Trustable 4A0-113 Reliable Exam Pass4sure bring you Authorized Valid 4A0-113 Exam Discount for Nokia Nokia OSPF Routing Protocol Exam

P.S. Free & New 4A0-113 dumps are available on Google Drive shared by Prep4King: https://drive.google.com/open?id=1X8mp1tYiiPQpjP0paeuxahQaZajMnxV4

There are three different versions of our 4A0-113 exam questions: the PDF, Software and APP online. The PDF version of our 4A0-113 study guide can be pritable and You can review and practice with it clearly just like using a processional book. The second Software versions which are usable to windows system only with simulation test system for you to practice in daily life. The last App version of our 4A0-113 learning guide is suitable for different kinds of electronic products.

Nokia 4A0-113 Exam is targeted at IT professionals working on Nokia IP networks, which include service providers, system integrators, and network engineers. 4A0-113 exam aims to assess the knowledge and skills needed to configure and manage OSPF routing protocols, including understanding of the protocol's functionality, packet formats, and configuration options. Additionally, the exam covers OSPF network design, monitoring, and troubleshooting, which are essential skills for network engineers and system administrators.

Pass Guaranteed Nokia - 4A0-113 - Nokia OSPF Routing Protocol Exam – Valid Reliable Exam Pass4sure

The field of information technology has seen multiple advancements lately. Reputed companies around the globe have set the Nokia OSPF Routing Protocol Exam 4A0-113 certification as criteria for multiple well-paid job roles. Only 4A0-113 certified will easily get high-paying posts in popular companies. Additionally, a Nokia 4A0-113 Certification holder can climb the career ladder and get promotions within the current organization.

Nokia 4A0-113 exam is a certification test that focuses on the Nokia OSPF routing protocol. 4A0-113 exam tests the knowledge and skills of IT professionals who are responsible for designing, configuring, and troubleshooting OSPF networks. 4A0-113 exam is designed to validate the candidate's ability to understand the fundamental concepts of OSPF, configure and manage OSPF

networks, troubleshoot common issues, and implement best practices to optimize network performance.

Earning the Nokia 4A0-113 Certification demonstrates to employers and peers that the individual has a deep understanding of OSPF and is capable of designing, implementing, and troubleshooting OSPF networks. Nokia OSPF Routing Protocol Exam certification is an excellent way to advance one's career in the networking field and increase one's earning potential.

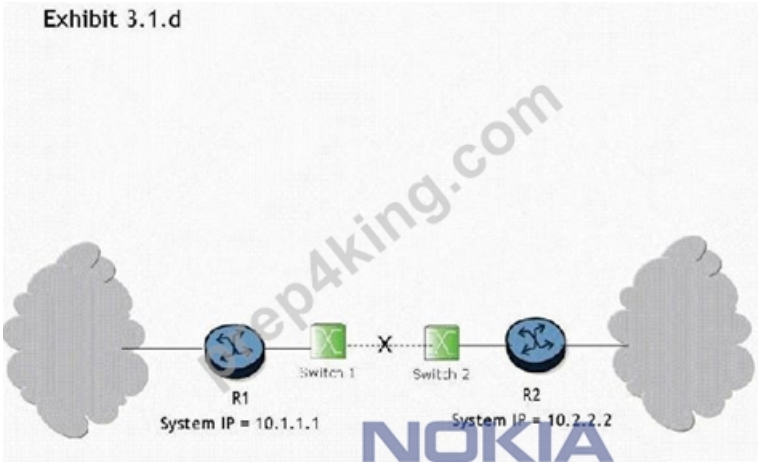
Nokia OSPF Routing Protocol Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18
What command will show the OSPF neighbors, and their status on the Nokia 7750 SR?

- A. Show ospf neighbors
- B. Show router ospf adjacency
- C. Show ospf adjacency
- D. Show router ospf neighbors

Answer: D

NEW QUESTION # 19
Click the exhibit button.



What triggers convergence of the routing protocol when the link between switch 1 and switch 2 goes down?

