Valid 156-315.81 Test Blueprint - Reliable 156-315.81 Test Pattern

The Check Point Certified Security Expert R81 156-315.81 certification offers a great opportunity for beginners and professionals to demonstrate their skills and abilities to perform a certain task. For the complete, comprehensive, for Check Point Certified Security Expert R81 156-315.81 Exam Preparation you can get assistance from Check Point Certified Security Expert R81 Exam Questions.

The CheckPoint 156-315.81 Exam is rigorous and comprehensive, involving a two-hour course that includes checking your practical knowledge of Check Point security technologies. To perform optimally in the exam, one has to engage in continued learning and practice, polishing their skills in information security, networking, and computer systems. Grasping cyber threat methodologies and how hackers exploit them will also be vital in passing the certification exam.

CheckPoint Check Point Certified Security Expert R81 Sample Questions (Q220-Q225):

NEW QUESTION # 220

According to out of the box SmartEvent policy, which blade will automatically be correlated into events?

- A. Firewall
- B. HTTPS
- **C. IPS**
- D. VPN

Answer: C

Explanation:

Explanation

According to out of the box SmartEvent policy, the blade that will automatically be correlated into events is IPS. IPS (Intrusion Prevention System) is a blade that detects and prevents network attacks by inspecting traffic and applying signatures and protections. SmartEvent correlates IPS logs into events based on predefined event definitions, such as IPS Attack, IPS Attack High Confidence, IPS Attack Critical Confidence, etc. The other blades are not automatically correlated into events by default, but they can be added to the SmartEvent policy manually. References: [SmartEvent Policy]

NEW QUESTION # 221

What is the main objective when using Application Control?

- A. To filter out specific content.
- B. To assist the firewall blade with handling traffic.
- C. To see what users are doing.
- D. Ensure security and privacy of information.

Answer: D

Explanation:

The main objective when using Application Control is to ensure security and privacy of information. Application Control is a blade that enables administrators to control access to web applications and web sites based on categories, users, groups, machines, and time. Application Control can also block or limit usage of applications that pose security risks or consume excessive bandwidth.

NEW QUESTION # 222

What is the base level encryption key used by Capsule Docs?

- A. SHA-256
- B. AES
- C. RSA 1024
- D. RSA 2048

Answer: D

Explanation:

The base level encryption key used by Capsule Docs is RSA 2048. This means that Capsule Docs uses a 2048-bit RSA public key encryption algorithm to encrypt and decrypt documents. RSA is an asymmetric encryption algorithm that uses two keys: a public key that can be shared with anyone, and a private key that must be kept secret. AES, SHA-256, and RSA 1024 are not the base level encryption keys used by Capsule Docs. Reference: : Check Point Software, Getting Started, Capsule Docs Encryption.

NEW QUESTION # 223

What information is NOT collected from a Security Gateway in a Cpinfo?

- A. Configuration and database files
- B. System message logs
- C. OS and network statistics
- D. Firewall logs

Answer: D

Explanation:

In a Cpinfo (Checkpoint information) command, various information is collected from a Security Gateway. However, firewall logs are NOT collected from a Security Gateway in a Cpinfo.

A) Firewall logs

The Cpinfo command typically collects information such as configuration and database files, system message logs, OS and network statistics, but it does not include firewall logs. Firewall logs are usually obtained separately using other methods or tools.

NEW QUESTION # 224

Which of the following is NOT a VPN routing option available in a star community?

- A. To center only.
- B. To satellites through center only.
- C. To center, or through the center to other satellites, to Internet and other VPN targets.
- D. To center and to other satellites through center.

Answer: A,B
