NEW QUESTION # 53

A customer wants to view medication data from Health Cloud leveraging FHIR standards. Which Health Cloud data model should a consultant use?

- A. Electronic health record (EHR) data model
- B. Integrated Care Management data model
- C. Virtual Care data model
- **D. Clinical data model**

Answer: D

Explanation:

To view medication data from Health Cloud leveraging FHIR standards, a consultant should use the clinical data model. This data model is built to align with HL7's FHIR R4 and provides objects and fields to store and access clinical information such as medications, conditions, encounters, observations, and more⁶. The clinical data model also supports FHIR APIs to enable interoperability between Health Cloud and external systems that use FHIR standards⁷. Integrated Care Management data model, Electronic health record (EHR) data model, or Virtual Care data model are not data models that can fulfill this requirement.

NEW QUESTION # 54

Bloomington Caregivers needs to monitor care plan adherence for the patients at various facilities within its network. What is available to extend the reporting capability of Health Cloud?

- A. Insights for Health Cloud
- **B. CRM Analytics for Health Cloud**
- C. Reporting unmanaged package
- D. Care Management Extension

Answer: B

Explanation:

Step-by-Step

CRM Analytics for Health Cloud:

Exact Extract:

"CRM Analytics for Health Cloud delivers prebuilt dashboards and extended analytics for monitoring care plans, outcomes, and adherence across networks and facilities." Reference:

Why Not Other Options?

Insights for Health Cloud: Not a standard reporting/analytics product for care plan adherence.

Reporting unmanaged package: Not mentioned in the latest Health Cloud documentation.

Care Management Extension: Refers to process automation, not analytics.

NEW QUESTION # 55

A payer needs to connect an electronic health record (EHR) to Health Cloud to display key clinical data to Health Cloud users. The data in the source system is aligned to PHIR R4 standards, but some transformation is anticipated.

Which approach should a consultant use to set up this integration?

- A. A point-to-point API connection from the EHR to Health Cloud.
- B. A scheduled batch job that retrieves a file from an SFTP
- **C. A middleware integration solution that can handle data transformation if necessary.**
- D. A "swivel-chair" standard operating procedure document that will be distributed to users.

Answer: C

Explanation:

FHIR-Based Interoperability with Transformation:

* Exact Extract:

"Middleware solutions enable integration with EHRs using HL7 or FHIR standards and can perform necessary data transformation for compatibility with Health Cloud." Reference: Administer Health Cloud - Interoperability Other Options:

Batch jobs/SFTP and point-to-point APIs are not scalable or flexible for ongoing data transformation.

"Swivel-chair" procedures are not a technical integration.

NEW QUESTION # 56

A payer needs to manage requests for concurrent review of prior authorizations within Health Cloud and wants to use out-of-the-box record types and page layouts. However, the payer's Salesforce administrator does not see any preconfigured record types or page layouts for prior authorizations in the payer's Salesforce org.

What should a consultant recommend to the Salesforce administrator to expedite implementation?

- A. Install an AppExchange prior authorization package.
- B. Build custom page layouts and record types to support the requirement.
- C. Install the Health Cloud Claims unmanaged package.
- **D. Install the Health Cloud Care Request Extensions package.**

Answer: D

Explanation:

The Health Cloud Care Request Extensions package provides out-of-the-box record types and page layouts for prior authorizations, as well as other features for managing care requests.