- A. Convergence will not be triggered because switches cannot run routing protocols between them.
- B. Convergence is triggered when the physical interfaces between routers R1 and R2 go down. At this point, both routers R1 and R2 re-compute their link state database and send updates to their adjacent routers. Once the process is complete for all routers, the networks have converged.
- C. Convergence is triggered when an LSA is sent from router R1 to router R2 to indicate that the link is down. At this point, both routers R1 and R2 re-compute their link state database and send updates to their adjacent routers. Once the process is complete for all routers, the networks have converged.
- D. Convergence is triggered when the adjacency between routers R1 and R2 drops as a result of Hello timeouts. At this point, both routers R1 and R2 re-compute their link state database and send updates to their adjacent routers. Once the process is complete for all routers, the networks have converged.
- E. Convergence is triggered when the switches notify the routers about the link state information. At this point, both routers R1 and R2 re-compute their link state database and send updates to their adjacent routers. Once the process is complete for all routers, the networks have converged

Answer: D

NEW QUESTION # 20
When are virtual links used in OSPF?

- A. When two areas are connected to area 0, but there is no direct path between them.
- B. When an area needs to traverse another area to reach area 0.
- C. When two areas need to communicate and there is no area 0.

- D. When an area needs to connect directly to another area without using area 0.

Answer: B

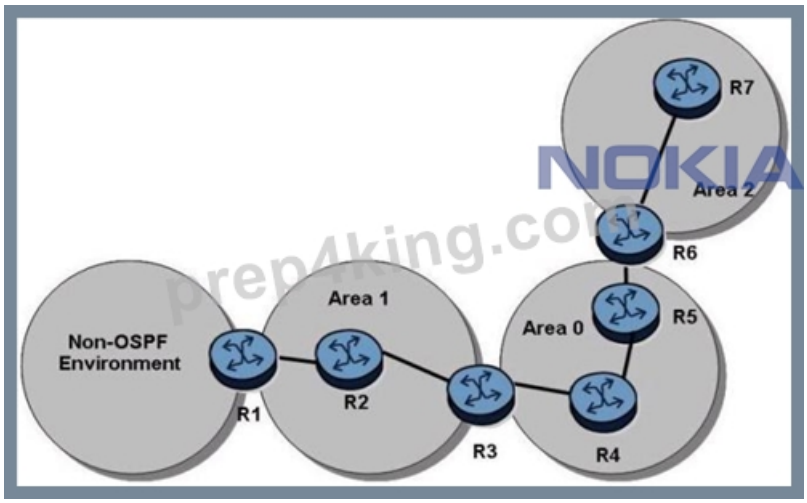
NEW QUESTION # 21
A router receives an OSPF database description packet from a neighbor that references an LSA, which is already in the router's LSDB. The sequence number in the DBD packet is lower than the sequence number of the LSA in the LSDB.
What action does the router take?

- A. The router takes no action.
- B. The router sends a link-state request to its neighbor.
- C. The router sends a link-state acknowledgement to its neighbor.
- D. The router updates the information in its LSDB with the information received from its neighbor.
- E. The router sends a link-state update to its neighbor.

Answer: E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
From Nokia 7750 SR OS Routing Protocols Guide (OSPF Database Exchange Logic):
If a router detects that its database contains a newer copy of an LSA than what its neighbor has advertised (lower sequence number seen in DBD packet), it sends a Link State Update containing the newer LSA back to its neighbor.
Thus, correct answer: A.
-

NEW QUESTION # 22
Click on the exhibit.



In the topology shown, router R1 is an ASBR configured to export external routes to OSPF. There are no stub or NSSA areas.
Which of the following regarding LSAs is TRUE?

- A. Only routers R2 and R3 receive Type 5 LSAs advertised by router R1.
- B. Router R3 will advertise Type 7 LSAs to Area 0 and Area 2.
- C. Router R7 will receive Type 5 LSAs advertised by router R1.
- D. Router R2 will receive Type 5 and Type 7 LSAs.

Answer: C

NEW QUESTION # 23
