

Trustable 220-1202 Latest Dumps Ppt by ActualVCE

P.S. Free & New 220-1202 dumps are available on Google Drive shared by ActualVCE: https://drive.google.com/open?id=1VLr-KUuDiwZ5wFTxdzn5z7YDr_8IOCxX

If you want to be employed by the bigger enterprise then you will find that they demand that we have more practical skills. Our 220-1202 exam materials can quickly improve your ability. Because the content of our 220-1202 practice questions is the latest information and knowledge of the subject in the field. If you study with our 220-1202 Exam Braindumps, then you will know all the skills to solve the problems in the work. And you are capable for your job.

Students often feel helpless when purchasing test materials, because most of the test materials cannot be read in advance, students often buy some products that sell well but are actually not suitable for them. But if you choose 220-1202 practice test, you will certainly not encounter similar problems. Before you buy 220-1202 exam torrent, you can log in to our website to download a free trial question bank, and fully experience the convenience of PDF, APP, and PC three models of 220-1202 Quiz guide. During the trial period, you can fully understand 220-1202 practice test ' learning mode, completely eliminate any questions you have about 220-1202 exam torrent, and make your purchase without any worries.

Valid 220-1202 Test Labs, Valid 220-1202 Learning Materials

It may be a contradiction of the problem, we hope to be able to spend less time and energy to take into account the test 220-1202 certification, but the qualification examination of the learning process is very wasted energy, so how to achieve the balance? The 220-1202 Exam Prep can help you make it. With the high-effective 220-1202 exam questions, we can claim that you can attend the exam and pass it after you focus on them for 20 to 30 hours.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q150-Q155):

NEW QUESTION # 150

A technician installs VPN client software that has a software bug from the vendor. After the vendor releases an update to the software, the technician attempts to reinstall the software but keeps getting an error message that the network adapter for the VPN already exists. Which of the following should the technician do next to mitigate this issue?

- **A. Delete hidden network adapters.**
- B. Map the network adapter to the new software.
- C. Run the latest OS security updates.
- D. Update the network adapter's firmware.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

VPN clients often create virtual network adapters. If the software wasn't uninstalled properly or crashed during install, leftover (often hidden) virtual adapters can prevent reinstallation. The proper solution is to delete hidden network adapters using Device Manager (with "Show hidden devices" enabled).

A: OS updates won't fix a leftover driver or adapter issue.

B: Mapping an adapter to the software is not a standard or viable solution.

C: Firmware updates apply to physical adapters, not virtual VPN adapters.

Reference:

CompTIA A+ 220-1102 Objective 3.1: Troubleshoot common Windows OS and network issues.

Study Guide Section: Troubleshooting network adapter conflicts and VPN client errors

NEW QUESTION # 151

A user takes an iOS-based smartphone to a repair shop due to performance issues. The technician observes:

Battery charge: 25%

Battery health: 90%

Hotspot: On

Used space: 63.76GB / 64GB

Which of the following is the most likely cause of the performance issue?

- A. Too many applications are open
- B. The battery health is low
- C. The hotspot is degrading the performance
- D. The phone is not sufficiently charged
- **E. The device is running out of free space**

Answer: E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Running at near full storage capacity significantly slows down smartphones. iOS in particular requires space for caching and temporary files. Performance improves when storage is cleared.

From Mike Meyers' Lab Manual:

"Lack of free space causes mobile operating systems to struggle with temp files and updates. Performance improves significantly with adequate storage."

NEW QUESTION # 152

A user reports that the time on their computer does not match the time on their VoIP phone. What should a technician do?

- A. Manually set the time on the phone to match the computer.

- B. Download and install the latest BIOS update.
- C. Confirm the user is logging in to the domain.
- **D. Configure access to an available NTP server.**

Answer: D

Explanation:

This scenario involves a mismatch in device time settings, which can affect synchronization and authentication across the network. Using a Network Time Protocol (NTP) server ensures all networked devices maintain accurate and synchronized clocks.

From Travis Everett - All-in-One Exam Guide:

"NTP servers keep all devices on a network in sync. This prevents time drift, which can cause authentication issues with domain logins, certificates, and applications.".

NEW QUESTION # 153

A user logs in daily and cannot print a report. Help desk fixes it each day, but the issue recurs. What should be done so the issue doesn't recur? (Select two)

- A. Start the printer extensions and notifications service
- B. Set the print spooler to have no dependencies
- **C. Start the print spooler service**
- D. Set the print spooler recovery to take no action
- **E. Set the print spooler to Automatic**
- F. Set the print spooler log-on to the user's account

Answer: C,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

For persistent printing issues due to spooler service, ensure the print spooler is started and set to Automatic.

This maintains print capability across reboots.

From Mike Meyers' Lab Manual:

"If users lose printing capabilities on reboot, the print spooler service must be configured to start automatically and be confirmed as running."

NEW QUESTION # 154

Which of the following methods would make data unrecoverable but allow the drive to be repurposed?

- A. Degaussing the device
- **B. Performing a low-level format**
- C. Implementing EFS
- D. Deleting the partitions

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A low-level format (also referred to as a zero-fill or full format) writes over every sector on a storage device, effectively destroying the existing data and making recovery nearly impossible. Unlike degaussing, which renders the drive unusable, a low-level format maintains the integrity of the device, allowing it to be repurposed or reused.

A: Deleting partitions does not fully erase data; it only removes references in the partition table.

B: EFS (Encrypting File System) encrypts files but does not securely wipe them.

D: Degaussing destroys the magnetic structure of a drive, making it inoperable and not reusable.

Reference:

CompTIA A+ 220-1102 Objective 4.3: Given a scenario, implement basic change management best practices.

Study Guide Section: Drive sanitation methods - low-level format vs. degaussing vs. deletion
