What is the only assignable privilege for the Privileges on Users type?

- A. STRUCTUREDPRIILEGE ADMIN
- B. ATTACH DEBUGGER
- C. CATALOG READ
- D. AUDIT OPERATOR

**Answer: C**

Explanation:

In the context of SAP HANA user management, privileges define the actions that users can perform within the system. For the specific type "Privileges on Users," the correct and only assignable privilege is:

\* CATALOG READ (C): This privilege allows the user to view the catalog objects within the SAP HANA database. It is crucial for roles requiring visibility into the database structure and metadata without granting broader administrative or operational permissions. This privilege ensures that users can access necessary information while adhering to the principles of least privilege, maintaining security and compliance. Other options such as ATTACH DEBUGGER (A), STRUCTUREDPRIILEGE ADMIN (B), and AUDIT OPERATOR (D) do not apply under "Privileges on Users" as they serve different administrative or functional purposes within SAP HANA's security model.
