Reliable C-C4H22-2411 - SAP Certified Associate - Implementation Consultant - SAP Emarsys Latest Dumps Pdf

The contents of C-C4H22-2411 study materials are all compiled by industry experts based on the examination outlines and industry development trends over the years. And our C-C4H22-2411 exam guide has its own system and levels of hierarchy, which can make users improve effectively. Our C-C4H22-2411 learning dumps can simulate the real test environment. After the exam is over, the system also gives the total score and correct answer rate.

SAP C-C4H22-2411 Exam Syllabus Topics:

Topic	Details

Topic 1	Managing Clean Core: This section evaluates the ability of IT Solution Architects to apply clean core principles to ERP systems. It emphasizes maximizing business process agility, reducing adaptation efforts, and accelerating innovation.
Topic 2	Data Collection and Contact Management: Aimed at Data Center Network Engineers, this section focuses on contact management, block lists, Smart Insight, Web Extend, relational data, and plug-in onboarding for platforms like SAP Commerce, SAP Customer Data Platform, and Magento. It assesses the ability to effectively describe, explain, and utilize these components.
Topic 3	Account Creation and Settings: This section targets IT Solution Architects, covering the provisioning of environments and configuration of various settings. It includes contact data integration, DNS settings, SSL certificates, email channel setup and compliance, account security settings, and channel setup. The focus is on describing, explaining, and configuring these elements.
Topic 4	Data Integrations Advanced: Designed for Data Center Network Engineers, this section delves into advanced data integration techniques. It encompasses store data onboarding (CSV), product data integration (URL, Google Tag Manager), sales data onboarding (APIs), customer data onboarding (APIs, CSV), Predict, and the SAP Customer Data Platform connector. The emphasis is on describing and explaining these integration methods.

SAP Certified Associate - Implementation Consultant - SAP Emarsys Sample Questions (Q19-Q24):

NEW QUESTION # 19

What key details do you need to provide to activate the email channel? Note: There are 3 correct answers to this question.

- A. Historic sales information
- B. Product information
- C. Sending volumes
- D. Tenant name and region
- E. Sender domain(s)

Answer: C,D,E

Explanation:

To activate the email channel in SAP Emarsys:

- * Option A (Sending volumes):Correct. Expected send volumes are required for capacity planning and compliance.
- * Option D (Sender domain(s)):Correct. Domains for sending emails must be specified and authenticated (e.g., DKIM, SPF).
- * Option E (Tenant name and region):Correct. Tenant details identify the account and region for setup.
- * Option B:Incorrect. Product info is for catalogs, not email activation.
- * Option C:Incorrect. Sales data is for analytics, not channel setup.The SAP Emarsys Help Portal under "Email Channel Setup" lists these requirements.References:SAP Emarsys Help Portal - "Email Channel" (<https://help.emarsys.com/>).

NEW QUESTION # 20

You want to create a segment of low spenders for a lifecycle program. Where can you see a visual breakdown of buyer status and create the segment?

- A. Contacts > Combined Segments
- B. Analytics > Customer Lifecycle
- C. Management > Smart Insight Settings
- D. Analytics > Revenue Analytics

Answer: B

Explanation:

To create a segment of low spenders for a lifecycle program, you need a tool that provides both a visual breakdown of buyer status (e.g., spending behavior) and segmentation capabilities:

* Option C (Analytics > Customer Lifecycle):Correct. The Customer Lifecycle dashboard in SAP Emarsys provides a visual overview of buyer statuses (e.g., first-time, repeat, low spenders) based on purchase data from Smart Insight. It also allows you to create segments directly from this view.

* Option A:Incorrect. Smart Insight Settings is for configuring data feeds, not for visualizing or creating segments.

* Option B:Incorrect. Combined Segments is for building segments but lacks the visual buyer status breakdown.

* Option D:Incorrect. Revenue Analytics shows revenue trends, not detailed buyer status visuals or direct segment creation. The SAP Emarsys Help Portal under "Customer Lifecycle" confirms this functionality. References:SAP Emarsys Help Portal - "Customer Lifecycle" (<https://help.emarsys.com/>).

