

Top PCCP Exam Tests 100% Pass | Professional PCCP: Palo Alto Networks Certified Cybersecurity Practitioner 100% Pass

What's more, part of that TorrentVCE PCCP dumps now are free: <https://drive.google.com/open?id=1J58LRiNYBmPPi6oniJfIMHuOVMZBQ44h>

One way to make yourself competitive is to pass the PCCP certification exams. Hence, if you need help to get certified, you are in the right place. TorrentVCE offers the most comprehensive and updated braindumps for Palo Alto Networks's certifications. To ensure that our products are of the highest quality, we have tapped the services of Palo Alto Networks experts to review and evaluate our PCCP Certification test materials. In fact, we continuously provide updates to every customer to ensure that our PCCP products can cope with the fast changing trends in PCCP certification programs.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.
Topic 2	<ul style="list-style-type: none">• Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.

Topic 3	<ul style="list-style-type: none"> Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.
Topic 4	<ul style="list-style-type: none"> Endpoint Security: This domain is aimed at an Endpoint Security Analyst and covers identifying indicators of compromise (IOCs) and understanding the limits of signature-based anti-malware. It includes concepts like User and Entity Behavior Analytics (UEBA), endpoint detection and response (EDR), and extended detection and response (XDR). It also describes behavioral threat prevention and endpoint security technologies such as host-based firewalls, intrusion prevention systems, device control, application control, disk encryption, patch management, and features of Cortex XDR.

TorrentVCE Commitment to Your Palo Alto Networks PCCP Exam Success

These formats are PCCP web-based practice test software, desktop practice exam software, and Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) PDF dumps files. All these three Palo Alto Networks PCCP exam questions formats are easy to use and compatible with all devices and the latest web browsers. Just choose the right Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) exam dumps format and start PCCP exam questions preparation today.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q37-Q42):

NEW QUESTION # 37

What differentiates knowledge-based systems from behavior-based systems?

- A. Knowledge-based systems pull from a previously stored database that distinguishes "bad". C. Knowledge-based systems try to find new, distinct traits to find "bad" things.
- B. Behavior-based systems find the data that knowledge-based systems store.
- C. Behavior-based systems pull from a previously stored database that distinguishes "bad".

Answer: A

Explanation:

Knowledge-based systems and behavior-based systems are two types of artificial intelligence systems that can be used for security purposes. Knowledge-based systems use a predefined database of rules, facts, and patterns that distinguish "bad" or malicious activities from normal ones. They compare the incoming data with the stored knowledge and flag any anomalies or matches. Behavior-based systems, on the other hand, learn from the observed data and establish a baseline of normal behavior. They then monitor the data for any deviations or changes from the baseline and alert on any suspicious or abnormal activities. References:

NEW QUESTION # 38

Which of the Cloud-Delivered Security Services (CDSS) will detect zero-day malware by using inline cloud machine learning (ML) and sandboxing?

- A. Advanced Threat Prevention
- B. Advanced WildFire
- C. DNS security
- D. IoT security

Answer: B

Explanation:

Advanced WildFire is a Cloud-Delivered Security Service (CDSS) that detects zero-day malware using inline cloud machine learning (ML) and sandboxing techniques. It analyzes unknown files in real-time to identify and block new threats before they can cause harm.

NEW QUESTION # 39

Which option is an example of a North-South traffic flow?

- A. An internal three-tier application
- B. Lateral movement within a cloud or data center
- **C. Client-server interactions that cross the edge perimeter**
- D. Traffic between an internal server and internal user

Answer: C

Explanation:

North-south refers to data packets that move in and out of the virtualized environment from the host network or a corresponding traditional data center. North-south traffic is secured by one or more physical form factor perimeter edge firewalls.

NEW QUESTION # 40

What are two capabilities of identity threat detection and response (ITDR)? (Choose two.)

- A. Securing individual devices
- **B. Scanning for excessive logins**
- **C. Analyzing access management logs**
- D. Matching risks to signatures

Answer: B,C**NEW QUESTION # 41**

How does Cortex XSOAR Threat Intelligence Management (TIM) provide relevant threat data to analysts?

- A. It performs SSL decryption to give visibility into user traffic.
- B. It creates an encrypted connection to the company's data center.
- **C. It automates the ingestion and aggregation of indicators.**
- D. It prevents sensitive data from leaving the network.

Answer: C

Explanation:

Cortex XSOAR Threat Intelligence Management (TIM) is a platform that enables security teams to manage the lifecycle of threat intelligence, from aggregation to action. One of the key features of Cortex XSOAR TIM is that it automates the ingestion and aggregation of indicators from various sources, such as threat feeds, open-source intelligence, internal data, and third-party integrations 1. Indicators are pieces of information that can be used to identify malicious activity, such as IP addresses, domains, URLs, hashes, etc. By automating the ingestion and aggregation of indicators, Cortex XSOAR TIM reduces the manual effort and time required to collect, validate, and prioritize threat data. It also enables analysts to have a unified view of the global threat landscape and the impact of threats on their network 1. References: 1: Threat Intelligence Management - Palo Alto Networks 2

NEW QUESTION # 42

.....

The trick to the success is simply to be organized, efficient, and to stay positive about it. If you are remain an optimistic mind all the time when you are preparing for the PCCP exam, we deeply believe that it will be very easy for you to successfully pass the exam,

and get the related certification in the near future. Of course, we also know that how to keep an optimistic mind is a question that is very difficult for a lot of people to answer. Because the PCCP Exam is so difficult for a lot of people that many people have a failure to pass the exam. As is known to us, where there is a will, there is a way. We believe you will get wonderful results with the help of our PCCP exam questions.