NEW QUESTION # 21

Which statement correctly describes the data flow of Web recommendations?

- A. Recommendations are requested from SAP Emarsys Customer Engagement servers. The returned recommendations are then displayed on the client website.
- B. Recommendations are displayed on SAP Emarsys Customer Engagement servers using a PHP module.
- C. Recommendations are requested from the end user's email server by the JavaScript API. The returned recommendations are then displayed by the same API.
- **D. Recommendations are requested from the end user's browser by the JavaScript API. The returned recommendations are then displayed by the same API.**

Answer: D

Explanation:

Web recommendations in SAP Emarsys work as follows:

* Option A:Correct. The JavaScript API (Web Extend) requests recommendations from the Emarsys servers directly from the user's browser, then renders them on the website.

* Option B:Incorrect. Requests originate from the browser, not Emarsys servers.

* Option C:Incorrect. Email servers are unrelated to Web recommendations.

* Option D:Incorrect. Recommendations are displayed client-side, not on Emarsys servers. The SAP Emarsys Help Portal under "Web Recommendations" confirms this data flow. References:SAP Emarsys Help Portal - "Web Recommendations" (<https://help.emarsys.com/>).

NEW QUESTION # 22

Which of the following attributes are synchronized from Emarsys-opened email activities to SAP Customer Data Platform? Note: There are 3 correct answers to this question.

- **A. IP address**
- B. Time zone
- C. City name
- **D. Attachment size**
- **E. Email subject line**

Answer: A,D,E

Explanation:

When SAP Emarsys integrates with SAP Customer Data Platform (CDP), specific attributes from email activities (e.g., opens) are synchronized:

* Option A (IP address):Correct. The IP address of the contact opening the email is captured and synced for tracking and geolocation purposes.

* Option C (Attachment size):Correct. If an email includes attachments, their size is tracked and synced as part of activity data.

* Option D (Email subject line):Correct. The subject line of the email is synchronized to identify the specific campaign or email in CDP.

* Option B (City name):Incorrect. While IP address might allow geolocation inference, "City name" is not a directly synced attribute.

* Option E (Time zone):Incorrect. Time zone is not typically synced as a standalone attribute from email opens. The SAP Emarsys integration guide for SAP CDP lists IP address, attachment size, and email subject line among synced attributes. References:SAP Emarsys Help Portal - "Integration with SAP Customer Data Platform" (<https://help.emarsys.com/>).

NEW QUESTION # 23

A one-time promotional email campaign is scheduled to be sent for all female contacts in the database. New contacts are added automatically to the contact database and all new registrations should be included in the recipient source of the email. Which recipient source do you use?

- A. Email Settings > Recipient source > Web behavior segment
- **B. Email Settings > Recipient source > Using a segment**
- C. Email Settings > Recipient source > Mobile Engage segment
- D. Email Settings > Recipient source > Generated through an event > On Registration

Answer: B

Explanation:

For a one-time email campaign including all female contacts (existing and new):

* Option A: Correct. Using a segment (e.g., "Gender = Female") as the recipient source ensures all current and newly added female contacts are included, as segments dynamically update until campaign launch.

* Option B: Incorrect. Mobile Engage segment is specific to mobile push, not email.

* Option C: Incorrect. Web behavior segment focuses on web actions, not gender or registration.

* Option D: Incorrect. "On Registration" is an event trigger for automation, not a one-time batch send.

The SAP Emarsys Help Portal under "Email Campaigns" confirms segments for dynamic recipient inclusion. References: SAP Emarsys Help Portal - "Email Campaigns" (<https://help.emarsys.com/>).

NEW QUESTION # 24

.....

Some people are not good at operating computers. So you might worry about that the C-C4H22-2411 certification materials are not suitable for you. Try to believe us. Our experts have taken your worries seriously. They have made it easy to operate for all people. Even if you know little about computers, you can easily begin to do exercises of the C-C4H22-2411 real exam dumps. Also, we have invited for many volunteers to try our study materials. The results show our products are suitable for them. In addition, the system of our C-C4H22-2411 test training is powerful. You will never come across system crashes. The system we design has strong compatibility. High speed running completely has no problem at all.
